Part III – OTHER DETAILS

A. COMPUTATION OF NAV

- (a) The Net Asset Value (NAV) of the scheme shall be calculated by determining the value of the scheme's assets and subtracting therefrom the liabilities of the scheme taking into consideration the accruals and provisions. NAV shall be declared separately for the different Plans and Options of the scheme.
- (b) The NAV per unit of the scheme shall be calculated by dividing the NAV of the scheme by the total number of units issued and outstanding on the date of calculation under the scheme. The NAV shall be rounded off upto four decimal places for the scheme.

NAV of the Units under the Scheme shall be calculated as shown below:-

$$\text{NAV} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current Assets} - \text{Current Liabilities and Provision}}{\text{No of Units outstanding under Scheme on the Valuation Date}}$$

The NAV under the Scheme would be rounded off to 4 decimals and Units will be allotted upto three decimal places or such other formula as may be prescribed by SEBI from time to time.

Methodology for Calculation of Sale and Re-purchase price of the units of mutual fund scheme

i) In case of Purchase of mutual fund units

As per existing regulation, no entry load is charged with respect to applications for purchase / additional purchase of mutual fund units. Therefore, Computation of Sale Price is as below:

NAV	10.00
Entry Load	Not Applicable
Sale Price	10.00

This also means, Sale Price = NAV as on date of investment

ii) Redemption/ Repurchase of mutual fund units

In case of redemption, repurchase price is calculated as below

Repurchase Price = NAV as on date of redemption - exit load (if applicable)

iii) Illustration showing how repurchase price is calculated under 2 different scenarios-

Amount Invested- Rs.10,000/-

Date of Investment- 1st April 2022

NAV as on date of investment- Rs.10/- per unit

Exit load- For exit on or before 12 months from the date of allotment- 1%

For exit after 12 months from the date of allotment- Nil

No of units allotted at the time of purchase

Amount invested

= -----
NAV of the scheme on the date of investment

= 10,000 / 10 = 1000 units

Particulars	Scenario I	Scenario II
	Redemption during applicability of exit load	Redemption in case of Nil Exit load
Date of Redemption	On or before 31st March 2023	After 31st March 2023
NAV as on date of redemption	Rs. 12	Rs.12
Applicable Exit load	1%	Nil
Repurchase Price (NAV as on date of redemption-Exit load)	Rs.12 - (Rs.12*1%)	Rs.12- (Nil)
Repurchase Price on date of Redemption	Rs.11.88	Rs.12
Redemption Amount payable to investors (no of units allotted x Repurchase Price)	Rs.11.88 x 1000	Rs.12 x 1000
	= Rs.11,880/-	Rs.12,000/-

Note - This is only for illustration purpose. Actual Exit load charged in the Scheme may vary. The above mentioned example does not take into consideration any applicable statutory levies and taxes.

- (c) A valuation day is a day other than (i) Saturday and Sunday (ii) a day on which both the stock exchanges (BSE and NSE) and the banks in Mumbai are closed (iii) A day on which the purchase and redemption of units is suspended. C. LOAD STRUCTURE– for all classes of investors

- (1) Exit Load is an amount which is paid by the investor to redeem the units from the scheme. This amount is used by the AMC to pay commissions to the distributor and to take care of other marketing and selling expenses. Load amounts are variable and are subject to change from time to time. There will not be any distinction among unit holders should be made based on the amount of subscription while charging exit loads. Any imposition or enhancement in the load shall be applicable on prospective investments only. For the current applicable structure, please refer to the website of the AMC www.utimf.com or call at 1800 266 1230 (toll free number) or (022) 6227 8000 (non toll-free number) or your distributor.

Entry Load (As % of NAV)	Exit Load (As % of NAV)
Nil	1% - If redeemed or switched out on or before completion of 15 days from the date of allotment of units. Nil - If redeemed or switched out after completion of 15 days from the date of allotment of units.

In accordance with the requirements specified by the provisions 10.4.1 (a) of para 10.4 under Chapter 10 of SEBI Master Circular for Mutual Funds no entry load will be charged for purchase/additional purchase /switch-in accepted by the Fund. Similarly, no entry load will be charged with respect to applications for registrations under Systematic Investment Plans/Systematic Transfer Investment Plans accepted by the Fund.

