B: VALUATION OF EQUITY INSTRUMENTS

1. Traded Equity Securities

When an equity security is not traded on any Stock Exchange on a particular valuation day, the value at which it was traded on the selected Stock Exchange, as the case may be, on the earliest previous day would be used provided such date is not more than thirty days prior to valuation date.

2. Thinly Traded Equity / Equity Related Securities

- (a) When trading in an equity and/or equity related security (such as convertible debentures, equity warrants etc.) in a month is both less than Rs.5 lacs in value and the total volume is less than 50,000 shares, the security would be considered as thinly traded security
- (b) In order to determine whether a security is thinly traded or not, the volumes traded in all recognized Stock Exchanges in India would be taken into account.
- (c) Where a Stock Exchange identifies the thinly traded securities by applying the above parameters for the preceding calendar month and publishes or provides the required information along with the daily quotations, the same would be used for valuation.

Sahara Mutual Fund

- (d) If the shares are not listed on the Stock Exchanges which provide such information, then we would make our own analysis in line with the above criteria to check whether such securities are thinly traded or not.

3. Non-traded / Suspended Securities

When an equity security is not traded on any Stock Exchange for a period of thirty days prior to the valuation date, the scrip would be treated as a non traded security.

When an equity security is suspended up to thirty days, then the last traded price shall be considered for valuation of that security. If an equity security is suspended for more than thirty days, then the AMC or Trustees would decide the valuation norms to be followed and such norms would be documented and recorded.

The valuation methodology for thinly traded equity securities, Non-traded equity securities would be as follows:

Based on the latest available Balance Sheet, net worth would be calculated as follows:

- (a) Net Worth per share = [share capital+ reserves (excluding revaluation reserves) – Misc. expenditure and Debit Balance in P&L A/c] Divided by No. of Paid up Shares.
- (b) Average capitalization rate (P/E ratio) for the industry based upon NSE prices or BSE prices and discounted by 75% i.e. only 25% of the Industry average P/E would be taken as capitalization rate (P/E ratio). Earnings per Share (EPS) of the latest audited annual accounts would be considered for this purpose.
- (c) The value as per the net worth value per share and the capital earning value calculated as above would be averaged and further discounted by 10% for illiquidity so as to arrive at the fair value per share.
- (d) In case the EPS is negative, EPS value for that year would be taken as zero for arriving at capitalized earning.
- (e) In case, where the latest Balance Sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies would be valued at zero.
- (f) In case, an individual security accounts for more than 5% of the total assets of the scheme, an independent valuer would be appointed for the valuation of the said security. To determine if a security accounts for more than 5 per cent of the total assets of the scheme, it would be valued by the procedure above and the proportion which it bears to the total net assets of the scheme to which it belongs will be compared on the date of valuation.

4. Unlisted Equity

Methodology for Valuation - unlisted equity shares of a company would be valued "in good faith" as below:

- a) Based on the latest available Balance Sheet, net worth would be calculated as follows:
 - 1. Net Worth per share = [share capital+ reserves (excluding revaluation reserves) – Misc. expenditure and Debit Balance in P&L A/c] Divided by No. of Paid up Shares.
 - 2. After taking into account the outstanding warrants and options, Net Worth per share would again be calculated and shall be = [Share Capital + consideration on exercise of Option and/or Warrants received/receivable by the Company + Free Reserves (excluding Revaluation Reserves) – Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] / Number of Paid up Shares plus

Sahara Mutual Fund

Number of Shares that would be obtained on conversion and/or exercise of Outstanding Warrants and Options.

3. The lower of (1) and (2) above would be used for calculation of Net Worth per share and for further calculation in (c) below.
- b) Average capitalization rate (P/E ratio) for the industry based upon NSE prices or BSE prices and discounted by 75% i.e. only 25% of the Industry average P/E would be taken as capitalization rate (P/E ratio). Earnings per Share (EPS) of the latest audited annual accounts would be considered for this purpose.
- c) The value as per the net worth value per share and the capital earning value calculated as above would be averaged and further discounted by 15% for illiquidity so as to arrive at the fair value per share.

The above valuation methodology would be subject to the following conditions:

- a) All calculations would be based on audited accounts.
- b) If the latest Balance Sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies would be valued at zero.
- c) If the Net Worth of the company is negative, the share would be marked down to zero.
- d) In case the EPS is negative, EPS value for that year would be taken as zero for arriving at capitalised earning.
- e) In case an individual security accounts for more than 5 per cent of the total assets of the scheme, an independent valuer would be appointed for the valuation of the said security. To determine if a security accounts for more than 5 per cent of the total assets of the scheme, it shall be valued in accordance with the procedure as mentioned above on the date of valuation.

