FIPB has granted approval to our Company, vide its approval dated November 2, 2015, ("Approval") to issue and allot equity shares to FIIs, FPIs, NRIs and OCBs pursuant to the proposed Rights Issue, whether by way of renunciation or otherwise, upto an aggregate amount of ₹ 25,000 lakhs. Our Company has received Approval to issue and allot equity shares to FIIs, FPIs, NRIs and OCBs pursuant to the proposed Rights Issue, whether by way of renunciation or otherwise, upto an aggregate amount of ₹ 25,000 lakhs. The Approval is interalia subject to compounding by RBI ("Compounding"), within 90 days of the issuance of the Approval. Further, our Company vide its online application dated January 13, 2016 ("Application") and letter dated January 19, 2016 requested FIPB to cancel/delete the condition in relation to the Compounding, based on the contention that the increase in the foreign shareholding beyond 4.67% was on account of transactions in the secondary market and not due to allotment of Equity Shares, to foreign shareholders, by our Company, under the 2012 Rights Issue. FIPB in its meeting held on March 7, 2016, considered our Application for waiver of the Compounding condition. However, pending receipt of the outcome of the meeting, our Company vide its letter dated March 9, 2016 applied to the RBI for compounding. There can be no certainty that FIPB will cancel or delete the condition for Compounding. RBI may interalia levy in relation to the contravention of the conditions of the Approval granted during the 2012 Rights Issue, penalty up to thrice the sum involved, where the amount is quantifiable; or up to two lakh rupees where the amount is not quantifiable. RBI may also impose penalty which may extend to five thousand Rupees for every day, after the first day during which the contravention continues. For more details in relation to the Approval please see the chapter titled "Government and other approvals" beginning on page 133."

- The clinical trials involving the 1 NCE and 4 NDDS projects, for which Issue Proceeds amounting to ₹ 19,474.37 lakhs will be deployed, may not yield successful results***

We are an innovative pharmaceutical research and development company focusing on developing new proprietary drugs through two pathways namely; NDDS and NCEs. The process of discovery of novel drug delivery system ("NDDS") and / or new chemical entities ("NCE") are dependent on various steps and each step in the new drug discovery process is dependent on the success of the prior step; the

overall success of the NDDS and / or NCE process is dependent on the success of each of the steps carried out in the process. Clinical trial is one of the important steps in the process of NCEs and NDDSs. In the event any of the steps in discovery including clinical trial of the NDDS and / or NCE fails due to any reason, the particular NDDS/NCE program may not obtain regulatory approval for commercialization; or there could be delay in approval or management may decide to terminate the program if it becomes economically unviable to do further research. Thus there is no guarantee that, the 1 NCE and 4 NDDS projects in which the Issue Proceeds amounting to ₹ 19,474.37 lakhs will be deployed, will be successful and yield results.

Furthermore, it is likely that we may enter into related party transactions in the future as well. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our business, results of operations and financial condition.

9. *Some of our Group Companies are engaged in businesses / industries in which our Company operates and are in a similar line of business or could offer services that are related to the business of our Company. This may be a potential source of conflict of interest for us and which may have an adverse effect on our operations.*

We are part of a diversified pharmaceutical group which has grown organically and inorganically over a period of time. There are a number of companies in the group which are engaged/may be engaged in the similar line of business or offer services that are related to the business of our Company.

Some of our Group Companies including SPIL, Sun Pharma Global FZE, Sun Pharmaceutical Industries Inc, Sun Pharma Laboratories Limited, SPARC Bio-Research Private Limited, Taro Pharmaceutical Industries Limited, Taro Pharmaceuticals Canada Ltd, Taro International Limited and Ranbaxy Malaysia Sdn Bhd, Terapia SA, Ohm Laboratories Inc. are engaged in similar businesses similar to that of our Company i.e. of Pharmaceutical Research & Development. This may be a potential source of conflict of interest for our Company and may have an adverse effect on our operations. Further there is no assurance that a conflict of interest may not occur between our business and the business of our Group Companies in the future, or that we will be able to suitably resolve such a conflict without an adverse effect on our business or operations.

10. *We have in the past altered the objects of the issue. Due to inherent unpredictability in the Research and Development activities we may alter the object of this Issue.*

In October 2012, our Company had issued 29,588,056 Equity Shares of a face value of ₹ 1.00 each aggregating to ₹ 19,824.00 lakhs to the equity shareholders on rights basis (“**Rights Issue 2012**”). The aforesaid amount was raised for funding the pharmaceutical research and development activities - clinical trials; repayment of identified loan facilities availed from Group Entities; and General Corporate purposes.

The deployment of net proceeds from Rights Issue 2012, is as below:

**Due to the inherent unpredictability in clinical trial results and in the best interests of the Company and its members, our Company passed a special resolution dated May 11, 2013 through postal ballot to include the utilisation of the issue proceeds for the purpose of carrying out clinical trials on projects such as S0597 nasal, latanoprost plus timolol combination eye drops, and dry powder inhaler in addition to the clinical trial projects as stated in the Letter of Offer and subsequently, vide special resolution dated July 30 2013 passed in the AGM to vary the utilization of proceeds to any Research and Development activities/expenses, including incidental, ancillary and/or support activities. However, as on September 30, 2015, our Company has utilized ₹ 8,339.08 lakhs on Baclofen GRS Capsule and PICN, out of the proceeds of the rights issue.*

Similarly, due to the inherent unpredictability in clinical trial results, our Company may have to alter the object of this Issue, in accordance with the provisions of the Companies Act 2013 and other applicable laws.

11. *Our Promoter, Promoter Group entities and our Company may be penalized for not being in compliance with applicable laws which could materially and adversely affect our reputation and goodwill*

On August 27, 2014, Virtuous Share Investments Pvt. Ltd., one of our Promoter Group entities was penalized by SEBI for ₹ 3 lakhs for violation of the provisions of Regulation 13(1) of SEBI (Prohibition of Insider Trading) Regulations, 1992, due to acquisition of additional shares in the 2012 Rights Issue. In the future too if any such penalty is imposed on our Company, our Promoter, or any of its Promoter Group entities our reputation and goodwill may be adversely affected.

12. *The cost of bringing a new molecule to the market is very high and sufficient risk capital may not be available. In case our Company is unable to obtain additional funding to support our operations as and when required, we may be required to reduce our research and development activities or curtail our operations thereby affecting our prospects, business and financial condition adversely.*

Our Company has expended substantial funds to discover and develop our Drug Candidates in the past and additional substantial funds will be required for further development, including pre-clinical testing and clinical trials of any product candidates we develop. Due to uncertainty around successful development of our products, we are unable to precisely estimate the actual funds we will require to develop them. The actual amount and timing of our future capital requirements may differ from estimates as a result of, among other things, unforeseen delays or cost overruns in developing our products, changes in business plans due to prevailing economic conditions, unanticipated expenses and regulatory changes. To the extent our planned expenditure requirements exceed our available resources or there is an increase in our planned pharmaceutical research and development activities, we will be required to seek additional debt or equity financing. Additional debt financing could increase our interest costs and require us to comply with additional restrictive covenants in our financing agreements. Additional equity financing could dilute our earnings per Equity Share and your interest in the Company, and could adversely impact our Equity Share price.

Our ability to obtain additional financing when needed and on favorable terms, if at all, will depend on a number of factors, including our future financial condition, results of operations and cash flows, the amount and terms of our existing indebtedness, general market conditions and market conditions for financing activities and the economic, political and other conditions in the markets where we operate.

We cannot assure you that we will be able to raise additional financing on acceptable terms in a timely manner or at all. Our failure to renew arrangements for existing funding or to obtain additional financing on acceptable terms and in a timely manner, may require us to reduce our research and

development activities or curtail our operations thereby affecting our prospects, business and financial condition adversely.

- 13. *The success of the NCE and NDDS is dependent on various steps carried out in the process of drug discovery, which may or may not be in control of the Company. In the event, the NCE and NDDS projects of the Company fail at any step, our business, operating results and future prospects will adversely affected.***

The process of NCE and NDDS technology is dependent on various steps. Every step in the process is dependent on the success of the prior step. At any point in time due to either failure of a particular step or commercial unviability of the new drug the research and development activities related to the NCE process may be suspended or discontinued. The success of the new drug discovery depends on internal and external factors, the important ones being, government policies, laws, rules and regulations affecting the business or industry in which we operate, human resources with expertise in the strategic therapy area, early decision making, commercial viability, differences in the responses observed in animal/human models vis-à-vis responses in patient population, national policies, infrastructure both in terms of internal and external e.g. clinical trial set up, approvals/delay in approval by ethics committees, site selection, patient recruitment rate during clinical trials, etc, efficacy and safety outcomes in clinical trials, changing treatment landscape, additional data requirement by regulatory authorities after New Drug Application (“NDA”) submissions. Similarly, the success of the NDDS technology depends on various external as well internal factors, being, government policies, laws, rules and regulations affecting our business or the industry in which we operate, commercial viability, formulation development and optimization, establishing bio-equivalence, scale up challenges, infrastructure both in terms of internal and external e.g. clinical trial set up, approvals/delay in approval by ethics committees, site selection, patient recruitment rate during clinical trials, etc, efficacy and safety outcomes in clinical trials, changing treatment landscape, safety and efficacy associated with the formulation. Any failure at any of the stages of the process may entail rescheduling or revising the planned expenditure and funding requirements, including the expenditure for a particular purpose. In the event, the NCE and NDDS projects of the Company fail at any step, our business, operating results and future prospects will be adversely affected.

- 14. *Our clinical trials create a risk of liability and increased regulations, which may have an adverse impact on our business and results of operations.***

Clinical services involve the testing of new drugs, biologics and devices on animal and human volunteers. This testing creates risks of liability for personal injury, sickness or death of patients resulting from their participation in the study and trials. These risks include, unforeseen adverse side effects, improper application or administration of a new drug, biologic, or device, and the professional malpractice of medical care providers.

Some of our volunteer patients may be seriously ill or be at heightened risk of future illness or death. We could be held liable for errors or omissions in connection with the trials conducted by the CROs we engage, in relation to the clinical trials including, but not limited to, adverse reactions to the administration of drugs. We may be held liable for injury or loss of life or damage to any body organ of any volunteer/ patient on account of any clinical trial conducted by the CROs we engage. We may be required to pay substantial damages or incur legal costs in connection with defending any claims arising out of injury or loss of life or damage to any body organ of any volunteer/ patient on account of any clinical trial conducted by us. The insurance taken by us may not be sufficient to cover damages in case of loss of life, injury to body organs, etc. If we are required to pay damages or bear the costs of defending any claim for loss of life or damage to any body organ of any volunteer/ patient on account of any clinical trial that is beyond the level of any insurance coverage, our business and results of operations may be adversely impacted.

In addition, regulatory agencies may introduce newer stricter regulations that prevent or restrict clinical studies and trials. Our clinical studies and trials may also be the focus of negative attention from special interest groups that oppose clinical trials on ethical grounds. Any inability to conduct clinical trials would have a material adverse effect on our business and results of operations.

- 15. *If our research and development efforts do not succeed, this may hinder the introduction of new products, which could adversely affect our business, prospects and results of operations***

In order to remain competitive, we must develop, test and manufacture new products, which meet the regulatory standards and receive requisite regulatory approvals. To accomplish this, we commit substantial effort, funds and other resources towards research and development. Our ongoing investments in new product launches and research and development for future products could result in higher costs without a proportionate increase in revenues. The research and development, both for NDDS and NCE can have varying time frames. Delays in any part of the process or our inability to obtain necessary regulatory approvals for our research and development related activities or our products or failure of a product to be successful at any stage and therefore not reaching the market could adversely affect our goodwill and affect our operating results. We may or may not be able to take our research and development innovations through the different testing stages without repeating our research and development efforts or incurring additional amounts towards such research. Additionally, our competitors may commercialize similar products before us. If our research and development efforts do not succeed, it may hinder the introduction of new products, which could adversely affect our business, prospects and results of operations.

16. *Our Company may not be able to commercialize the product or receive royalty or milestone based revenues unless a commercially viable Drug Candidate is invented. The royalty or milestone revenue earned by our Company may not be in consonance with the expenses incurred to develop such drug.*

Our results of operations will depend upon our ability to successfully develop and licence pharmaceutical NCEs / NDDS programs. We should develop, test and manufacture new products, which meet the regulatory standards and receive requisite regulatory approvals. The decisions by regulatory authorities on whether and when to approve our drug applications, the speed with which regulatory authorizations are received, pricing approvals, product launches and competitive developments could affect the availability or commercial potential of our products. The drug development and commercialisation process is time consuming, expensive and uncertain. If we do not successfully licence/commercialise our products under development, or if our licensing/commercialisation is delayed, it may adversely affect our operating results. Since pharmaceutical research and development entails a high risk of failure and/or delay, our Company may not receive sufficient or any royalty or milestone based revenues for several years. Additionally, the royalty or milestone based revenue earned by our Company may not be commensurate with the expenses incurred to develop the drug or to smoothly conduct our research operations. Further the customers with whom we enter into agreement of commercialization typically determines the price and if such price is set high, we may be adversely affected. Further more, we may not be successful in entering into licensing agreements on favorable terms, including upfront, milestone, royalty and/or license payments, as a result of factors which may be outside of our control. These factors include:

- creating valuable proprietary drugs targeting potential market opportunities;
- the success or failure, and timing, of pre-clinical and clinical trials for our proprietary programs;
- competitors developing similar product

If we are unable to enter into licensing agreements and do not realize milestone based revenues and/or upfront fees when anticipated, our liquidity and our ability to continue with research operations on other products may be hampered or delayed, which in turn may adversely affect our business.

17. *Our Company has de-prioritised and / or dropped certain NCE and NDDS programs in the past and may further choose not to commercialize a Drug Candidate at any time during development, which would have an adverse effect on our financial condition and profitability.*

Our Company has *de-prioritised and / or dropped certain NCE and NDDS programs in the past and may further choose not to commercialize a Drug Candidate* at any time during development. Further, we may de-prioritise a Drug Candidate in a certain geography.

Certain de-prioritised and / or dropped programs in the past are (a). SUN 1334H Anti Allergic (Oral Tablets) [Respiratory]; (b). SUN 1334H Anti Allergic (Ophthalmic Solution) [Ophthalmology]; (c). SUN 597 (Nasal) [Respiratory]; (d). SUN 597 (Inhalant) [Respiratory]; (e). SUN B09 [Central Nervous System]; (f). SUN G44 [Central Nervous System]; (g). SUN L731 [Respiratory] (De-prioritised for USA and Europe) within NCE programs and (h). Venlafaxine ER 300mg [Central Nervous System];

(i). Baclofen GRS (alcohol dependence) [Central Nervous System] within NDDS programs. As per management information system (MIS), the expenses incurred on the de-prioritised and / or dropped projects therapeutic area wise are mentioned below:

(₹ in Lakhs)

Sl. No.	Therapeutic Area	No. of Products	Expenses incurred till September 30, 2015#
1	Central Nervous System	4	266.78
2	Ophthalmology	1	1,587.66
3	Respiratory	4	3,662.29
	Total	9	5,516.73

Some of the projects have been de-prioritised only for specific indication but we continue to work for some other indication. Some of the projects are de-prioritised for USA and Europe only.