Switch in/out, Systematic Investment Plan (SIP) and Systematic Transfer Investment Plan (STRIP) will also attract Load like regular Purchases and Redemption.

The AMC reserves the right to change/modify exit/switchover load, depending upon the circumstances prevailing at any given time. A load structure when introduced by the AMC may comprise of exit load and/or switchover load as may be permissible under the SEBI Regulations. The load may also be changed from time to time and in the case of an exit/redemption load this may be linked to the period of holding. The switchover load may be different for different plans. However, any such change in the load structure shall be applicable on prospective investment only.

The investor is requested to check the prevailing load structure of the scheme before investing.

For any change in load structure, AMC will issue an addendum and display it on the website/UTI Financial Centres.

- (2) Any imposition or enhancement of load shall be applicable on prospective investments only.

At the time of changing the load structure, the Mutual Fund shall consider the following measures to avoid complaints from investors about investment in the scheme without knowing the exit load:

- (i) The addendum detailing the changes shall be attached to the Scheme Information Document and Key Information Memorandum. The addendum shall be circulated to all the distributors/brokers so that the same can be attached to all Scheme Information Document and Key Information Memorandum already in stock.
- (ii) Arrangements shall be made to display the addendum in the Scheme Information Document in the form of a notice in all the official points of acceptance and distributors/brokers office.
- (iii) The introduction of the exit load along with the details may be stamped in the acknowledgement slip issued to the investors on submission of the application form and shall also be disclosed in the statement of accounts issued after the introduction of such load.
- (iv) Any other measures which the Mutual Fund may feel necessary.

D. VALUATION BY SCHEME INVESTING IN ETFs

The closing price of the units of ETFs on Stock Exchange shall be used for valuation by Scheme investing in such ETF.

SECTION II

I. INTRODUCTION

A. DEFINITIONS/INTERPRETATION

Definitions / Interpretation is available under the following link on the website of UTI Mutual Fund – <https://www.utimf.com/downloads/data-related-to-sid>

B. RISK FACTORS

Standard Risk Factors:

1. Investment in Mutual Fund scheme Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
2. As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down.
3. Past performance of the Sponsors/AMC/Mutual Fund does not guarantee future performance of the scheme.
4. The name of the scheme does not in any manner indicate either the quality of the scheme or its future prospects and returns.
5. The sponsors are not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs.10,000/- made by them towards setting up the Fund.
6. The present scheme is not a guaranteed or assured return scheme.
7. Statements/Observations made in the Scheme Information Document are subject to the laws of the land as they exist at any relevant point of time.
8. Growth, appreciation, Income Distribution cum Capital Withdrawal (IDCW) and income, if any, referred to in this Scheme Information Document are subject to the tax laws and other fiscal enactments as they exist from time to time.
9. The NAVs of the Scheme may be affected by changes in the general market conditions, factors and forces affecting capital market, in particular, level of interest rates, various markets related factors and trading volumes, settlement periods and transfer procedures.
10. **Credit Risk:** Bonds / debentures as well as other money market instruments issued by corporates run the risk of down grading by the rating agencies and even default as the worst case. Securities issued by Central/State governments have lesser to zero probability of credit / default risk in view of the sovereign status of the issuer.
11. **Interest - Rate Risk:** Bonds / Government securities which are fixed income securities, run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The level of interest rates is determined by the rates at which government raises new money through RBI, the price levels at which the market is already dealing in existing securities, rate of inflation etc. The extent of fall or rise in the prices is a function of the prevailing coupon rate, number of days to maturity of a security and the increase or decrease in the level of interest rates. The prices of Bonds / Government securities are also influenced by the liquidity in the financial system and / or the open market operations (OMO) by RBI.

Pressure on exchange rate of the rupee may also affect security prices. Such rise and fall in price of bonds / government securities in the portfolio of the scheme may influence the NAVs under the scheme as and when such changes occur.