5. Demerger

Generally on demerger, a listed security gets bifurcated into two or more shares. The valuation of these de-merged companies would depend on the following scenarios:

- a. Both the shares are traded immediately on de-merger: In this case both the shares would be valued at respective traded prices.
- b. Shares of only one company continued to be traded on de-merger: Traded shares would be valued at traded price and the other security would be valued at traded value on the day before the de merger less value of the traded security post de merger. In case value of the share of de-merged company is equal or in excess of the value of the pre de-merger share, then the non traded share would be valued at zero, till the date it is listed.
- c. Both the shares are not traded on de-merger: Shares of de-merged companies would be valued equal to the pre de merger value up to a period of 30 days from the date of de merger till the date it is listed. The market price of the shares of the de-merged company one day prior to ex-date would be bifurcated over the de-merged shares. The market value of the shares would be bifurcated on a fair value basis, based on available information on the de-merger scheme.
- d. In case shares of either of the companies are not traded for more than 30 days: Then it would be treated as unlisted security, and valued accordingly till the date these are listed.

6. Preference Shares

Preference Shares valuation guidelines would be as follows:

- a. Traded preference shares would be valued as per traded prices.
- b. Non traded Preference Shares
 - (I). Redeemable Preference Shares
 - i. Convertible preference share would be valued like convertible debentures*.
 - * If a convertible preference share does not pay dividend then it would be treated like non convertible debentures.
 - ii. Non-Convertible preference share would be valued like a debt instrument.
 - (II). Irredeemable preference shares would be valued on perpetual basis. It is like a constant dividend equity share.

*In general in respect of convertible debentures and bonds, the non-convertible and convertible components would be valued separately. The non-convertible component would be valued on the same basis as would be applicable to a debt instrument. The convertible component would be valued on the same basis as would be applicable to an equity instrument.

7. Warrants

- a. In respect of warrants to subscribe for shares attached to instruments, the warrants would be valued at the value of the share which would be obtained on exercise of the warrants as reduced by the amount which would be payable on exercise of the warrant. A discount similar to the discount to be determined in respect on convertible debentures shall be deducted to account for the period, which must elapse before the warrant can be exercised.
- b. In case the warrants are traded separately they would be valued as per the valuation guidelines applicable to Equity Shares.

8. Rights

Until they are traded, the value of "rights" shares would be calculated as:

$$V_r = n \div m \times (P_{ex} - P_{of})$$

Where

V_r = Value of rights

n = no. of rights offered

m = no. of original shares held

P_{ex} = Ex-rights price

P_{of} = Rights Offer Price

Where the rights are not treated pari passu with the existing shares, suitable adjustment would be made to the value of rights. Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights would be valued at the renunciation value.

9. Derivatives

Market values of traded open futures and option contracts would be determined with respect to the exchange on which contracted originally, i.e., a future or an option contracted on the National Stock Exchange (NSE) would be valued at the closing price on the NSE.

The price of the same futures and option contract on the Bombay Stock Exchange (BSE) cannot be considered for the purpose of valuation, unless the futures or option itself has been contracted on the BSE.

The same will be valued at closing price if the contract is traded on the valuation day. In case there is no trade on valuation day then the same would be valued at Settlement prices.

However, the contracts which are going to expire on valuation date would be valued at Settlement prices only.

10. Mutual Fund Units

- a. In case of traded Mutual Fund schemes, the units would be valued at closing price on the stock exchange on which they are traded like equity instruments. In case the units are not traded for more than 7 days, last declared Repurchase Price (the price at which Mutual Fund schemes buys its units back) would be considered for valuation.
- b. If the last available Repurchase price is older than 7 days, the valuation will be done at the last available NAV reduced by illiquidity discount. The illiquidity discount will be 10% of NAV or as decided by the Valuation Committee.
- c. In case of non-traded Mutual Fund scheme, the last declared Repurchase Price (the price at which Mutual Fund schemes buys its units back) would be considered for valuation.
- d. In case of Investments made by a scheme into the other scheme of Sahara Mutual Fund, if valuation date being the last day of the financial year falling on a non-business day, then the computed NAV would be considered for valuation on March 31.