In case we suspend, terminate or de-prioritise a program in which our Company has deployed significant resources, we will not be able to receive any return on such deployment of funds, thereby missing the opportunity to have allocated those resources to other potential productive uses. As a result, our business, financial condition, results of operations and profitability could be adversely affected.

18. ***Our Company has had negative cash flows from operating activities and from financing activities in the past including Fiscal 2015, details of which are given below. Sustained negative cash flow could impact our growth and business.***

Negative cash flows for the last three financial years:

(₹ in lakhs)

Particulars	For the financial period ended		
	March 31, 2015	March 31, 2014	March 31, 2013
Net cash from/(used in) operating activities	(3,957.59)	3,689.55	(9,534.39)
Net cash from/(used in) investing activities	5,140.65	4,359.44	(9,930.54)
Net cash from/(used in) financing activities	(125.94)	(8,083.57)	19,437.77

Cash flow of a company is a key indicator to show the extent of cash generated from the operations of a company to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For details, see the section “Financial Information” on page no. 93.

19. ***We require certain approvals and licenses in the ordinary course of our business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain or retain or renew such approvals and licences or comply with such rules and regulations, in a timely manner or at all may adversely affect our our business, financial condition and results of operations.***

Our business is subject to extensive government regulation and we require certain approvals, licenses, registrations and permissions for operating our business, some of which may have expired and for which we may have either made or are in the process of making an application for obtaining the approval or its renewal. In addition, we may not be in compliance with certain conditions prescribed by such approvals or licences. For further information, see section “Government and Other Approvals” on page 133. There can be no assurance that the licenses, permits and approvals from third parties required for the operation of our facilities or facilities operated by the CROs we engage for our projects will be issued or granted in a timely manner or at all to allow the uninterrupted operations of the facilities. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, may adversely affect the continuity of our business and may hinder our operations in the future. Further, these approvals and licenses could be subject to several conditions, and we cannot assure you that we would be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, and this may lead to cancellation, revocation or suspension of relevant approvals or licenses, which may result in the interruption of our operations and may adversely affect our business, financial condition and results of operations.

20. ***The drug research and development industry is highly competitive. If our competitors succeed in developing products that are more effective, more popular or cheaper than any product we may develop, our business and financial results may be adversely affected.***

The pharmaceutical industry is characterized by rapid and continuous technological innovation. We compete globally with some companies that offer broader range of capabilities and have better access to resources than we have. Our products face intense competition from products commercialized or under development by competitors in all of our therapeutic areas. We compete with local companies, multi-national corporations and companies from the rest of the world. Many of our competitors may have greater financial, manufacturing, research and development, marketing and other resources, more experienced in obtaining regulatory approvals, greater geographic reach, broader product ranges and stronger sales forces than we have. Further, we and our CROs also face competition with other clinical trial organisations for eligible patients. Our competitors may succeed in developing products that are more effective, more popular or cheaper as compared to the products developed by us, which may render our products obsolete or uncompetitive and adversely affect our business and financial results. Further development of a competitive product may also adversely affect our milestone based revenues and royalty income. If our competitors gain significant market share at our expense, particularly in the therapeutic areas in which we are focused such as oncology, ophthalmology, dermatology, respiratory and CNS program, our business, results of operations and financial condition could be adversely affected.

21. ***There is a matter of emphasis in the auditors' report of our Company in the audited financial statements for Fiscal 2015. Further the Companies (Auditor's Report) Order, 2003 ("CARO") for the Fiscal 2015 contains certain auditors' remarks. Further there is an auditors' remarks in the review report accompanying the statement of unaudited financial results of our Company for the three months ended June 30, 2015, quarter and six months ended September 30, 2015 and quarter and nine months ended December 31, 2015.***

There is a matter of emphasis in the auditors' report of our Company in the audited financial statements for Fiscal 2015. The details of which are as under:

In case the requisite approval is not received from the Central Government, the excess remuneration paid would be recovered from the Whole-time Director."

Auditors' remarks in the CARO for Fiscal 2015:

"The accumulated losses i.e. deficit in the Statement of Profit and Loss of the Company at the end of the financial year are not less than fifty percent of its net worth and the Company has incurred cash losses during the current financial year but has not incurred any cash loss during the immediately preceding financial year."

Auditors' remarks in the review report accompanying the statement of unaudited financial results of our Company for the three months ended June 30, 2015:

"Managerial remuneration paid is in excess of the limits approved by the Central Government to the extent of ₹Nil for the quarter ended June 30, 2015 (₹214.45 Lakhs upto June 30, 2015). In this regard, we have been informed by the Management of the Company that they have made further representations to the Central Government, the response in respect of which is awaited."

In this regard, we have been informed by the Management of the Company that they have made further representations to the Central Government, the response in respect of which is awaited.

Our report is not modified in respect of this matter.”

For further details in relation to the Auditors’ remark in the CARO and the Emphasis of Matter for Fiscal 2015, see section titled “*Financial Information*” on page 93. For further details in relation to the Auditors’ remarks in the review report accompanying the statement of unaudited financial results of our Company for the quarter and six months ended September 30, 2015 and quarter and nine months ended December 31, 2015 see chapter titled “*Material Developments*” on page 124.

22. *We have a number of contingent liabilities, and our profitability could be adversely affected if any of these contingent liabilities materialise*

As of March 31, 2015, our contingent liabilities that have not been provided for are as set out below:

	<i>(₹ in lakhs)</i>	
Particulars	As at March 31, 2014	As at March 31, 2015
a) Guarantees given by the bankers against License Scheme	430.20	201.17
b) Disputed demands by Income Tax Authorities	-	1,812.11
c) Disputed demands by Sales Tax Authorities	-	51.15
Amount paid under protest is classified under short term loans & advances*	-	6.30

*As on March 31, 2015 the Company has made under protest the following payments:

- (a) Gujarat Value Added Tax amounting to ₹ 29,933/- for the financial year 2009 – 2010 and
- (b) Central Sales Tax, amounting to ₹ 600,000/- for the financial year 2010 – 2011.

Reasons for payment under protest:

Against the demands of the above Tax authorities, our Company decided to go for appeals with the respective Appellate Authorities, after depositing a partial amount of the demand with the authorities, as required under appeal process. Depending upon the outcome, our Company will get either the refund of deposited amount or will pay the balance amount demanded.

Our contingent liabilities may become actual liabilities. In the event that any of our contingent liabilities materialize, our business, financial condition and results of operations may be adversely affected. Furthermore, there can be no assurance that we will not incur similar or increased levels of

contingent liabilities in the current fiscal year or in the future. For further details, see section, “Financial Information” on page 93.

23. ***Our Company has incurred losses in the Fiscal 2015. Any future financial losses may be perceived adversely by external parties such as customers, bankers, and suppliers, which may affect our reputation and business operations.***

Our Company has incurred losses in Fiscal 2015 amounting to ₹ 3,952.00 lakhs and for the nine months ended December 31, 2015 amounting to ₹ 6,041 lakhs. Further, our Company has also incurred cash losses during Fiscal 2015. Our Company’s financial position may accordingly be perceived adversely by external parties such as customers, bankers, and suppliers, which may affect our reputation and business operations. For further details see section “Financial Information” on page 93.

24. ***Our Company has been incurring significant expenditure on research and development. We cannot assure you that we will be able to realise any profits from such expenditure on research and development in a timely manner, or at all.***

Our Company has been incurring significant expenditure on research and development during the last five years. Details of the research and development expenses, as compared to our turnover, for the last five fiscals, are as under:

(₹ in lakhs)

Particulars	As on March 31, 2015	As on March 31, 2014	As on March 31, 2013	As on March 31, 2012	As on March 31, 2011
Capital Expenditure	975.09	260.51	505.01	422.81	515.92
Revenue	19,083.36	13,353.89	10,404.45	9,891.71	6,497.31
Expenditure					
Total research and development expenditure	20,058.45	13,614.40	10,909.46	10,314.52	7,013.99
Total research and development expenditure as a % of revenue from operations	128.80%	81.50%	125%	356%	120%

We make significant investments in research and development of new products, which may result in significant cost with no assurances of future revenues or profits. The time from commencing research and development activity to a possible licensing of a product involves multiple stages during which the product may be abandoned as a result of factors such as developmental problems, the inability to achieve clinical goals and the inability to obtain necessary regulatory approvals in a timely manner or at all. Our products currently under development, if and when fully developed and tested, may not perform as we expect.

We expect to continue to make substantial expenditures in the future too in relation to research and development, which may result in us incurring future losses. We cannot assure you that we will be able to realise any profits from such proposed projects/programs in a timely manner, or at all. If we continue to incur substantial expenditures on research and development in the future too, we may be unable to achieve or sustain our profitability, materially and adversely affecting our business and prospects.

25. ***We are dependent on clinical trials being conducted by CROs, who in turn work with multiple investigators and investigator sites.***

Our Company usually outsources conducting of clinical trials to CROs, who in turn work with multiple investigators and investigator sites i.e. doctors and hospitals. We are highly dependent on these CROs, investigators and investigator sites for conducting trials to evaluate the performance i.e. safety and efficacy of our drugs and the observations obtained from these studies form the basis of our decision to license the same. In the event their observations from these studies are inaccurate our decision on licensing may not be commercially viable, which may have an adverse effect on our business.

26. ***Our Drug Candidates in both NCEs and NDDS platforms are at various stages of development and we may not successfully develop or there may be a delay in the Drug Candidate becoming commercially viable. If our licensing /commercialisation is delayed this may harm our operating results. If we are unable to successfully develop and licence or commercialise our new Drug Candidate products or if our licensing /commercialisation is delayed, our business, results of operation and financial condition may be adversely affected.***

Our future results of operations will depend upon our ability to successfully develop and licence pharmaceutical products/drug delivery systems. The drug discovery and development process is highly uncertain and we may not be successful in developing a Drug Candidate that ultimately leads to a commercially viable drug. Promising results in preclinical development or early clinical trials may not be indicative of the results which may be obtained in later clinical trials.

Pharmaceutical companies experience significant setbacks in advanced clinical trials, even after obtaining promising results in earlier preclinical and clinical trials. At any time the USFDA or any other regulatory authority may place a clinical trial on hold, or temporarily or permanently stop the trial, for a variety of reasons, principally for safety concerns. We may experience numerous unforeseen events during, or as a result of, the clinical development process that could delay or prevent our Drug Candidates from being approved, including, failure to achieve clinical trial results that indicate a candidate is effective in treating a specified condition or illness in humans, presence of harmful side effects, determination by the USFDA or any regulatory authority that the submitted data do not satisfy the criteria for approval, lack of commercial viability of the drug, failure to acquire, on reasonable terms, intellectual property rights necessary for commercialization; and development of newer therapeutics that are more effective.

If we are unable to successfully develop and licence or commercialise our new Drug Candidate products or if our licensing /commercialisation is delayed, our business, results of operation and financial condition may be adversely affected.

27. ***If our drug discovery and development programs do not progress as anticipated, it may adversely affect our revenue, business, operating results and financial condition.***

We estimate the timing of various preclinical, clinical, regulatory and other milestones for planning purposes, including when a Drug Candidate is expected to enter clinical trials, when a clinical trial will be completed, when and if additional clinical trials will commence, or when an application for regulatory approval will be filed. We base our estimates on facts that are currently known to us and on a variety of assumptions that may prove incorrect, many of which are beyond our control. In addition, in preparing these estimates we rely on the timeliness and accuracy of information and estimates reported or provided to us by our CROs.

Further, delays in the commencement or completion of clinical testing of our products could significantly affect our product development costs and our ability to generate revenue from these products, including programs that we have out-licensed. We do not know whether planned clinical trials will begin on time or be completed on schedule, if at all. The commencement and completion of clinical trials can be delayed for a number of reasons, including delays related to the ability of our Company or our licensors/CROs to do the following:

- obtain regulatory approval to commence a clinical trial;
- reach agreement on acceptable terms with prospective drug manufacturers, CROs and trial sites;
- selection of CROs, trial sites and where necessary, contract manufacturers;
- manufacture sufficient quantities of a product candidate for use in clinical trials;
- obtain approvals of the Institutional Review Board (“**IRB**”) in USA for clinical trials in the USA and approval to conduct a clinical trial at a prospective site;
- recruit and enroll patients to participate in clinical trials, which can be impacted by many factors outside our and /or our CRO’s control, including but not limited to competition from other clinical trial programs; and
- retain patients who have initiated a clinical trial but may withdraw due to side effects from the therapy, lack of efficacy or personal issues.

Clinical trials may also be delayed as a result of ambiguous or negative interim results. In addition, a clinical trial may be suspended or terminated by us or our CROs, the FDA, the IRB overseeing the clinical trial at issue, any of our clinical trial sites with respect to that site, or other regulatory authorities due to a number of factors, including:

- failure to conduct the clinical trial in accordance with regulatory requirements (including good clinical practices (“GCP”) or our clinical protocols;
- inspection of the clinical trial operations, trial sites or manufacturing facility by the FDA or other regulatory authorities resulting in findings of non-compliance and the imposition of a clinical hold;
- unforeseen safety issues or results that do not demonstrate efficacy; and
- lack of adequate funding to continue the clinical trial.

Additionally, changes in regulatory requirements and guidance may occur and we may need to amend clinical trial protocols to reflect these changes. Amendments may require us to resubmit our clinical trial protocols to ethics committee or IRBs for re-examination, which may impact the costs, timing or successful completion of a clinical trial. If we experience delays in completion of, or if we terminate or suspend, any of our clinical trials, the commercial prospects for our product candidates may be impaired and our ability to generate product revenues will be delayed and/or reduced. In addition, many of the factors that cause, or lead to, a delay in the commencement or completion of clinical trials may also ultimately lead to the denial of regulatory approval of a product candidate.

If we or our CROs do not achieve milestones when anticipated, we may not achieve our planned revenue and it may adversely affect our revenue, business, operating results and financial condition. In addition, any delays in obtaining approvals to market and sell drugs may result in the loss of competitive advantages in being on the market sooner than, or in advance of, competing products, which may reduce the value of these products and the potential revenue we receive from the royalties or milestone payments.

28. ***If we fail to successfully conduct clinical trials, we may not be able to receive associated regulatory approval for the drug program which would adversely affect the timeframe of the drug program which in turn may have an adverse affect on our product strategies, our business and results of operations.***

Before any of our Drug Candidates can be sold commercially, we have to conduct clinical trials that demonstrate that the drug is safe and effective for use in humans and for the indications sought. The results of these clinical trials form the basis of obtaining the regulatory approval from various governmental / regulatory authorities. Conducting clinical trials is a complex, time-consuming and expensive process that requires an appropriate number of trial sites and patients to support the product claims. The time duration, number of trial sites and number of patients required for clinical trials vary substantially according to their type, complexity, novelty and the Drug Candidate’s intended use and therefore, we may spend several years for completing certain trials.