12. **Liquidity Risk:** The Indian debt market is such that a large percentage of the total traded volumes on particular days might be concentrated in a few securities. Traded volumes for particular securities differ significantly on a daily basis. Consequently, the scheme might have to incur a significant “impact cost” while transacting large volumes in a particular security.
13. **Reinvestment Risk:** This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the “interest on interest” component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
14. Money Market Securities are subject to the risk of an issuer’s inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.
15. **Risk factors associated with investing in Fixed Income Securities**
 - a. Different types of fixed income securities in which the Scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Investments in corporate debt carry a higher level of risk than investments in Government securities. Further even among corporate debt, AAA/P1+ rated instruments are comparatively less risky than AA/P1 rated instruments. Accordingly, the Scheme risk may increase or decrease depending upon its investment pattern.
 - b. The Net Asset Value (NAV) of the Scheme will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
 - c. Money market instruments, while fairly liquid, lack a well developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
 - d. As zero coupon securities do not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio. Zero coupon or deep discount bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the Issuer. The market prices of zero coupon securities are generally more volatile than the market prices of securities that pay interest periodically.
 - e. Apart from normal credit risk, zero coupon bonds carry an additional risk, unlike bonds that pay interest throughout the period to maturity, zero coupon instruments/deferred interest bonds typically would not realise any cash until maturity. If the issuer defaults, the Schemes may not obtain any return on its investment.
 - f. Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. Within the regulatory limits, the AMC may choose to invest in unlisted securities as permitted for investment by the scheme that offer attractive yields. This may however increase the risk of the portfolio.
 - g. While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges and may lead to the Scheme incurring losses till the security is finally sold.
 - h. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Units of the Scheme can go up or down because of various factors that affect the capital markets in general.
 - i. As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme. In view of the above, the Trustee has the right, in its sole discretion, to limit redemptions (including suspending redemptions) under certain circumstances, as described under 'Right to Limit

- Redemptions' in Section 'Special Considerations', if any, on the right to freely retain or dispose of units being offered'.
- j. At times, due to the forces and factors affecting the capital market, the Scheme may not be able to invest in securities falling within its investment objective resulting in holding the monies collected by it in cash or cash equivalent or invest the same in other permissible securities / investments amounting to substantial reduction in the earning capability of the Scheme.
 - k. Prepayment Risk: Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
 - l. Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Schemes are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
 - m. Performance of the Scheme may be affected by political, social, and economic developments, which may include changes in government policies, diplomatic conditions, and taxation policies.
 - n. Investments in money market instruments involve credit risk commensurate with short term rating of the issuers.
16. In the event of receipt of inordinately large number of redemption requests or a restructuring of a Schemes' portfolio, there may be delays in the redemption of units.
 17. Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly a scheme's risk may increase or decrease depending upon its investment pattern. For e.g. Corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.
 18. **Scheme specific risks factors**
 - a. **This being a Fund of Funds scheme, investors shall have to bear the expense ratio of the underlying scheme in addition to the expense ratio of the scheme.**
 - b. The Scheme's performance may depend upon the performance of the underlying scheme. Any change in the investment policies or the fundamental attributes of the underlying scheme could affect the performance of the Fund.
 - c. The liquidity of the scheme's investment may be restricted by trading volumes, transfer process & settlement periods. It may also be affected by the liquidity of the underlying ETF units. The liquidity for the Gold ETF units on the stock exchanges may be low and there might be an impact cost for liquidating the units on the exchanges.
 - d. However, Authorised Participants are appointed for the underlying ETF to ensure that the market price of units is nearer to the NAV of the underlying Gold ETF units.
 - e. The Portfolio disclosure of the Scheme will be limited to providing the particulars of the underlying ETF where the Scheme has invested and will not include the investments made by the underlying ETF.
 - f. The closing price of the units of ETFs on stock exchange shall be used for valuation by FoFs investing in such ETFs. In case the underlying Gold ETF is not traded on any particular business day then the NAV of the scheme shall be derived based on NAV of the underlying Gold ETF in accordance with valuation policy. Any delay in declaration of NAV of any particular underlying Gold ETF may result in delay of the computation of the NAV of the scheme.
 - g. The Fund will subscribe/redeem according to the value equivalent to unit creation size as applicable for the underlying scheme. When subscriptions/redemptions received are not adequate enough for transaction in creation unit size, the UTI Gold ETF Fund of Fund will buy/sell UTI Gold ETF Fund of Fund units directly on the stock exchange without waiting for additional subscription/redemption.
 - h. The scheme may invest in debt and money market instruments from time to time, as per the Asset Allocation pattern, which will have a different return profile compared to silver returns profile.
 - i. As UTI Gold ETF Fund of Fund is not actively managed, the underlying investments may be affected by a general decline in the domestic price of Gold and other instruments invested under the plan. UTI Gold ETF Fund of Fund invests in physical Gold regardless of their investment merit. The AMC does not attempt to take defensive positions in declining markets. Further, the fund manager does not make any judgment about the investment merit nor shall attempt to apply any economic, financial or market analysis.