Related matters

- i) In case of any other instruments not mentioned above and not covered in the policy above, the same shall be referred to the Investment and Valuation Committee which is empowered to take decision.
- ii) In case of any perceived conflict of interest while valuating the securities, the matter shall be dealt and decided by Investment and Valuation Committee.
- iii) For non– business day the valuation shall be done on aggregated Scrip wise prices as provided by CRISIL/ICRA. In absence of Scrip wise prices the valuation shall be done on accrual basis/amortization basis based on last valuation
- iv) In case of exceptional circumstances like, exceptional policy announcements by government/regulatory bodies, natural disasters, public disturbances, extreme volatility in capital market, shut down of market, war etc and on those days if scrip- wise value or valuation matrices are not available from CRISIL/ICRA and if security is not traded, the valuation for the day shall be done based on last valuation plus accrual/amortization or as may decided by the Investment and Valuation Committee.
- v) The Valuation Policy shall be reviewed by the Statutory Auditor at least once in a financial year.
- vi) Valuation Policy as updated and approved by the Board of AMC / Board of Trustees shall be applicable for the schemes of Sahara Mutual Fund.

b. ACCOUNTING POLICIES & STANDARDS

For Investment in Securities

1. For the purposes of the financial statements, mutual funds shall mark all investments to market and carry investments in the balance sheet at market value. However, since the unrealised gain arising out of appreciation on investments cannot be distributed, provision has to be made for exclusion of this item when arriving at distributable income.
2. Dividend income earned by a scheme should be recognised, not on the date the dividend is declared, but on the date the share is quoted on an ex-dividend basis. For investments which are not quoted on the stock exchange, dividend income must be recognised on the date of declaration.
3. In respect of all interest-bearing investments, income must be accrued on a day to day basis as it is earned. Therefore, when such investments are purchased, interest paid for the period from the last interest due date upto the date of purchase must not be treated as a cost of purchase but must be

Sahara Mutual Fund

debited to Interest Recoverable Account. Similarly interest received at the time of sale for the period from the last interest due date upto the date of sale must not be treated as an addition to sale value but must be credited to Interest Recoverable Account.

4. In determining the holding cost of investments and the gains or loss on sale of investments, the “average cost” method must be followed.

5. Transactions for purchase or sale of investments should be recognised as of the trade date and not as of the settlement date, so that the effect of all investments traded during a financial year are recorded and reflected in the financial statements for that year. Where investment transactions take place outside the stock market, for example, acquisitions through private placement or purchases or sales through private treaty, the transaction should be recorded in the event of a purchase, as of the date on which the scheme obtains an enforceable obligation to pay the price or, in the event of a sale, when the scheme obtains an enforceable right to collect the proceeds of sale or an enforceable obligation to deliver the instruments sold.

6. Bonus shares to which the scheme becomes entitled should be recognized only when the original shares on which the bonus entitlement accrues are traded on the stock exchange on an ex-bonus basis. Similarly, rights entitlements should be recognised only when the original shares on which the right entitlement accrues are traded on the stock exchange on an ex-rights basis.

7. Where income receivable on investments has accrued but has not been received for the period specified in the guidelines issued by the Board, provision shall be made by debiting to the revenue account the income so accrued in the manner specified by guidelines issued by the Board.

8. When in the case of an open-ended scheme units are sold, the difference between the sale price and the face value of the unit, if positive, should be credited to reserves and if negative be debited to reserves, the face value being credited to Capital Account. Similarly, when in respect of such a scheme, units are repurchased, the difference between the purchase price and face value of the unit, if positive should be debited to reserves and, if negative, should be credited to reserves, the face value being debited to the capital account.

9. In the case of an open-ended scheme, when units are sold and appropriate part of the sale proceeds should be credited to an Equalisation Account and when units are repurchased an appropriate amount should be debited to Equalisation Account. The net balance on this account should be credited or debited to the Revenue Account. The balance on the Equalisation Account debited or credited to the Revenue Account should not decrease or increase the net income of the fund but is only an adjustment to the distributable surplus. It should, therefore, be reflected in the Revenue Account only after the net income of the fund is determined.

In a close-ended scheme launched prior to the commencement of the Securities and Exchange Board of India (Mutual Funds) (Amendment) Regulations, 2009] which provide to the unitholders the option for an early redemption or repurchase their own units, the par value of the unit has to be [debited] to Capital Account and the difference between the purchase price and the par value, if positive, should be [credited] to reserves and, if negative, should be [debited] to reserves. A proportionate part of the unamortized initial issue expenses should also be transferred to the reserves so that the balance carried forward on that account is proportional to the number of units remaining outstanding.

10. The cost of investments acquired or purchased should include brokerage, stamp charges and any charge customarily included in the broker's brought note. In respect of privately placed debt instruments any front-end discount offered should be reduced from the cost of the investment.

11. Underwriting commission should be recognised as revenue only when there is no devolvement on the scheme. Where there is devolvement on the scheme, the full underwriting commission received and not merely the portion applicable to the devolvement should be reduced from the cost of the investment.