Further, the time within which we complete our clinical trials depends on the ability to enroll eligible patients who meet the enrollment criteria and who are in proximity to the trial sites. As a consequence, there may be limited availability of eligible patients, which can result in increased development costs, delays in regulatory approvals and associated delays in Drug Candidates reaching the market. Patients may also suffer adverse medical events or side effects in the course of our clinical trials that may delay or prohibit regulatory approval of our Drug Candidates. Even if we or our CROs successfully conduct clinical trials, we or our CROs may not obtain favorable clinical trial results and may not be able to obtain regulatory approval on this basis or may not be able to obtain such approval on a timely basis.

Further, we conduct clinical trials in territories outside the India through CROs such as the USA, Europe and geographies where may have limited experience in conducting clinical trials. Some or all of these foreign jurisdictions may impose stricter requirements on the clinical trial service providers or on the contract manufacturers that are more stringent than those imposed by the DCGI, which may delay the development and approval of our drug candidates.

If we or our CROs are unable to successfully manage the increasing number, size or complexity of clinical trials, the clinical trials and corresponding regulatory approvals may be delayed or we or our

CROs may fail to gain approval for our drug candidates altogether which would adversely affect the timeframe of the drug program which in turn may have an adverse affect on our product strategies, our business and results of operations.

- 29. *Drug candidates that we develop with our CROs and intend to commercialise may not receive regulatory approval or may be withdrawn after approval has been granted. If any of these events occur it could prevent us from generating revenue from commercialization of the drugs or cause us to incur significant additional costs which may have an adverse affect on our business.***

The development and commercialization of drug candidates is subject to various regulations. Pharmaceutical products require testing in animals and humans and receipt of regulatory approval prior to commercialization. It may take several years to complete testing and failure can occur at any stage of the testing. Results attained in preclinical testing and early clinical trials for any of our drug candidates may not be indicative of results that are obtained in later studies and significant setbacks in advanced clinical trials may arise, even after promising results in earlier studies. Clinical trials may not demonstrate sufficient safety and efficacy to obtain the requisite regulatory approvals or result in marketable products. Furthermore, data obtained from preclinical and clinical studies are susceptible to varying interpretations that may delay, limit or prevent regulatory approval. In addition, the administration of any drug candidate we develop may produce undesirable side effects or safety issues that could result in the interruption, delay or suspension of clinical trials, or the failure to obtain FDA or other regulatory approval for any or all targeted indications. Based on results at any stage of testing, we or our CROs may decide to repeat or redesign a trial or discontinue development of a drug candidate.

Approval of a drug candidate as safe and effective for use in humans is never certain and regulatory agencies may delay or deny approval of drug candidates for commercialization or may seek additional information not envisaged earlier. These agencies may also delay or deny approval based on additional government regulation or administrative action, on changes in regulatory policy during the period of clinical trials in humans and regulatory review or on the availability of alternative treatments. If we or our customers cannot obtain this approval, we will not realize milestone or royalty payments based on commercialization goals for these drug candidates. Based on these studies, if a regulatory authority does not believe that the drug demonstrates a clinical benefit to patients, it could limit the indications for which a drug may be sold or revoke the drug's marketing approval. Even if regulatory authorities approves the drug candidates, the manufacture, labeling, storage, recordkeeping, distribution, marketing and sale of these drugs will be subject to strict and ongoing regulations.

In addition, identification of certain side effects after a drug is in the market may result in a subsequent withdrawal of approval, reformulation of a drug, additional preclinical and clinical trials, changes in labeling or distribution, or our licensees may be required by FDA to develop and implement a risk evaluation and mitigation strategies to ensure the safe use of our proprietary drug program. Any of these events could delay or prevent us from generating revenue from the commercialization of these drugs and cause us to incur significant additional costs which may have an adverse affect on our business.

- 30. *Due to our reliance on CROs, investigators and other third parties to conduct our clinical trials, we are unable to directly control the timing, quality and expense of our clinical trials. Further, our inability to find a substitute or suitable replacement organization to carry out the clinical trials may adversely affect our business, results of operations.***

We rely primarily on third parties to conduct our clinical trials. As a result, we have had and will continue to have less control over the conduct of our clinical trials, the timing and completion of the trials, the required reporting of adverse events and the management of data developed through the trial. Communicating with outside parties can also be challenging, potentially leading to mistakes as well as difficulties in coordinating activities. Outside parties may have staffing difficulties, may undergo changes in priorities or may become financially distressed, adversely affecting their ability to conduct our trials. We may experience unexpected cost increases that are beyond our control. Problems with the timeliness or quality of the work of a contract manufacturing or CROs may lead us to seek to terminate the relationship and use an alternative service provider. We cannot assure you that we will be able to find a replacement organization that can conduct our trials in the manner, time and cost as desired by us. In the event we are unable to find a suitable replacement organization in time, or at all, to carry out

the clinical trials, our business, results of operations and future prospects could be adversely be affected.

31. *If our drug candidates do not gain market acceptance, we may be unable to generate significant sales, which will have an adverse affect on the our revenue from operations*

Even if our drug candidates are approved for sale, they may not be successful in the market. Market acceptance of any of our drug candidates will depend on a number of factors including but not limited to, demonstration of clinical effectiveness and safety, potential advantages of our drug candidates over alternative treatments, ability to offer our drug candidates for sale at competitive prices and effectiveness of marketing and distribution methods for the products. If our drug candidates does not gain market acceptance among physicians, patients and others in the medical community, our ability to generate meaningful royalties from our drug candidates would be limited, which will have an adverse effect on the our revenue from operations and we may be unable to recover the expenses incurred by us in development of the product.

32. *Our Company's ability to create a viable drug candidate is dependent on numerous factors. In the event our research and development capabilities is unable to deliver a viable drug candidates our business and results of operations may be adversely affected.*

We seek to identify and develop drug candidates for our proprietary programs. It is uncertain whether we will be able to provide drug discovery more efficiently or create high quality drug candidates, which may result in delayed or lost revenue. Our ability to create viable drug candidates for ourselves depends on a variety of factors, including, the implementation of appropriate technologies, the development of effective new research tools, complexities with the drug, lack of predictability in the scientific process and the performance and decision-making capabilities of our scientists. While we believe that our information-driven technology platform allows our scientists to make better decisions we cannot assure you that this will always enable our scientists to make correct decisions or develop viable drug candidates. In the event our research and development capabilities is unable to deliver a viable drug candidates our business and results of operations may be adversely affected.

33. *Delay in raising funds from the Issue could adversely impact the implementation schedule which may adversely affect our cash flow position, our business, results of operations and financial condition.*

Our Company's proposed objects of the Issue are to be funded from the proceeds of this Issue. Any failure or any delay on our Company's part to mobilize the required resources through this Issue or any shortfall in the Issue proceeds may delay the implementation schedule. Our Company therefore, cannot assure that it would be able to execute the proposed plans within the given time frame, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our cash flow position, our business, results of operations and financial condition. For details on schedule of implementation and use of proceeds see section "*Objects of the Issue*".

34. *The agreements we have entered into with our employees, consultants, advisors and CROs may not afford adequate protection for our trade secrets, confidential information and other proprietary information.*

In an effort to maintain the confidentiality and ownership of our trade secrets and proprietary information, we require our employees, consultants, advisors and CROs to execute confidentiality and proprietary information agreements. However, these agreements may not provide us with adequate protection against improper use or disclosure of confidential information and there may not be adequate remedies in the event of unauthorized use or disclosure.

Furthermore, we may from time to time hire scientific personnel formerly employed by other companies involved in a similar business as that of ours. In some situations, our confidentiality and proprietary information agreements may conflict with, or be subject to, the rights of third parties with whom our employees, consultants, CROs or advisors have prior employment or consulting relationships. Although we require our employees and consultants to maintain the confidentiality of all proprietary information of their previous employers, these individuals, or we, may be subject to allegations of trade secret misappropriation or other similar claims as a result of their prior affiliations.

Also, others may independently develop substantially equivalent proprietary information and techniques or otherwise gain access to our trade secrets. Our failure or inability to protect our proprietary information and techniques may inhibit or limit our ability to compete effectively, or exclude certain competitors from the market.

35. ***Our success largely depends upon our senior managerial personnel and our ability to attract and retain them. Any loss of our senior managerial personnel could adversely affect our business, results of operations and financial condition.***

We depend significantly on the expertise, experience and continued efforts of our key managerial personnel. If one or more members of our senior managerial personnel are unable or unwilling to continue in his/ her present position, it could be difficult to find a replacement and our business could be adversely affected. Our future success will also depend on our ability to attract highly skilled personnel. Competition for senior managerial personnel in our industry is intense and it is possible that we may not be able to retain our existing senior managerial personnel or may fail to attract / retain new employees at equivalent positions in the future. As such, the loss of our senior managerial personnel could adversely affect our business, results of operations and financial condition.

36. ***Our Directors and senior managerial personnel may have interests in us other than reimbursement of expenses incurred or normal remuneration or benefits.***

Our Directors and senior managerial personnel are also interested in us to the extent of their shareholding, dividend entitlement and remuneration paid to them for services rendered as our Directors and key managerial personnel and reimbursement of expenses payable to them.

37. ***Our Company's business activities require us to hire and utilise the services of trained personnel with expertise in specialised areas. Increase in employee compensation in India may adversely affect our business or operations as it may reduce our Company's profit margins. We can also not assure that we will be able to attract and retain trained personnel in accordance with our requirements at all times and our inability to do so may adversely affect our business.***

Our activities in pharmaceutical research and development require our Company to engage highly qualified employees, like scientists, with specialised training. As on January 31, 2016, there were 349 employees of our Company including scientists holding doctoral degrees, MBBS or master degree. Our Company's expenses towards personnel and employees constituted 28.31% and 23.09% of our total business expenditure in Fiscal 2014 and Fiscal 2015, respectively. Increase in employee compensation in India may adversely affect our business or operations as it may reduce our Company's profit margins. While we consider our current employee relations to be satisfactory, there can be no assurance that we will be able to attract and retain trained employees in accordance with our requirements at all times or that we will not experience future disruptions to our operations due to disputes with our employees or other problems with employees which may adversely affect our business or operations. We expect that our employee costs will continue to increase over the coming years due to continued escalation in salaries and benefits as well as headcount growth. Non-availability of requisite number of employees or trained employees or inability to attract and retain trained employees or attract employees at increased compensation levels may adversely affect our business, results of operations, profit margins and financial condition.

38. ***We do not own our Registered Office and other premises from which we operate***

We do not own our Registered Office premises situated at Akota Road, Akota, Vadodara – 390 020, Gujarat, and some of our research and development facilities and administration offices are occupied by us on a leasehold basis, which are leased to us either by one of our Group Companies or third parties. Additionally, our lease deeds may not be registered with the registrar of sub-assurances. Further, lease deeds for our properties may not be adequately stamped and consequently, may not be accepted as evidence in a court of law and we may be required to pay penalties for inadequate stamp duty. The lease periods and rental amounts vary on the basis of their locations. We cannot assure you that we will be able to renew our leases on commercially acceptable terms or at all. In the event that we are required to vacate our current premises, we would be required to make alternative arrangements for new offices

and other infrastructure and we cannot assure that the new arrangements will be on commercially acceptable terms.

39. ***Twenty three of our applications made for registration of the trademark and logo and tradenames owned by us is still pending with the relevant trademark authorities and has not yet been registered. We may be unable to adequately protect our intellectual property. Furthermore, our Company may be subject to claims alleging breach of third party intellectual property rights.***

Our Company has applied for registration of its trademark and logo and tradenames under the provisions of the Trademarks Act, 1999, even though we have received registration under classes 9, 10 and 42.

Our Company has filed an additional 23 applications for the registration of the trademark and logo and tradenames of our Company under different classes of the Trademarks Act, 1999. We are yet to receive registration under classes 1, 3, 5, 10 and 42 of the Trademarks Act, 1999. While we have applied for registration of the trademark and the logo and the tradename which we currently use, we cannot assure you that they will be registered with the Trademark Registry in a timely manner, or at all. Since, our Company does not enjoy the statutory protections accorded to a registered trademark, there can be no assurance that third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Any misuse of our logo by third parties could adversely affect our reputation which could in turn adversely affect our financial performance and the market price of our Equity Shares. If our logo and trademark is registered in favour of a third party, we may not be able to claim registered ownership of such trademarks and consequently, we may be unable to seek remedies for infringement of those trademarks by third parties other than relief against passing off by other entities. Our inability to obtain or maintain these registrations may adversely affect our competitive business position.

40. ***We are yet to receive certain registrations in connection with the protection of our intellectual property rights, especially trademarks relating to our products. Such failure to protect our intellectual property rights could adversely affect our competitive position, business, financial condition and profitability.***

We depend heavily on our intellectual property. We have applied for certain registrations in connection with the protection of our intellectual property relating to trademarks of our products. Certain of our trademarks, including those for products which we currently sell, are unregistered, been opposed, withdrawn, objected or are otherwise under dispute. If any of our unregistered trademarks are registered in favor of a third party, we may not be able to claim registered ownership of such trademarks, and consequently, we may be unable to seek remedies for infringement of those trademarks by third parties other than relief against passing off by other entities. Our inability to obtain or maintain these registrations may adversely affect our competitive business position.

41. ***If we are unable to patent new processes and protect our proprietary information, our business may be adversely affected. Further, if we are unable to negotiate licenses for patents with third parties our business and results of operations may be adversely affected***

We rely on a combination of patents, non-disclosure agreements and non-competition agreements to protect our proprietary intellectual property. While we intend to defend against any threats to our intellectual property, we cannot assure you that our patents, or other agreements will adequately protect our intellectual property. Our patent rights may not prevent our competitors from developing, using or commercializing products that are functionally equivalent or similar to our products. The process of seeking patent protection can be lengthy and expensive. Further, our patent applications may fail to result in patents being issued, and our existing and future patents may be insufficient to provide us with meaningful protection or a commercial advantage. We cannot assure you that our pending patent applications will result in grant of patents, that patents issued to or licensed by us in the past or in the future will not be challenged or circumvented by competitors or that such patents will be found to be valid or sufficiently broad to protect our technology or to provide us with any competitive advantage. We may be required to negotiate licenses for patents from third parties to conduct our business. We

cannot assure you that we may be able to negotiate licenses for patents with third parties at mutually acceptable terms or at all. In the event we are unable to negotiate licenses for patents with third parties at mutually acceptable terms or at all our business and results of operations may be adversely affected.

42. *If we inadvertently infringe on the patents of others, our business cash flows, financial condition and results of operations may be adversely affected.*

We operate in an industry characterized by extensive patent litigation, including frivolous litigation by competitors to delay grant of patent. Patent litigation can result in significant damages being awarded and injunctions that could prevent the manufacture and sale of certain products or require us to pay significant royalties in order to continue to manufacture or sell such products. While it is not possible to predict the outcome of patent litigation, we believe any adverse result of such litigation could include an injunction preventing us from selling our products or payment of significant damages or royalty, which would affect our ability to sell current or future products or prohibit us from enforcing our patent and proprietary rights against others. The occurrence of any of these risks could adversely affect our business, cash flows, financial condition and results of operations.