- j. **Tracking Error and Tracking Difference:** Tracking error i.e. the annualised standard deviation of the difference in daily returns between physical Gold and the NAV of Gold ETF based on past one year rolling over data (For ETFs in existence for a period of less than one year, annualized standard deviation shall be calculated based on available data) shall not exceed 2%. The disclosure regarding the same shall be made on monthly basis on the website of the AMC. Tracking Error is always calculated against the 'Total Returns Index' which shows the returns on the Index portfolio, inclusive of IDCW.

Tracking error may have an impact on the performance of UTI Gold ETF Fund of Fund. The scheme's ability to achieve close correlation with the underlying benchmark may be impacted by factors including but not limited to:

- Buy/Sell transactions at different point of time during the trading session, which may not correspond to the closing price.
- Delay in purchase/sale of Gold due to:
 - Illiquidity of Gold.
 - Delay in realization of Sale proceeds.
 - Creation of a lot size to buy the required amount of Gold.
- Execution of large buy / sell orders.
- The potential for trades to fail, which may result in the Scheme not having acquired Gold at a price necessary to track the benchmark price.
- Holding of cash equivalents to meet redemptions, expenses, payouts of IDCW etc.
- Transaction cost (including taxes and insurance premium) and recurring expenses.
- Delay in realization of unit holder's funds.

In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any.

UTI Gold ETF, the underlying fund, shall disclose the tracking error based on past one year rolling data, on a daily basis, on the website of respective AMCs and AMFI.

19. Risk associated with investment in UTI Gold ETF

As the scheme will invest in UTI Gold ETF, the scheme will be subject to following risk factors associated with investment in the underlying scheme.

- a. The UTI Gold ETF is a passively managed scheme by providing exposure to Gold and tracking its performance and yield as closely as possible. The scheme performance may be affected by a general decline in the price of gold. The Scheme invests in the underlying asset viz. gold regardless of its investment merit.
- b. Investment decisions made by the AMC may not always be profitable.
- c. From time to time and subject to the Regulations, the Sponsors, the Mutual Funds and investment companies managed by them, their associate companies, subsidiaries of the Sponsors, and the AMC may invest either directly or indirectly in the Scheme. The funds managed by these associates, the Sponsors, subsidiaries of the Sponsors and /or the AMC may acquire a substantial portion of the scheme's units and collectively constitute a major investor in the scheme. Accordingly, redemption of units held by such funds, associates and Sponsors might have an adverse impact on the units of the scheme because the timing of such redemption may impact the ability of other unitholders to redeem their units.
- d. **Scheme Specific Risk Factors:**
 - i. **Market risk due to volatility in gold prices**
 The value of the Units relates directly to the value of the underlying gold held by the Scheme and fluctuations in the price of gold could adversely affect the investment value of the Units. The price of gold may fluctuate due to various factors such as: –
 - (i) Global gold supplies and demand, which is influenced by factors such as forward selling by gold producers, purchases made by gold producers to unwind gold hedge positions,

central bank purchases and sales, and productions and cost levels in major gold producing countries such as the South Africa, the United States, Australia and China.

- (ii) Investor's expectations with respect to the rate of inflation.
- (iii) Currency exchange rates.
- (iv) Interest rates
- (v) Investment and trading activities of commodity funds/hedge funds.
- (vi) Global or regional political, economic or financial events and situations.

In addition, there is no assurance that gold will maintain its long-term value in terms of purchasing power in the future. In the event that the price of gold declines, the value of investment in units in which the scheme has invested will, in general, decline proportionately.