43. *Patent laws allowing innovator companies to extend their patents could delay the introduction of products which may adversely affect our business and future prospects.*

In many countries, patent holders have the option of extending the terms of their patents. The United States Patent and Trademark Office allows companies to extend the terms of their patents to make up for the time lost while awaiting USFDA approval. Companies are also known to make additional patents publicly known close to patent expiry of a molecule, which effectively extends the patent life and delays competition, a practice called submarining. If a company introduced, authorized or assisted another company to bring an authorized generic to the market, then the appeal of a product for which we intend to file a patent challenge may be reduced. The extension of patent terms or the extension of exclusivity in the marketplace by these or other means may delay our introduction of products which may adversely affect our business and future prospects.

44. *Out of total borrowings of our Company, as on March 31, 2015, loans amounting to ₹ 39.55 lakhs may be recalled on demand by the lenders at any time. If any such loan is recalled on demand this could adversely and materially affect cash flow position, business, results of operations and financial condition of our Company.*

Certain loans taken by our Company amounting to, ₹ 39.55 lakhs as on March 31, 2015 may be subject to repayment on demand by the lenders at any time. Further, our Company had entered into an agreement dated September 9, 2015, to avail an unsecured inter corporate loan for an amount of ₹ 5,000.00 lakhs, repayable after 12 months from the date of the respective disbursement carrying an interest rate of 10.20% p.a. payable at the end of every month. As on January 31, 2016, our Company has drawn down a sum of ₹ 4,900.00 lakhs. If any of these loans are recalled on demand our business, cash flow position, financial condition and results of operations may be adversely affected.

45. *Our lenders have imposed certain restrictive conditions on us under the financing arrangements. Such restrictions could restrict our ability to conduct our business and grow our operations, which would adversely affect our business, prospects, results of operations and financial condition.*

We have entered into agreements and arrangements with certain banks and departments for long-term and short-term borrowings and we are subject to certain restrictive covenants. Our financing agreements generally include conditions and covenants that require us to obtain lender consents prior to carrying out certain activities and entering into certain transactions and also covenants such as material change in the management set-up of the Company, material changes in shareholding pattern, changing the capital structure of our Company; formulating any scheme of amalgamation or reconstruction. Our ability to make payments on our indebtedness will depend on our future performance and our ability to generate cash, which to a certain extent is subject to general economic, financial, competitive, legislative, legal, regulatory and other factors, many of which are beyond our control. If our future cash flows from operations and other capital resources are insufficient to pay our debt obligations, meet our contractual obligations, or to fund our other liquidity needs, we may be forced to sell assets or attempt to restructure or refinance our existing indebtedness. Any refinancing of our debt could be at higher

interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. The terms of existing or future debt instruments may restrict us from adopting some of these alternatives. In addition, any failure to make payments of interest and principal on our outstanding indebtedness on a timely basis would likely result in a reduction of our creditworthiness. Further, during any period in which we are in default, we may be unable to raise, or face difficulties raising, further financing. Any of these circumstances or other consequences could adversely affect our business, prospects, results of operations and financial condition.

- 46. *Our Promoter and two of our Directors are on the board of some other companies which are in the same and/ or similar line of business. This may be a potential source of conflict of interest for us and which may have an adverse effect on our operations.***

Our Promoter, Mr. Dilip Shanghvi and two of our Directors namely Mr. Sudhir Valia and Prof. Dr. Goverdhan Mehta are on the board of other companies which are in the same and / or in the similar line of business as that of our Company. Mr. Dilip Shanghvi is on the board of Taro Pharmaceutical Industries Limited and Sun Pharmaceutical Industries Inc. Mr. Sudhir Valia is on the board of Sun Pharmaceutical Industries Inc., Taro Pharmaceutical Industries Limited, Taro International Limited and Taro Pharmaceuticals Canada Ltd. Prof. Dr. Goverdhan Mehta is on the board of Piramal Enterprises Limited and Dr. Reddy's Institute of Life Science. Our Promoter, directors, and executive officers may have an interest in pursuing transactions that, in their judgment, enhance the value of such companies, even though such transactions may involve risks to the holders of our Equity Shares. We cannot assure you that our promoter and directors will be able to address these or other conflicts of interests in an impartial manner.

- 47. *The Objects of the Issue are based on the internal estimates of our management, and have not been appraised by any bank or financial institution.***

Our funding requirements and the deployment of part of the proceeds of the Issue, to be utilised for pharmaceutical research and development activities, are based on management estimates and have not been appraised by any bank or financial institution or any independent agency. The internal management estimates are based on proposals/quotations received from multinational CROs for the identified projects and/or based on similar kind of studies undertaken in past by our Company and/or based on quotations/proposals received for similar kind of programs undertaken by multinational CROs. Normally, these quotations/proposals from multinational CROs are valid for the period of 60 – 90 days. Though these quotations and/or proposals are the basis of our estimates, the validity of the proposals/quotations have expired. Hence this may result in re-negotiation leading to cost escalation. Any change in CROs or cost escalation can significantly increase the cost of the objects of the issue, having a bearing on our expected revenues and earnings. For further details, see section “*Objects of the Issue*” on page 65.

- 48. *Our Promoter and Promoter Group will continue to control us after the Issue, which will enable them to control our business, influence material policies and outcome of matters submitted to shareholders for approval in circumstances where Promoters' interests may not align with or may be adverse to other shareholders' or our interests. After the completion of the Issue, our Promoter will continue to have certain rights under our Articles of Association.***

Upon completion of the Issue, our Promoter and Promoter Group are expected to hold, majority of our post-Issue equity share capital. As a result, our Promoter and Promoter Group will have the ability to exercise significant influence over our business, policies and affairs of the Company that requires shareholders' approval. In addition, for so long as our Promoter and Promoter Group continue to exercise significant control over us; they may influence our material policies in a manner that could conflict with the interests of our other shareholders. Our Promoter and Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree. Under the AoA of our Company, our Promoter has the right to appoint one third of the Board of the Company, right to appoint the chairman and vice-chairman of the Board, right to appoint the managing director of the Board and to terminate the service of any such managing director so appointed, of our Company, certain of the foregoing rights are exercisable subject to Promoter maintaining a minimum level of shareholding. Further, in relation to the meeting of the Board of Directors of the Company, no meetings of the Board can be held unless two directors nominated by the promoters attend the said meeting and in case decision of questions arise out of the

meeting of the Board, the same shall be decided by a majority of votes provided such majority includes the affirmative vote of at least two non-retiring directors appointed by our promoter.

49. *We have not yet entered into definitive agreements to utilize the Net Proceeds of the Issue for certain projects.*

The projects intended to be financed from the Net Proceeds are currently in different phases of clinical trial. We have not entered into any definitive contracts or placed any orders for some of the programs. Our inability to complete the identified programs in accordance with our stated schedules of implementation may lead to cost overruns and impact our future profitability. Pending utilization of the Net Proceeds for the purposes described above, we intend to temporarily deposit the funds in the scheduled commercial banks included in the second schedule of the Reserve Bank of India Act, 1934. For further details, see section “*Objects of the Issue*” on page 65.

50. *Certain types of risks may not be covered under our existing insurance policies, since these may be uninsurable or not economically viable. Our insurance coverage may not be sufficient to fully cover us against an insured risk or loss.*

While we believe that we maintain insurance coverage in amounts consistent with industry norms, our insurance policies do not cover all risks and are subject to exclusions and deductibles. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. If we suffer a significant uninsured loss or if our insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

51. *Some agreements entered into by our Company with various parties are not stamped and some are not adequately stamped. The said agreements may not be admissible as evidence in a court of law, until the relevant stamp duties are paid and the relevant registration, if required, is done. Further, some of these agreements entered into with various parties across the world contain clauses which provide for dispute resolution outside India, in foreign jurisdictions. This may escalate the cost of litigations, should any arise.*

Some agreements entered into by our Company with various parties are not stamped and some are not adequately stamped. The potential consequence of this could be that the said agreements may not be admissible as evidence in a court of law, until the relevant stamp duties are paid, if required, and the required registration is done. Any claim or adverse order / finding in connection with these agreements could adversely affect the operations of our Company.

Further, the penalties imposed for enforcing inadequately stamped and/or unregistered agreements would vary depending on the provisions of such state laws and the tenure of the agreement. For such agreements to be admitted/enforced in a court of law, stamp duty together with penalty has to be paid as per the provisions of the applicable law. Payment of such penalties for the enforceability of such agreements may adversely affect our financial position and business operations.

Further, some of these agreements entered into with various parties across the world contain clauses which provide for dispute resolution outside India, in foreign jurisdictions. In case disputes arise in respect of the same which require us to approach judicial or alternative dispute resolution fora, the costs of dispute resolution could be extremely or prohibitively high.

52. *Our Company is exposed to foreign currency fluctuations. In case our hedging arrangements are not adequate to mitigate the adverse impact of currency fluctuations our results of operations and financial condition may be adversely affected.*

Our Company incurs significant expenses in the nature of foreign exchange on account of import of R&D materials, professional charges and travel expenses. Further, our Company receives significant revenue in the nature of foreign exchange on account of sale of products i.e technology / know-how and sale of services - license fees / royalty on technology. Given below is the table with the break-up of the revenue from operation arising out of India and outside India in the last two fiscals:

(₹ in lakhs)		
Particulars	Fiscal 2014	Fiscal 2015
Total Revenue from Operations	16,702.97	15,573.75
Of which (a) Within India	3,753.25	3,099.67
(b) Outside India	12,949.72	12,474.08

Given below is the table with the break-up of total expenses incurred in India and outside India in the last two fiscals:

(₹ in lakhs)		
Particulars	Fiscal 2014	Fiscal 2015
Total Expenses	14,233.92	20,006.6
Of which (a) Within India	7,320.11	9,456.06
(b) Outside India	6,913.81	10,550.54

Given below is the table with the net gain/loss on foreign currency transaction in the last three fiscals.

Particulars	For the financial period ended		
	March 31, 2015	March 31, 2014	March 31, 2013
Net Gain /(Loss) on Foreign Currency Transactions and Translation	(10.17)	140.57	(19.70)

As on the date of this Letter of Offer, there are no outstanding forward exchange contracts, entered into by our Company. Further Exchange rate fluctuations could affect, and has in the past affected, the amount of income and expenditure, we recognize. In addition, the policies of the Reserve Bank of India (“RBI”) may also change from time to time, which may limit our ability to effectively hedge our foreign currency exposures and may have an adverse effect on our results of operations.

Further, our future capital expenditures, including any imported equipment and machinery, may be denominated in foreign currencies. Consequently, a decline in the value of the Indian Rupee against such other currencies could increase the Indian Rupee cost of making such expenditures. The exchange rate between the Indian Rupee and the U.S. dollar has varied substantially in recent years and may continue to fluctuate significantly in the future.

53. ***The R&D materials required for our Company’s business activities may not be easily available in the domestic markets and volatility in the prices of the R&D materials required may have an adverse impact on our business and financial condition.***

We have incurred ₹ 800.79 lakhs and ₹ 1,009.65 lakhs in Fiscal 2014 and Fiscal 2015 respectively on account of R&D material. The R&D materials required by our Company may not be easily available in domestic markets. The prices of R&D materials may fluctuate, depending on among other factors, the number of producers/suppliers and their production volumes or prices and changes in demand in the principal drug markets. Our Company does not have any long term agreement with suppliers for the purchase of the R&D materials, among others. We are exposed to and will have to absorb any fluctuations in the prices of these R&D materials, which may adversely affect financials of our business and financial condition.

54. ***Our inability to manage growth could disrupt our business and reduce our profitability. Any inability on our part to manage our growth or implement our strategies effectively could have a material adverse effect on our business, results of operations and financial condition.***

Our growth strategies are subject to and involve risks and difficulties, many of which are beyond our control and, accordingly, there can be no assurance that we will be able to implement our strategy or growth plans, or complete them within the budgeted cost and timelines. Further, on account of changes in market conditions, industry dynamics, technological improvements, changes in regulatory or trading policies or changes therein and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. Additionally, there can be no assurance that debt or equity financing or our internal accruals will be available or sufficient to meet the funding of our growth plans. Any inability on our part to manage our growth or implement our

strategies effectively could have a material adverse effect on our business, results of operations and financial condition.

55. ***Our Company takes advantage of certain tax benefits and other financial incentives, which if withdrawn, may adversely affect its financial condition and results of operations.***

Our Company is approved and registered with Ministry of Science and Technology, Department of Scientific and Industrial Research (“**DSIR**”) as a commercial research and development company and is eligible for deduction under Section 80 (IB) (8A) of the IT Act, 1961 of 100% of our profits and gains for ten consecutive assessment years commencing with the initial assessment year, i.e. the year prior to which the approval of DSIR was obtained subject to compliance with conditions specified under the IT Act. It may be noted that such deduction under Section 80-IB (8A) is admissible for our Company, only up to Assessment Year 2016-17 (i.e. Fiscal 2016). As per provisions of Section 35 (1) (iv) of the IT Act, our Company is eligible to claim deduction of capital expenditure in connection with the scientific research related to the business carried on by our Company, subject to the provisions of Section 35(2) of the IT Act. If these tax benefits are withdrawn or are unavailable to our Company, this may adversely affect our financial condition and results of operation. For further details of the tax benefits of our Company, please see section “*Statement of Tax Benefits*” on page 79.

56. ***Our future issue of capital or securities and/or loans, may be prejudicial to the interest of the shareholders depending upon the terms on which the capital is eventually raised.***

We may require additional capital from time to time depending on our business needs. Any further preferential issue of Equity Shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

57. ***Our ability to pay dividend in the future will depend upon future earnings, financial conditions, cash flows, working capital and capital expenditure requirements.***

Our Company has not declared any dividend since incorporation. Our Company cannot give any assurance that dividend will be paid in future. The declaration and payment of any dividend in the future will be recommended by our Board of Directors, at their discretion, and will depend on a number of factors like its earnings, cash generated from operations, capital requirements and overall financial condition.

58. ***We do not have documentary proof for certain details included in the Director biographies under the section “Our Management”.***

We do not have documentary proof for certain details included in the Director biographies under the section “*Our Management*” on page 86. The details included in the section are based on the details provided by the Directors and are supported by affidavits executed by such Directors, certifying the authenticity of the information provided.

59. ***Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.***

Advancements in technology may require us to incur additional capital expenditure for upgrading our facilities and equipment and/or write-downs of assets so as to compete with our competitors on a global scale. In the event that we are not able to respond to such technological advancements in a timely manner, we may become less competitive thereby adversely affecting our business, results of operations and financial condition. Our failure to anticipate or to respond adequately to changing technical, market demands and/or client requirements could adversely affect our business and results of operations. Further, the cost of implementing new technologies could be significant and could adversely affect our financial condition and results of operations.

60. ***Compliance with, and changes in safety, health and environmental laws and regulations may adversely affect our business, prospects, financial conditions and results of operations***

Our Company is subject to safety and health laws and regulations such as the Environment (Protection) Act, 1986, the Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) Act, 1981, Hazardous Wastes (Management & Handling) Rules, 1989 and the Indian Explosives Act, 1884. These laws and regulations impose controls on our Company's safety standards, and other aspects of its operations. Our Company has incurred and expects to continue to incur, operating costs to comply with such laws and regulations. In addition, our Company has made and expects to continue to make capital expenditures on an on-going basis to comply with the safety and health laws and regulations. Our Company may be liable to the Government of India or the State Governments or Union Territories with respect to its failures to comply with applicable laws and regulations. Further, the adoption of new safety and health laws and regulations, new interpretations of existing laws, increased governmental enforcement of laws or other developments in the future may require that our Company make additional capital expenditures or incur additional operating expenses in order to maintain its current operations or take other actions that could have a material adverse effect on its financial condition, results of operations and cash flow. Safety, health and environmental laws and regulations in India, in particular, have been increasing in stringency and it is possible that they will become significantly more stringent in the future. The costs of complying with these requirements could be significant and may have an impact on our financial condition.

61. *Taxes and other levies imposed by the Central or State Governments, as well as other financial policies and regulations, may have an adverse effect on our business, financial condition and results of operations.*

We are subject to taxes and other levies imposed by the Central or State Governments in India, including customs duties, excise duties, central sales tax, state sales tax, service tax, income tax, value added tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time.

The central and state tax scheme in India and other countries where our Company carries out clinical trials is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the Central or State Governments may adversely affect our competitive position and profitability. Any Changes in the tax structure could adversely affect our financial condition and results of operations.

62. *Our profitability may be adversely affected in the event any of our trade receivables turn into bad debts.*

The trade receivable for the Fiscals 2014 and 2015 stands at ₹ 2,799.89 lakhs and ₹ 1,988.68 lakhs, respectively, out of this 98.70% and 99.24% for Fiscal 2014 and Fiscal 2015, respectively is receivable from the Group Companies. Our trade receivable is subject to a number of significant risks that arise from the nature of their businesses. Thus, any change in the financial position of our clients that adversely affects their ability to pay us may in turn materially and adversely affect our cash flows, business prospects, financial condition and results of operations.

63. *Our operations could be interrupted by damage to our R&D facilities which could adversely effect our financial condition.*

We use dangerous materials including flammable and explosive materials in our R&D facilities and are therefore subject to the risk of loss arising from fire. In catastrophic events, including fires or explosions, could damage our laboratories, equipment, scientific data, work in progress or inventories of chemical compounds and may materially interrupt our business. We employ safety precautions in our laboratory activities in order to reduce the likelihood of the occurrence of these catastrophic events. However, we cannot eliminate the chance that such an event will occur. The rebuilding of our facilities could be time consuming and result in substantial delays in fulfilling our objectives. Due to these factors our financial condition could be affected adversely.

64. *Our quarterly operating results could fluctuate significantly, which could cause our stock price to decline.*

Our quarterly operating results have fluctuated in the past and may too fluctuate in the future. In addition, we may experience significant fluctuations in quarterly operating results due to factors such as general and industry-specific economic conditions that may affect the research and development expenditures of pharmaceutical companies. Entering into licensing or drug discovery collaborations typically involves significant technical evaluation by our customers/licensors. Accordingly, negotiation can be lengthy and is subject to a number of significant risks, including customers' budgetary constraints and internal acceptance. Due to these factors, our operating results could fluctuate significantly from quarter to quarter.

Due to the possibility of fluctuations in our revenue and expenses, we believe that quarter-to-quarter comparisons of our operating results are not a good indication of our future performance. Our operating results in some quarters may not meet the expectations of stock market analysts and Investors. If we do not meet analysts' and / or Investors' expectations, our stock price could decline.

EXTERNAL RISK FACTORS

1. ***Reforms in the health care industry and the uncertainty associated with pharmaceutical pricing and related matters could adversely affect the marketing, pricing and demand for products manufactured with the use of our technologies.***

Our success will depend in part on the extent to which government and health administration authorities, private health insurers and other third-party payers will pay for our products. Increasing expenditures for health care has been the subject of considerable public attention in almost every jurisdiction where we conduct business. Both private and governmental entities are seeking ways to reduce or curtail health care costs by limiting both coverage and the level of reimbursement for new therapeutic products. In many countries in which we currently operate, including India, pharmaceutical prices are subject to regulation. The existence of price controls can limit the revenues we earn royalties/upfront payment from our licensors/customers from sale of products manufactured with our technologies.

2. ***There could be political, economic or other factors that are beyond our control but may have a material adverse impact on our business and results of operations should they materialize.***

The following external risks may have a material adverse impact on our business and results of operations should any of them materialize:

- Political instability, a change in the Government or a change in the economic and deregulation policies could adversely affect economic conditions in India in general and our business in particular;
- A slowdown in economic growth in India could adversely affect our business and results of operations. The growth of our business and our performance is linked to the performance of the overall Indian economy. We are also impacted by consumer spending levels and businesses such as ours would be particularly affected should Indian consumers in our target segment have reduced access to disposable income;
- Civil unrest, acts of violence, terrorist attacks, regional conflicts or situations or war involving India or other countries could materially and adversely affect the financial markets which could impact our business. Such incidents could impact economic growth or create a perception that investment in Indian companies involves a higher degree in risk which could reduce the value of our Equity Shares;
- Natural disasters in India may disrupt or adversely affect the Indian economy, the health of which our business depends on;
- Any downgrading of India's sovereign rating by international credit rating agencies may negatively impact our business and access to capital. In such event, our ability to grow our business and operate profitably would be severely constrained;
- Instances of corruption in India have the potential to discourage investors and derail the growth prospects of the Indian economy. Corruption creates economic and regulatory uncertainty and could have an adverse effect on our business, profitability and results of operations; and
- The Indian economy has had sustained periods of high inflation. Should inflation continue to increase sharply, our profitability and results of operations may be adversely impacted. High rates of inflation in India could increase our employee costs, decrease the disposable income available to our customers and decrease our operating margins, which could have an adverse effect on our profitability and results of operations.

3. ***Public companies in India, including our Company, may be required to prepare financial statements under IFRS or IndAS (a variation of IFRS). The transition to IFRS or IndAS in India is very recent and still unclear and our Company may be negatively affected by such transition.***

The Company currently prepares its annual and interim financial statements under Indian GAAP. Public companies in India, including the Company, may be required to prepare annual and interim financial statements under Indian Accounting Standard 101 “First-time Adoption of Indian Accounting Standards (“**IndAS**”). On February 16, 2015, the Ministry of Corporate Affairs, Government of India (“**MCA**”) announced the revised roadmap for the implementation of IndAS (on a voluntary as well as mandatory basis) for companies other than banking companies, insurance companies and non-banking finance companies through a press release (“**Press Release**”).

The Press Release specifies that IndAS will be required to be implemented on a mandatory basis by companies whose securities are either listed or proposed to list, on any stock exchange in India or outside India, based on their respective net worth as set out below:

Sr. No.	Net Worth	First Period of Reporting
1.	₹ 50,000 lakhs or more	FY commencing on or after April 1, 2016
2.	less than ₹ 50,000 lakhs	FY commencing on or after April 1, 2017

In addition, any holding, subsidiary, joint venture or associate companies of the companies specified above shall also comply with such requirements from the respective periods specified above.

There is not yet a significant body of established practice on which to draw informing judgments regarding its implementation and application. Additionally, IndAS differs in certain respects from IFRS and therefore financial statements prepared under IndAS may be substantially different from financial statements prepared under IFRS. There can be no assurance that the Company’s financial condition, results of operations, cash flow or changes in shareholders’ equity will not be presented differently under IndAS than under Indian GAAP or IFRS. When our Company adopts IndAS reporting, it may encounter difficulties in the ongoing process of implementing and enhancing its management information systems. There can be no assurance that the adoption of IndAS by our Company will not adversely affect its results of operations or financial condition. Any failure to successfully adopt IndAS in accordance with the prescribed timelines may have an adverse effect on the financial position and results of operations of our Company.

4. *Investors may not be able to enforce a judgment of a foreign court against us.*

The enforcement by investors in the Equity Shares of civil liabilities, including the ability to affect service of process and to enforce judgments obtained in courts outside of India may be affected adversely by the fact that we are incorporated under the laws of the Republic of India and almost all of our executive officers and directors reside in India. Nearly all of our assets and the assets of our executive officers and directors are also located in India. As a result, it may be difficult to enforce the service of process upon us and any of these persons outside of India or to enforce outside of India, judgments obtained against us and these persons in courts outside of India.

5. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect our business and the Indian financial markets.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business and may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Bank’s business and profitability. Our insurance policies for assets cover, among other things, terrorism, fire and earthquakes. However, our insurance policies may not be adequate to cover the loss arising from these events, which could adversely affect our results of operations and financial condition.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have an adverse impact on us. Regional or international hostilities, terrorist attacks or other acts of violence of war could have a significant adverse impact on international or Indian financial markets or economic conditions or on Government policy. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of the Equity Shares.

6. ***You may be subject to Indian taxes arising out of capital gains. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and as result of which no Securities Transaction Tax (STT) has been paid, will be subject to capital gains tax in India.***

Under current Indian tax laws and regulations, capital gains arising from the sale of shares in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the STT has been paid on the transaction. The STT will be levied on and collected by a domestic stock exchange on which equity shares are sold. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and as result of which no STT has been paid, will be subject to capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to capital gains tax in India.

Capital gains arising from the sale of the Equity Shares will be exempt from tax in India in cases where such exemption is provided under the tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of certain countries may be liable for tax in India, as well as in their own jurisdictions on gain upon a sale of the Equity Shares.

7. ***Financial instability in other countries could disrupt our business and cause the price of our Equity Shares to decrease***

The Indian market and the Indian economy are, to a certain extent, influenced by economic and market conditions in other countries, particularly market conditions in the United States and Europe. Although, financial turmoil elsewhere in the world in past years has had limited impact on the Indian economy, investors should be aware that there is a recent history of financial crises and boom-bust cycles in multiple markets in both the emerging and developed economies which leads to risks for all financial institutions, including us. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of India or other markets may cause volatility in the Indian financial markets and indirectly, in the Indian economy in general. This could negatively impact the Indian economy, including the movement of exchange rates, interest rates and flow of funds in India. Any significant financial disruption could have an adverse effect on our business, future financial condition and the price of our Equity Shares. Although the recent financial crisis has had a limited direct impact on us, we remain subject to the risks posed by the indirect impact of the global credit crisis on the economy, some of which cannot be anticipated and the vast majority of which are not in our control. We also remain subject to counterparty risk to financial institutions that fail or are otherwise unable to meet their obligations to us.

8. ***A slowdown in economic growth in India and instability in Indian financial markets could materially and adversely affect our results of operations and financial condition.***

Our performance and the quality and growth of our business are dependent on the health of the overall Indian economy. There have been periods of slowdown in the economic growth of India. Any future slowdown in the Indian economy could thus harm our results of operations and financial condition.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging markets. Financial turmoil in Asia, the United States, Europe and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including further deterioration of credit conditions in the U.S. and European market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

9. *The Issue Price of our Rights Shares may not be indicative of the market price of our Equity Shares after the Issue.*

The Issue Price of ₹ 245 per Rights Share may not be indicative of the market price for our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that the Investor will be able to sell their shares at or above the Issue Price. Among the factors that could affect our share price are:

- quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- changes in revenue or earnings estimates or publication of research reports by analysts;
- speculation in the press or investment community;
- general market conditions; and
- domestic and international economic, legal and regulatory factors unrelated to our performance.

10. *The Competition Act, 2002, by regulating our Company's business and activities, may materially and adversely affect our Company's results of operations and financial condition.*

Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which causes or is likely to cause an appreciable adverse effect on competition is void, and any abuse of dominant position by an enterprise which is in a dominant position, is void and will be subject to substantial penalties. It is unclear how the Competition Act will affect industries in India and our Company's business. Consequently, our Company cannot assure prospective investors that enforcement under the Competition Act will not have a material adverse effect on its results of operations and financial condition.

11. *A third party could be prevented from acquiring control of our Company because of the Takeover Regulations under Indian law.*

There are provisions in Indian law that may discourage a third party from attempting to take control of our Company, even if it would result in the purchase of our Equity Shares at a premium to the market price or would otherwise be beneficial to our Company's Shareholders. Indian takeover regulations contain certain provisions that may delay, deter or prevent a future takeover or change in control so as to ensure that the interests of shareholders are protected. Any person acquiring either "control" or an interest (either on its own or together with parties acting in concert with it) in 25% or more of our Company's voting Equity Shares must make an open offer to acquire at least another 26% of our Company's outstanding voting Equity Shares. A takeover offer to acquire at least another 26% of our Company's outstanding voting Equity Shares also must be made if a person (either on its own or together with parties acting in concert with it) holding between 25% and 55% of our Company's voting Equity Shares has entered into an agreement to acquire or decided to acquire additional voting Equity Shares in any financial year that exceed 5% of our Company's voting Equity Shares. These and other applicable provisions may discourage or prevent certain types of transactions involving an actual or threatened change in control.

12. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

External factors such as potential terrorist attacks, terror threats, pandemics, acts of war or geopolitical and social turmoil in many parts of the world could prevent or hinder our ability to do business, increase our costs and negatively affect our stock price. For example, increased instability may adversely impact the desire of employees and customers to travel, the reliability and cost of transportation, our ability to obtain adequate insurance at reasonable rates or require us to incur increased costs for security measures for our operations. These uncertainties make it difficult for us and our customers to accurately plan future business activities. More generally, these geopolitical social and economic conditions could result in increased volatility in India and worldwide financial markets and economy.

13. *Our ability to freely raise foreign capital may be constrained by Indian law.*

As a pharmaceutical research and development company we are classified by the Indian government for government / automatic approval, whichever applicable, of foreign direct equity investment. The need to obtain such regulatory approval could constrain our ability to raise foreign capital, which may adversely affect our future growth. We cannot assure you that any required approvals will be given when needed or at all or that such approvals if given will not have onerous conditions.

Current Indian government policy allows 100% foreign direct investment in Indian companies in the pharmaceutical sector under the government route for brownfield investments and automatic route for greenfield investments, whichever applicable. However, the Indian government may change this policy in the future, and restrict the shareholding of foreign investors. If such changes restrict our ability to issue to foreign investors and their ability to hold shares above a specified limit, we may be restricted in our ability to raise additional funding from such foreign Investors through equity issuances in the future.

14. *A significant change in the central and state governments' economic liberalization and deregulation policies could disrupt our business. A change in taxation laws could also adversely impact our financial condition and results of operations.*

India has been following a course of economic liberalization and our business could be significantly influenced by economic policies adopted by the Government. Since 1991, successive Indian Governments have pursued policies of economic liberalization and financial sector reforms. The Government has at various times announced its general intention to continue India's current economic and financial liberalization and deregulation policies. However, protests against privatizations and other factors could slow the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

The Government has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and political, economic or other developments in or affecting India. Furthermore, the laws applicable to certain critical aspects of our business, such as the conduct of clinical trials, in India and abroad may be amended or modified periodically.

Utilization of the Net Proceeds

The proposed utilization of the Net Proceeds is set forth in the table below:

(₹ in Lakhs)				
Sr. No	Particulars of Objects	Total Estimated Cost	Amount Deployed as on January 31, 2016	Amount to be funded from the Net Proceeds ³
1	Expenditure related to Pharmaceutical Research and Development (i.e. Clinical Trials Expenses to be incurred on identified 1 NCE and 4 NDDS projects)	19,615.11 ¹	140.74 ²	19,474.37

Total		24,887.33	140.74	24,746.59

¹The quotations/proposals are from the multinational CROs in USD and Euro and the exchange ratio applied is 1 USD = ₹ 63 and 1 Euro = ₹ 69. The cost may undergo a change due to exchange rate fluctuations.

²Based on the certificate dated February 29, 2016 from M/s K. C. Mehta & Co., Chartered Accountants.

³Amount to be funded from the Net Proceeds is determined after deducting the amount deployed as on January 31, 2016 from the total estimated cost.

The fund requirements for the objects of the Issue are based on internal management estimates and the past experience of our management for the current business plans of our Company and have not been appraised by any bank or financial institution. The internal management estimates are based on proposals/quotations received from multinational CROs for the identified projects and/or based on similar kind of studies undertaken in past by our Company and/or based on quotations/proposals received for similar kind of programs undertaken by multinational CROs. Normally, these quotations/proposals from multinational CROs are valid for the period of 60 – 90 days. Though these quotations and/or proposals are the basis of our estimates, the validity of the proposals/quotations have expired. Hence this may result in re-negotiation leading to cost escalation. Any change in CROs or cost escalation can significantly increase the cost of the objects of the issue. Please see the section titled “Risk Factors” on page 10 of the LOF for the risk associated with the project funding and cost escalation. Our Company may have to revise its research and development fund requirements due to external and internal factors, including but not limited to, change in government policies, laws, rules and regulations affecting our business or the industry in which we operate, human resources with expertise in the strategic therapy area, commercial viability, delay in receipt of approval by ethics committees, site selection, patient recruitment rate during clinical trials, efficacy and safety outcomes in clinical trials, changing treatment landscape, additional data requirement by regulatory authorities after NDA submissions, or our financial condition, business or strategy, economic and business conditions, increased competition and government policies in relation to pharmaceutical industry, which may not be within the control of our management.

The nature of our business may require us to revise our requirements and deployment of Issue proceeds, since the process of discovery of novel drug delivery system (“NDDS”) and / or new chemical entities (“NCE”) are dependent on various steps and each step in the new drug discovery process is dependent on the success of the prior step; the overall success of the NDDS and / or NCE process is dependent on the success of each of the steps carried out in the process. In the event any of the steps in discovery of the NDDS and / or NCE fails due to any reason, the research and development activities related to the drug discovery process of that particular NDDS/NCE may be suspended or de-prioritised. This may entail rescheduling or revising the planned expenditure and funding requirements, including the expenditure for a particular NDDS/NCE project/product or replacing a particular NDDS/NCE project/product with another/new/expansion of NDDS/NCE project/product at the discretion of our management. We may also reallocate expenditure to newer projects or those with earlier completion dates in the case of delays (including delays that may be caused in obtaining, regulatory or local approvals and permits) in our projects. We may also engage in other new projects and/or further expand our existing projects in the future, and/or further change the CROs at the discretion of the management of our Company. Consequently, our fund requirements may also change accordingly. Any such change in our plans may require rescheduling of our expenditure programs, starting projects that are not currently planned, discontinuing projects currently planned and an increase or decrease in the expenditure for a particular project, at the discretion of the management of our Company. In case of any surplus after utilization of the Net Proceeds for the stated objects and/or utilization of the Net Proceeds towards clinical trials on new/another/revised NDDS/NCE project/product, we may use such surplus towards future growth opportunities, if required and General Corporate Purposes.

If surplus funds are unavailable, we may explore a range of options including utilising our internal accruals and seeking additional debt from existing and future lenders. We believe that such alternate arrangements would be available to fund any such shortfalls.

Amount Deployed in the Projects

Our Company has deployed a sum of ₹ 140.74 lakhs for the clinical trials on the identified 1 NCE and 4 NDDS projects till January 31, 2016 as certified by M/s K.C. Mehta & Co., Chartered Accountant *vide* their certificate dated February 29, 2016. The details of the funds deployed on the projects are as given below:

Details of the Objects of the Issue

A. Expenditures related to Research and Development – Clinical Trials

A clinical trial is an investigation in human subjects with the object of ascertaining an investigational product's safety and/or efficacy. The clinical trial intends to:

- discover or verify the clinical, pharmacological and/or other pharmacodynamic effects,
- identify any adverse reactions,
- study absorption, distribution, metabolism, and excretion of drugs

Broadly, the Pharmaceutical Research & Development activities carried out in the following process:

The above highlighted three phases of clinical trials are elaborated below:

(i) Phase I clinical study

A small group of healthy volunteers (20 to 100) are identified and administered ascending doses of the selected drug candidate starting with sub therapeutic. The purpose of this study is to evaluate for its safety and preliminary pharmacokinetics, and to determine a safe dose range (or the maximum tolerated dose) for efficacy. In the Oncology therapeutic arena, safety and tolerability of the investigational agent is also required to be determined in the intended patient sub-populations.

(ii) Phase II clinical study

The drug candidate is administered to a larger number of patients (100-300) suffering from the targeted disease condition to assess its efficacy and safety. A second part of the study is also to establish the optimal dose for efficacy and safety.

(iii) Phase III clinical study

The drug is finally assessed in a very large group of patients (300-2000) depending on the therapeutic area to confirm its effectiveness, monitor side effects, sometimes to compare it with current treatment options available in the clinical management of the disease and collect information that will allow its safe use. Once the dosing regimen, efficacy and safety are established in the clinical trials, a New Drug Application (NDA) is filed with the regulatory agencies seeking approval to sale and market the now approved new drug.

Clinical trial projects mainly consist of the following costs:

- Investigator Fees:** Clinical trials are conducted at hospitals under the supervision of qualified doctors (investigators and sub-investigators) and their teams comprising research coordinators, and other technical staff. They are paid by the sponsor for performing trial specific activities as mentioned in protocol approved by the ethics committee and regulatory authorities. These amounts are known as investigator fees.
- Ethics Committee Fees:** A clinical trial project can be started only after approval from ethics committees and regulatory authorities such as Drugs Controller General of India (the “DCGI”) in India and Food and Drug Administration (the “FDA”) in USA. The protocol, forms, patient information and informed consent documents, and dossiers containing information on the drug to be tested are reviewed and an approval letter is released to the investigator (by ethics committee) and sponsor (by regulatory authority). The fees charged for this activity and associated expense is shown as ethics committee fees.

- (c) **Study Conduct and Monitoring Costs:** The act of overseeing the progress of a clinical trial, and of **ensuring** that it is conducted, recorded, and reported in accordance with the protocol, standard operating procedures, good clinical practice, and the applicable regulatory requirements. There are at times, specific tests and investigations to be conducted to evaluate safety and efficacy of the drug in question. The costs associated with these activities are study conduct and monitoring costs.
- (d) **Project Management Costs:** To manage and plan activities with the groups involved viz. investigator team, monitoring team, data management and biostatistics team, safety and pharmacovigilance team, report writing team, logistics to ensure timely project completion. Costs associated with these activities are project management costs.
- (e) **Data Management and Biostatistics Costs:** All protocol required information is recorded on forms known as case record forms (the “CRFs”), these are retrieved and the data is entered into a validated database. Once data from all CRFs is entered, the database is locked and statistics applied to obtain efficacy/safety tables and output analysis. The cost associated with these activities is data management and biostatistics cost.
- (f) **Study Report Costs:** A written description of a trial conducted in which the clinical and statistical discussion, presentations, and analyses are fully integrated into a single report. This is generated after the output from statistical analysis is obtained at the end of the study. The report is submitted to the investigators, ethics committees and the regulatory authorities. This serves as a decision for future plans for clinical development/ marketing approval of the drug. The costs associated with these activities are termed as study report costs.
- (g) **Pass through costs:** This includes travel, training, supplies, communication, record archival and storage costs associated with the project. The costs associated with these activities are termed as Pass through costs.

Proposed Deployment of Funds:

The estimated cost of identified clinical trials expenses of 1 NCE and 4 NDDS projects is ₹ 19,615.11 Lakhs. The 4 NDDS projects comprises of 7 clinical studies. The details of the proposed utilization of the net proceeds of the issue are given in the table below:

The process of new drug discovery is dependent on various steps. Every step in the new drug discovery process is dependent on the success of the prior step. The overall success of the new drug discovery process is dependent on the success of each of the steps carried out in the process. At any point in time due to either failure of a particular step or commercial unviability of the new drug the research and development activities related to the new drug discovery process may be suspended or de-prioritized. Further, the success of the new drug

discovery also depends on internal and external factors, the important ones being, government policies, laws, rules and regulations affecting the business or industry in which we operate, human resources with expertise in the strategic therapy area, early decision making, commercial viability, differences in the responses observed in animal/human models vis-à-vis responses in patient population, national policies, infrastructure both in terms of internal and external e.g. clinical trial set up, approvals/delay in approval by ethics committees, site selection, patient recruitment rate during clinical trials, etc, efficacy and safety outcomes in clinical trials, changing treatment landscape, additional data requirement by regulatory authorities after NDA submissions.

Current Status of our Pharmaceutical Research & Development

NCE Program

NCE, also referred to as new molecular entities, are novel pharmaceutical agents that do not contain active chemical moieties previously approved by the USFDA or any other regulatory agencies. The discovery and development of these new molecules represents one of the most important areas of research in the pharmaceutical industry in the pursuit of the next generation of therapeutic agents.

We have currently three compounds in our NCEs portfolio that are now under pre-clinical and clinical development, namely, (a) SUN-597; (b) SUN-731; and (c) SUN-K706.

In the recent Past, we have deprioritized SUN - L731 and SUN - 597 nasal/inhalation based on our commercial assessment analysis and portfolio reorganisation for the United States of America and the European Union, however, we continue to evaluate development of SUN - L731 and SUN - 597 for India and other emerging markets. We have deprioritized SUN 1334H Anti Allergic (Oral Tablets), SUN 597 (Ophthalmic), SUN G44 for commercial reasons and for focusing on therapeutic areas of choice i.e. Oncology, Dermatology, Ophthalmology and CNS.

The thrust areas of our research programs for new molecules or new chemical entities are to design and develop therapies for:

Cancer

Our molecule, SUN-K706 for chronic myeloid leukaemia (CML) especially for the resistant form of CML has been screened in a high throughput kinase panel. We have now developed an optimized formulation of SUN-K706 which is suitable for clinical studies. The efficacy, safety and toxicology studies required for IND are completed.

Inflammation/Dermatitis

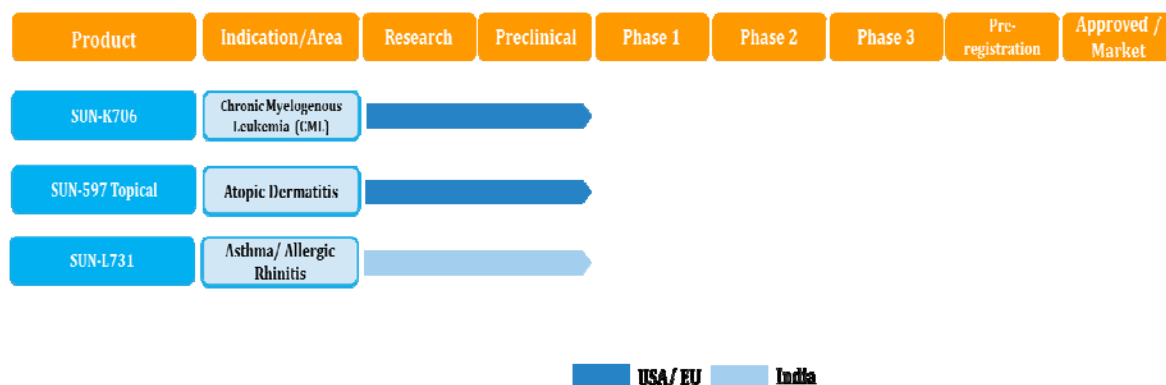

SUN-0597 is 'soft steroid' being currently developed for steroid responsive dermatoses. SUN-597 topical is a novel corticosteroid. We have completed our Pre-IND meeting.

Asthma and Rhinitis

SUN - L731 is a highly selective and potent LTD₄ antagonist being currently developed for asthma and rhinitis for Indian Market.

We have deprioritized SUN - L731 and SUN - 597 nasal/inhalation based on our commercial assessment analysis and portfolio reorganisation for the United States of America and the European Union. However, we continue to evaluate development of SUN - L731 and SUN - 597 for India and other emerging markets. We have deprioritized SUN 1334H Anti Allergic (Oral Tablets), SUN 597 (Ophthalmic), SUN G44 for commercial reasons and for focusing on therapeutic areas of choice i.e. Oncology, Dermatology, Ophthalmology and CNS.

NDDS Program

NDDS programs focus on improving therapeutic index and addressing limitations of the currently approved and marketed drugs. NDDS programs are developed for existing drugs to improve efficacy, patient compliance and drug safety. NDDS are a new way of effectively delivering a known or new drug in the body or improvising existing technologies to enhance the safety and patient compliance of the drug. These drug delivery systems are patient- friendly, as they are less cumbersome, and more convenient for the patient to take as well as the nursing staff to administer.

In the last 9 years we have developed 7 propriety drug delivery platforms across oral, injectable and topical drug delivery systems, namely, WRAP Matrix Technology, Gastro Retentive Innovative Device (“**GRID**”), Swollen Micelle Microemulsion (“**SMM**”), Gel Free Reservoir (“**GFR**”) Technology, Nanotecton Platform, Abuse Deterrent Formulations (“**ADF**”) and Dry Powder Inhaler Device (“**DPI**”), with established clinical proof of concept and at least one product each registered in India using 6 of these 7 platforms, namely: (i) Leviteracetam Extended Release Tablet (Wrap Matrix Technology); (ii) FDC Latanoprost 50 mcg + Timolol Maleate IP Eq. to Timolol 5 mg (Preservative free) ophthalmic solution (SMM); (iii) Baclofen E.R. capsules (GRID); (iv) Fixed dose combination (FDC) of Salmeterol – Xinafoate Eq. to Salmeterol IP 25 mcg/25 mcg/ 25 mcg + Fluticasone Propionate IP 50 mcg / 125 mcg / 250 mcg powder for Inhalation (DPI); (v) Paclitaxel Injection Concentrate for Nanodispersion 100 mg and 300 mg (Nanotecton Platform); (vi) Latanoprost Ophthalmic Solution (Microemulsion) (SMM); and (vii) Timolol Maleate Ophthalmic Solution (GFR).

In the recent past, we have deprioritised our research and development activities on Venlafaxine Extended Release product and Latanoprost +Timolol fixed dose combination for the US market after discussion on the programme with the United States Food and Drug Administration (“USFDA”); and Baclofen GRS alcohol dependence program due to the regulatory and economic reasons.

The NDDS programs being developed by our Company are the following:

Oral Controlled Releases

A. Gastro Retentive Innovative Device (“GRID”)

An innovative Gastro Retentive System (“**GRS**”) has been devised that allows longer retention in the stomach and improves gastrointestinal absorption of drugs that have a narrow absorption window. We have developed Baclofen GRS for the treatment of spasticity. The IND has been filed with US Food and Drug Administration (“**USFDA**”). We have received a special protocol assessment status from the United States of America for Phase-3 clinical trial of Baclofen GRS and trials have accordingly began in the US. Baclofen GRS has already been launched in India.

B. Wrap Matrix system

This technology enables developing a multi-layered matrix based functionally coated tablet which offers controlled release for high dose and high solubility. We have filed NDA with USFDA in relation to Levetiracetam ER 1000 mg and 1500 mg, an anti-epileptic using the wrap matrix technology. We have been granted composition and dose specific patents for Levetiracetam ER in the US.

C. Abuse Deterrent Formulations (ADF)

We believe, USFDA considers the development of abuse deterrent, a priority. We believe, the regulatory environment strongly indicates future development of controlled substance formulations to be abuse-deterrent. We have identified an opportunity in ADF and preliminary proof-of-concept results are encouraging. Further, we have also completed conceptual meeting with USFDA and have filed Patents for ADF.

Targeted drug delivery-injection

- D. Nanoparticle based products** - Nanotechnology based delivery systems (“**Nanotecton**”) enables selective delivery of cytotoxic drugs to cancerous tissues. In this technology, drugs are encapsulated within nanoscale carriers derived from biocompatible/ biodegradable polymers and lipids. Two of our products, Paclitaxel Injection Concentrate for Nanodispersion (“**PICN**”) and Docetaxel Injection Concentrate for Nanodispersion (“**DICN**”) for treatment of cancer are in clinical trials. PICN has obtained marketing approval in India from Deputy Drugs Controller (India).

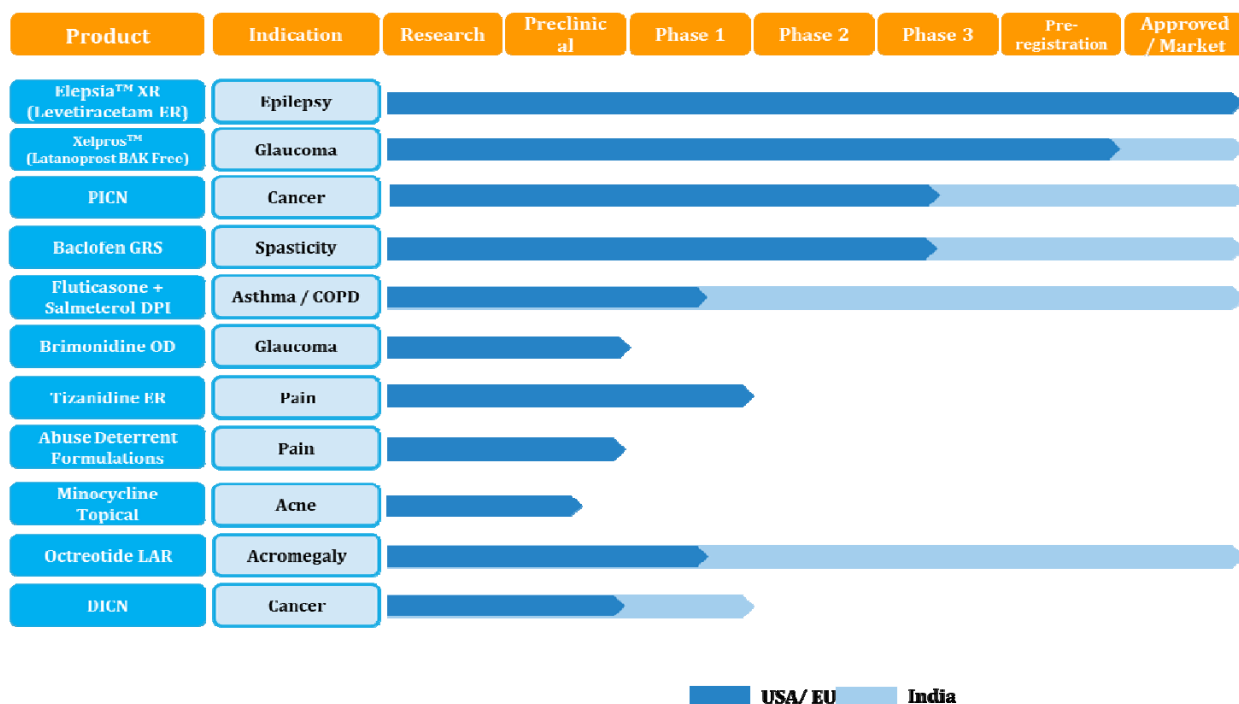

Topical drug delivery systems

- E. Novel device for inhaled drugs:** A newly engineered dry powder inhalation device which enables convenient and uniform dose administration of drugs for asthma and Chronic Obstructive Pulmonary Disease (“**COPD**”), is being developed as per the guidance of the US and European FDA requirements. Phase-3 trials in India has been successfully completed and the product has been launched in India in 2011. We have discussed the outcome and clinical development program of the Pharmacokinetic study with 3 EU regulatory agencies and achieved concurrence with regulatory agencies on the proposed clinical program.
- F. SMM technology for ophthalmic solution:** SMM is a platform for solubilizing ophthalmic drugs with limited water solubility or completely insoluble ophthalmic drugs. The formulation contains known ocular lubricant which fortifies the lipid layer in formation of tear film, and uncharged coating is soft to eye surface. It has reduced risk of ocular surface damage on chronic use and Prevents drug from environmental temperature and light fluctuations. A BAK-free Latanoprost Ophthalmic Solution (Microemulsion) has been launched in India after obtaining marketing authorization from DCGI. We have received complete response letter (“**CRL**”) from USFDA and have responded to the CRL. The product has been licensed to one of our Group Companies for the US markets.
- G. Gel Free Reservoir (GFR) technology for ophthalmic solution:** GFR technology platform uses a unique polymer ratio that shows synergistic increase in viscosity without the loss of clarity and flow property. The formulation stabilizes tear film and retains active for prolonged periods.

Using our NDDS technology we have been able to obtain approvals for Leviteracetam Extended Release Tablet (Elepsia™ XR) in US and other products in India i.e., (i) Leviteracetam Extended Release Tablet (Wrap Matrix Technology); (ii) FDC Latanoprost 50 mcg + Timolol Maleate IP Eq. to Timolol 5 mg (Preservative free) ophthalmic solution (SMM); (iii) Baclofen E.R. capsules (GRID); (iv) Fixed dose combination (FDC) of Salmeterol – Xinafoate Eq. to Salmeterol IP 25 mcg/25 mcg/ 25 mcg + Fluticasone Propionate IP 50 mcg / 125 mcg / 250 mcg powder for Inhalation (DPI); (v) Paclitaxel Injection Concentrate for Nanodispersion 100 mg and 300 mg (Nanotecton Platform); (vi) Latanoprost Ophthalmic Solution (Microemulsion) (SMM); and (vii) Timolol Maleate Ophthalmic Solution (GFR).

In the recent past, we have deprioritised our research and development activities on Venlafaxine Extended Release product and Latanoprost +Timolol fixed dose combination for the US market after discussion on the programme with the USFDA; and Baclofen GRS alcohol dependence program due to the regulatory and economic reasons.

Steps involved in the process of new drug discovery (NCE)

The first step in the exercise is to identify the potential therapeutic target of interest for treating a disorder. Upon identification of the potential therapeutic target of interest for treating a certain disorder, the process of new drug discovery for the target commences. It consists of the following key steps:

A. Non clinical Phase

(i) *Hit Identification*

If the structural characteristics of the therapeutic target is not known, the compound libraries of particular scaffolds are screened using high throughput screening methods. However if the structure of the therapeutic target is known, virtual compound libraries are screened with the help of computer aided drug design group. Few molecules are from the identified scaffolds and are initially synthesized for preliminary in-vitro screening for identification of potential scaffold(s).

(ii) *Lead identification and optimization*

Once hit is identified, its analogues are synthesized and are subjected to a series of tests for assessing potency and selectivity for the therapeutic target. The next step is to perform an early assessment of Absorption, Distribution, Metabolism and Excretion (“ADME”)/ toxicology characteristics *in-vitro* and in *in-vivo* and also screen for their efficacy in animal models of the disease. Based on these results appropriate structural modifications are done so as to optimize the desired attributes for efficacy and ADME characteristics. The most promising candidates are then selected for further assessments.

(iii) *Candidate identification and selection*

The promising candidates are further screened for performance in various disease models. Also, these compounds are assessed for their physicochemical characteristics such as stability, solubility etc., before proceeding for long term toxicological studies. The best compound meeting the requirements of efficacy, safety, pharmacokinetics and physicochemical characteristics is chosen for long term toxicity studies and is selected as a candidate for clinical assessment. Once the regulatory toxicological and safety studies are completed, an investigational new drug (IND) application is filed with the regulatory authorities seeking permission for first in human studies.

B. *Clinical Phase*

(i) *Phase I clinical study*

A small group of healthy volunteers (20 to 100) are identified and administered ascending doses of the selected drug candidate starting with sub therapeutic. The purpose of this study is to evaluate for its safety and preliminary pharmacokinetics, and to determine a safe dose range (or the maximum tolerated dose) for efficacy. In the Oncology therapeutic arena, safety and tolerability of the investigational agent is also required to be determined in the intended patient sub-populations.

(ii) *Phase II clinical study*

The drug candidate is administered to a larger number of patients (100-300) suffering from the targeted disease condition to assess its efficacy and safety. A second part of the study is also to establish the optimal dose for efficacy and safety.

(iii) *Phase III clinical study*

The drug is finally assessed in a very large group of patients (300-2000) depending on the therapeutic area to confirm its effectiveness, monitor side effects, sometimes to compare it with current treatment options available in the clinical management of the disease and collect information that will allow its safe use. Once the dosing regimen, efficacy and safety are established in the clinical trials, a New Drug Application (NDA) is filed with the regulatory agencies seeking approval to sale and market the now approved new drug.

Steps involved in development of products using NDDS platforms.

A. *Literature Search:*

Based on the business potential and the unmet need, product is identified for development using NDDS platforms. Literature search is carried out to collect information about API and dosage forms. Regulatory status, patent status, present manufacturers of drug, physical and chemical properties, method of analysis, mechanism of action of drug is searched for drug substance, whereas, for dosage form, brands in the concerned market, relevant reference product, releases of the drug in body, regulatory requirements for the proposed dosage form and available methods of analysis for finished product is searched.

B. *Creation of TPP (Target Product Profile) / QTPP (Quality Target Product Profile) and Identification of Critical Quality Attributes (COAs)*

Based on the findings of the literature search, the following attributes are proposed for the dosage, i.e (a) desired finished product characteristics including in-vitro release profile; (b) desired pharmacokinetic profile; (c) proposed pack; and (d) proposed shelf life. Also, clinical and non-clinical studies are proposed based on regulatory requirements, collected literature and previous knowledge.

C. *Application for licences & permissions*

Necessary regulatory permissions are applied for in the concerned marketing country, such as test licence for project initiation, no objection certificate from DGCI, license for import of reference

product, application for permission for conducting bioequivalence/ relative bioavailability study/clinical study (if any).

D. Pre-formulation Studies

The phase of pre-formulation studies begins after the Company procures all the necessary permissions, authorisations and raw material, such as, drug substance and excipients (inactive materials) required for each stage. This phase includes analytical method development, characterization of API, API- excipient compatibility study, selection of excipients based on compatibility study, characterization of excipients and packaging materials etc.

E. Analytical Method Development

Analytical methods, if available, in pharmacopoeia may be evaluated on formulations and intermediates to check for safety, efficacy and suitability. Analytical studies are an integral part of pre-formulation. If methods are not available in pharmacopoeias, in-house methods such as stability indicating assay, related substances, dissolution and any other tests will be developed.

F. Formulation Development

The formulation development phase consists of three stages, i.e., exploration and feasibility, confirmation and stability testing and optimization.

- (a) Exploration and feasibility: During the exploration and feasibility phase, feasibility of proposed manufacturing process is evaluated. The use of various excipients and if required, different processes are evaluated. Appropriate analytical feedback is obtained using available analytical methods. Formula is developed to meet all the desired product characteristics.
- (b) Confirmation and stability testing: In this phase the prototype batches are packed suitably and charged for stability studies, taking into consideration the requirements of market country. Multimedia dissolution study carried out for reference product and test product.
- (c) Pilot bioequivalence is carried out as per the regulatory requirement.

G. Optimization of formulation:

Formulation challenge studies are performed to enable optimization of the formula and manufacturing process. At this stage impact of different formulation factors is evaluated. Optimization is carried out till a bioequivalent and stable product is developed. Suitable changes are done after obtaining bioequivalent formulation subject. The formulation is scaled up to pilot plant scale and larger scale.

- H. Pivotal bioequivalence studies and clinical studies (*Clinical Phases as covered under Steps involved in the process of New Drug Discovery*) are carried out. Necessary stability data of exhibit batches along with development data and data of bioequivalence studies and clinical studies are provided to the regulatory agencies for approval.

The process of NDDS technology is dependent on various steps. Every step is dependent on the success of the prior step. At any point in time due to either failure of a particular step or commercial unviability of the formulation the research and development activities may be deprioritized.

Other Confirmations

Our Company does not undertake any manufacturing activities as such and gets our products manufactured on

contract basis at third party manufacturing facilities.

In recent past, USFDA has rescinded its earlier approval in relation to ELEPSIA XR (Levetiracetam Extended Release Tablets 1000mg/1500mg), citing that the compliance status of the manufacturing facility at Halol was not acceptable, being operated by SPIL.

Further, the compliance status of the manufacturing facility at Halol not being as per the USFDA standards, the approval from USFDA in relation to XELPROS (Latanoprost Ophthalmic Emulsion 0.005%) has been delayed.

The above has delayed in generating revenue from these two products namely, ELEPSIA XR (Levetiracetam Extended Release Tablets 1000mg/1500mg) and XELPROS (Latanoprost Ophthalmic Emulsion 0.005%) in USA.

No part of the Issue Proceeds will be paid by us to our Promoter and Promoter Group, Directors, Key Management Personnel, Associates or Group Companies, except in the usual course of business.

amount substituted for cost, less its estimated residual value. Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related service are recognised as a liability at the present value of the defined benefit obligation as at the balance sheet date ascertained on actuarial basis by an independent valuer and provided as per company's rules.

Short-term employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised during the year when the employees render the service. These benefits include performance incentive and compensated absences which are expected to occur within twelve months after the end of the period in which the employee renders the related service.

Gratuity

For defined benefit plans in the form of gratuity fund, the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested.

(xiii) Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognised only when there is a present obligation as a result of past events and when a reliable estimate of the amount of the obligation can be made. Contingent liability is disclosed for (i) Possible obligations which will be confirmed only by uncertain future events not wholly within the control of the Company or (ii) Present obligations arising from past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made. Contingent Assets are not recognised in the financial statements.

(xiv) Impairment of Assets

The Company assesses at each Balance Sheet date whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognised in the Statement of Profit and Loss. If at the Balance Sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the lower of recoverable amount and the carrying amount that would have been determined had no impairment loss been recognised.

(xv) Share Issue Expenses

Expenses incurred in connection with issue of shares is accumulated and amortised over a period of 5 years from the year of issue of shares.

There are no material changes and commitments, other than as disclosed below, which are likely to affect our financial position since March 31, 2015 till date of the Letter of Offer.

- (a) On July 24, 2015, our Company forfeited 17,093 partly paid up shares for non payment of call money;
- (b) Our Company received complete response letter from USFDA to its New Drug Application for Latanoprost BAK-free eyedrops;
- (c) In recent past, USFDA has rescinded its earlier approval in relation to ELEPSIA XR (Levetiracetam Extended Release Tablets 1000mg/1500mg), citing that the compliance status of the manufacturing facility at Halol was not acceptable, being operated by Sun Pharmaceutical Industries Limited.

Further, the compliance status of the manufacturing facility at Halol not being as per the USFDA standards, the approval from USFDA in relation to XELPROS (Latanoprost Ophthalmic Emulsion 0.005%) has been delayed.

Litigation against our Company

Tax Litigations:

Direct Tax cases

1. Our Company received notices on September 8, 2011 and January 13, 2012 for assessment of income under Section 143(2) and Section 142(1) of the Income Tax Act, 1961 (“**IT Act**”) for the Assessment Year (“**AY**”) 2010-2011. Further, on December 31, 2013 we received a questionnaire from the Assistant Commissioner of Income Tax (“**ACIT**”) which was responded by us. The Transfer Pricing Officer (“**TPO**”) *vide* his order dated January 24, 2014 made an upward adjustment of ₹ 1,535.76 lakhs to the total income of our Company (“**TP Order**”). Our Company had in the past on January 27, 2012 contested, that the expenditures are of a capital nature on scientific research related to the business and that they were entitled to claim a deduction of ₹ 851.69 lakhs under Section 35(1)(iv) of the IT Act. As the claim of said deduction by the Company was not found to be appropriate, a show cause notice was issued by the ACIT on January 28, 2014 (“**Show Cause Notice**”). On February 6, 2014, the Company responded to the Show Cause Notice stating that they are eligible for deduction under Section 35(1)(iv) as our Company was fulfilling the conditions laid down under this section (“**Show Cause Notice Response**”). Based on the Show Cause Notice Response, the ACIT passed an order on April 8, 2014 (“**ACIT Order**”). The ACIT Order held that the Company had furnished inaccurate particulars by claiming deductions as mentioned above and thus, it is a case for initiation of penal proceedings. Additionally, the order disallowed the losses amounting to ₹ 7,268.94 lakhs to be carried forward, but permitted losses of ₹ 3,409.24 lakhs to be carried forward. Subsequent to the ACIT Order, we have received a notice of demand from the ACIT; and a notice from the ACIT initiating penalty proceedings for concealing the particulars of our income or furnishing inaccurate particulars of such income for the AY 2010-2011. Our Company filed an appeal dated May 16, 2014 before the Commissioner of Income Tax (Appeals) – III, Baroda against the order of the ACIT. The matter is currently pending.
2. Our Company received notices on August 27, 2010 and January 24, 2011 for assessment of income for Assessment Year (“**AY**”) 2009-2010 under Section 143(2) and Section 142(1) of the Income Tax Act, 1961 (“**IT Act**”). Further, on July 15, 2011 we had received a questionnaire from Assistant Commissioner of Income Tax (“**ACIT**”) which was responded by us. The Transfer Pricing Officer (“**TPO**”) *vide* his order dated January 30, 2013 made upward adjustment of ₹1791.66 lakhs to the

arm's length price of the transaction entered into by the Company and certain other parties ("**TPO Order**"). In the submissions before both i.e. the ACIT and TPO our Company contended that the other parties are not associated enterprises. Based on the averments and submissions made by the Company, the ACIT on April 25, 2013 passed an order ("**ACIT Order**"). The ACIT Order held that our Company's claim of deduction under Section 35(1)(iv) of the IT Act on capital work in progress ("**CWIP**") including advances on capital account is not justifiable on grounds that our Company had not provided any submissions in support of CWIP including advances on capital account. In pursuance of the same, the claim of ₹ 604.22 lakhs was disallowed by the ACIT Order. Additionally, the ACIT Order also held that the Company was liable to pay an amount of ₹ 41.03 lakhs in lieu of leave encashment rejecting the Company's contention that it is disallowed to pay the same under Section 43B of the IT Act as the unpaid leave encashment liability is not a statutory liability. Our Company received a notice of demand dated April 25, 2013 from the ACIT, wherein the ACIT has initiated penalty proceedings on grounds of concealing the particulars of our income or furnishing inaccurate particulars of such income for the AY 2009-2010. Subsequently, our Company filed an appeal dated May 31, 2013 before the Commissioner of Income Tax (Appeals) – III, Baroda against the order of the ACIT. The matter is currently pending.

3. Our Company's assessment of income for A Y 2008-2009 was completed on October 25, 2010 under Section 143(3) of the Income Tax Act, 1961 ("**IT Act**"). The original assessment was reopened under Section 147 of the IT Act on account of entering into international transactions with certain other associated parties for the Assessment Year ("**AY**") 2008-2009. Subsequently, on August 20, 2014, the Transfer Pricing Officer ("**TPO**") passed an order making an upward adjustment of ₹ 3,398.06 lakhs to the arm's length price of the international transactions with certain other parties. Pursuant to the same, our Company in its submission dated November 7, 2014 stated that we are entitled to deduction under Section 35(1)(iv) of the IT Act. On December 16, 2014, the Assistant Commissioner of Income Tax ("**ACIT**") passed an order disallowing the claim of deduction under Section 35(1)(iv) as it failed to prove that the capital expenditure is incurred on the scientific research; the scientific research is related to the business; and the business was carried on by the Company ("**ACIT Order**"). Subsequent to the ACIT Order we have received a notice of demand from the ACIT; and a notice from ACIT initiating penalty proceedings for concealing the particulars of our income or furnishing inaccurate particulars of such income for the AY 2008-2009. Our Company filed an appeal dated January 9, 2015 before the Commissioner of Income Tax (Appeals) – II, Baroda against the order of the ACIT. The matter is currently pending.

Our Company received notices on September 21, 2012 and June 3, 2013 for assessment of income under section 143(2) and section 142(1) of the Income Tax Act, 1961 ("**IT Act**") for the Assessment Year ("**AY**") 2011-2012. Further, on August 19, 2014 our Company received a questionnaire from the Assistant Commissioner of Income Tax ("**ACIT**") which was duly responded to by us. The Transfer Pricing Officer ("**TPO**") vide his order dated November 14, 2014 made an upward adjustment of ₹ 6,226.22 lakhs ("**TP Order**"). As the claim of the Company in its return of income was not found to be appropriate a show cause notice was issued by the ACIT on October 7, 2014 ("**Show Cause Notice**"). On October 28, 2014 our Company responded to the Show Cause Notice stating that they are eligible for a deduction of ₹ 441.09 lakhs under Section 35(1)(iv) of the IT Act ("**Show Cause Notice Response**"). Based on the Show Cause Notice Response, the ACIT passed an order on February 3, 2015 ("**ACIT Order**"). The ACIT Order held that the Company had furnished inaccurate particulars by claiming deductions and thus, it is a case for initiation of penal proceedings. Subsequent to the ACIT Order we have received a notice of demand from the ACIT raising tax demand of ₹ 1,812.10 lakhs from our Company for the AY 2011-2012. Our Company filed an appeal dated March 2, 2015 before the Commissioner of Income Tax (Appeals) – II, Baroda against the order of the ACIT. The matter is currently pending.

Option to receive Equity Shares in Dematerialized Form

Investors shall be allotted the Equity Shares in dematerialized (electronic) form at the option of the Investor. We have signed a tripartite agreement with NSDL and the Registrar to the Issue on April 27, 2007 which enables the Investors to hold and trade in Equity Shares in a dematerialized form, instead of holding the Equity Shares in the form of physical certificates. We have also signed a tripartite agreement with CDSL and the Registrar to the Issue on and May 11, 2007 which enables the Investors to hold and trade in Equity Shares in a dematerialized form, instead of holding the Equity Shares in the form of physical certificates.

In this Issue, the allottees who have opted for Equity Shares in dematerialized form will receive their Equity Shares in the form of an electronic credit to their beneficiary account as given in the CAF, after verification with a depository participant. Investor will have to give the relevant particulars for this purpose in the appropriate place in the CAF. Allotment advice, refund order (if any) would be sent directly to the Investor by the Registrar to the Issue but the Investor's depository participant will provide to him the confirmation of the credit of such Equity Shares to the Investor's depository account. CAFs, which do not accurately contain this information, will be given the Equity Shares in physical form. No separate CAFs for Equity Shares in physical and/ or dematerialized form should be made.

INVESTORS MAY PLEASE NOTE THAT THE EQUITY SHARES CAN BE TRADED ON THE STOCK EXCHANGE ONLY IN DEMATERIALIZED FORM.

The procedure for availing the facility for Allotment of Equity Shares in this Issue in the electronic form is as under:

- Open a beneficiary account with any depository participant (care should be taken that the beneficiary account should carry the name of the holder in the same manner as is registered in our records. In the case of joint holding, the beneficiary account should be opened carrying the names of the holders in the same order as registered in our records). In case of Investors having various folios with different joint holders, the Investors will have to open separate accounts for such holdings. Those Equity Shareholders who have already opened such beneficiary account(s) need not adhere to this step.
- For Equity Shareholders already holding Equity Shares in dematerialized form as on the Record Date, the beneficiary account number shall be printed on the CAF. For those who open accounts later or those who change their accounts and wish to receive their Equity Shares by way of credit to such account, the necessary details of their beneficiary account should be filled in the space provided in the CAF. It may be noted that the Allotment of Equity Shares arising out of this Issue may be made in dematerialized form even if the original Equity Shares are not dematerialized. Nonetheless, it should be ensured that the depository account is in the name(s) of the Equity Shareholders and the names are in the same order as in our records.
- The responsibility for correctness of information (including Investor's age and other details) filled in the CAF vis-à-vis such information with the Investor's depository participant, would rest with the Investor. Investors should ensure that the names of the Investors and the order in which they appear in CAF should be the same as registered with the Investor's depository participant.
- If incomplete/ incorrect beneficiary account details are given in the CAF, then such shares will be credited to a demat suspense a/c which shall be opened by the Company as specified in the SEBI circular no. SEBI/CFD/DIL/LA/1/2009/24/04 dated April 24, 2009.
- The Equity Shares allotted to applicants opting for issue in dematerialized form, would be directly credited to the beneficiary account as given in the CAF after verification. Allotment advice, refund order (if any) would be sent directly to the applicant by the Registrar to the Issue but the applicant's depository participant will provide to the applicant the confirmation of the credit of such Equity Shares to the applicant's depository account. It may be noted that Equity Shares in electronic form can be traded only on the Stock Exchanges having electronic connectivity with NSDL and CDSL.
- Renounees will also have to provide the necessary details about their beneficiary account for Allotment of Equity Shares in this Issue. In case these details are incomplete or incorrect, the application is liable to be rejected.
- Non-transferable allotment advice/refund orders will be directly sent to the Investors by the Registrar.

Investment by FPIs

SEBI recently notified the SEBI FPI Regulations whereby FIIs, sub-accounts and QFIs categories of investors were merged to form a new category called 'Foreign Portfolio Investors'. Prior to the notification of the SEBI FPI Regulations, portfolio investments by FIIs and sub-accounts were governed by SEBI under the FII Regulations and portfolio investments by QFIs were governed by various circulars issued by SEBI from time to time ("**QFI circulars**"). Pursuant to the notification of the SEBI FPI Regulations, the FII Regulations were

repealed and the QFI circulars were rescinded.

Under the SEBI FPI Regulations, purchase of equity shares by an FPI or an investor group should be below 10% of the total issued capital of an Indian company.

However, portfolio investments by FIIs and QFIs are also governed by RBI under FEMA and RBI has not yet notified the corresponding amendments to regulations under FEMA. Under the FEMA regulations, no single FII can hold more than 10% of the paid up capital of an Indian company. In respect of an FII investing on behalf of its eligible sub-accounts, the investment on behalf of each eligible sub account shall not exceed 10% of the paid up capital, or 5% of the paid up capital in case such eligible sub-account is a foreign corporate or an individual. The total equity share holding of all FIIs in a company is subject to a cap of 49% of the paid up capital of the company. The 49% limit can be increased up to the applicable sectoral cap by passing a resolution by the board of the directors followed by passing a special resolution to that effect by the shareholders of the company.

The individual and aggregate investment limits for Eligible QFIs in equity shares of a listed Indian company, under the FEMA regulations, are 5% and 10%, respectively, of the paid up capital. Further, wherever there are composite sectoral caps under the extant FDI policy, these limits for Eligible QFI investment in equity shares shall also be within such overall FDI sectoral caps.

In light of the notification of FPI Regulations and the absence of any RBI notification on corresponding amendments to regulations under FEMA, FIIs and Eligible QFIs should consult their advisors regarding the investment limits applicable to them.

Under the FPI Regulations and subject to compliance with all applicable Indian laws, FPIs may issue, subscribe or otherwise deal in offshore derivative instruments (defined under the FPI Regulations as any instrument, by whatever name called, which is issued overseas by a FPI against securities held by it that are listed or proposed to be listed on any recognized stock exchange in India, as its underlying security), directly or indirectly, only in the event (i) such offshore derivative instruments are issued only to persons who are regulated by an appropriate foreign regulatory authority; and (ii) such offshore derivative instruments are issued after compliance with 'know your client' norms. Further, Category II FPIs under the SEBI FPI Regulations which are unregulated broad based funds and Category III FPIs under the SEBI FPI Regulations shall not issue, subscribe or otherwise deal in such offshore derivative instruments directly or indirectly. In addition, FPIs are required to ensure that further issue or transfer of any offshore derivative instruments by or on behalf of it is made only to person regulated by an appropriate foreign regulatory authority.

Pursuant to a circular dated January 13, 2012, the RBI has permitted Eligible QFIs to invest in equity shares of Indian companies on a repatriation basis subject to certain terms and conditions. Eligible QFIs have been permitted to invest in equity shares of Indian companies which are offered to the public in India in accordance with the SEBI Regulations.

Eligible QFIs shall open a single non-interest bearing Rupee account with an AD category-I bank in India for routing the payment for transactions relating to purchase of equity shares (including investment in equity shares in public issues) subject to the conditions as may be prescribed by the RBI from time to time.

Applications will not be accepted from FPIs in restricted jurisdictions-

FPIs which are QIBs, Non-Institutional Investors or whose application amount exceeds ₹ 2,00,000 can participate in the Rights Issue only through the ASBA process.