- ii. The sale of gold by AMC to pay expenses will reduce the amount of gold represented by each unit on an ongoing basis irrespective of whether the trading price of the units rises or falls in response to changes in the price of gold.
- iii. The sale of the Scheme's gold to pay expenses at a time of low gold prices may adversely affect the value of the units.
- iv. There may be certain circumstances that may motivate large scale sales of gold which could decrease the price of gold and adversely affect an investment in the Units.
- v. There is no assurance that an active secondary market will develop or be maintained.
- vi. "UTI Gold ETF" is an Exchange Traded Fund. The concept of Exchange Traded Funds is relatively new to Indian capital markets. Trading in UTI Gold ETF could therefore be restricted due to which market price may or may not reflect the NAV of UTI Gold ETF at any point of time.
- vii. Trading of UTI Goldshare unit in the market(s) may be halted because of market conditions or for reasons that in view of SEBI or market authorities trading in UTI Goldshare' unit is not advisable. In addition trading in 'UTI Goldshare' unit is subject to trading halts caused by extraordinary market volatility and pursuant to SEBI and stock exchange(s) "circuit filter" rules. There can be no assurance that the requirements of the Market necessary to maintain the listing of 'UTI Goldshare' units will continue to be met or will remain unchanged.
- viii. UTI Goldshare units may trade at a premium / discount to the NAV due to demand/supply conditions in the market(s). Besides, any changes in the trading regulations by the Stock Exchanges or SEBI or other applicable regulations may affect the ability of the market participants to arbitrage resulting in wider premium/discount to NAV.
- ix. The Scheme's gold may be subject to loss, damage, theft or restriction on access. There is a risk that part or all of the Scheme's gold could be lost, damaged or stolen. Access to the Scheme's gold could also be restricted by natural events (such as earthquake) or human actions (such as terrorist attack). Any of these actions may adversely affect the operations of the scheme and consequently an investment in units.
- x. **Impact cost risk:** The scheme may have to bear the impact cost arising from purchase and sale of Gold either when the scheme accepts/gives cash or cash equivalents in lieu of Gold.

Impact costs are implicit costs also paid by liquidity demanders to liquidity providers. Generally, the best bid and ask prices quoted in the market are for only small transactions. Larger transactions may have to be executed at even less favorable prices. The additional cost is called an impact cost. For e.g. if the ruling market price of a security is `500/- one may be able to buy/sell small quantities for that price. But, if one wishes to buy/sell huge quantities he might have to pay /receive higher/lower price. The same principle applies for gold also.
- xi. Changes in indirect taxes like GST, custom duties for import, etc or any other levies will have an impact on the valuation of gold and consequently the NAV of the Scheme.

- xii. Redemption orders may be subject to postponement, suspension or rejection by the Trustee under certain circumstances.
 - xiii. Conversion of underlying gold to “UTI Goldshare” units may attract capital gains tax depending on the acquisition cost and holding period of Gold to the investor. Redemption of “UTI Gold ETF” by the AMC or sale of “UTI Gold ETF” on the Stock Exchange(s) may attract short or long term capital gain tax depending upon the holding period of the units. Moreover, converting “UTI Gold ETF” to Gold may also attract Wealth tax.
- e. **Liquidity risks in physical or derivative markets impairing the ability of the fund to buy and sell Gold**
 Commodities tend to be more volatile than other instruments. This may have an impact on liquidity. Liquidity considerations may have a price basis risk. Liquidity risks may arise due to issues related to the supply chain which affects the availability of Gold. During an undetermined situation, similar to what happened during the pandemic, transportation all over the world had come to a standstill. Financial markets had experienced extreme volatility and severe losses, and trading in many instruments had been disrupted. Liquidity for many instruments had been greatly reduced for periods of time, and most commodities were in short supply resulting in illiquid markets for most commodities including gold. The lack of liquidity in the physical market may also arise due to seasonality of demand and supply or volatility prices. Lastly, government regulations including change in taxation or duties levied on gold may affect the demand and supply and may affect the liquidity.
- f. **Risks associated with handling, storing and safekeeping of physical gold**
 All physical gold procured must follow the LBMA (London Bullion Market Association) guidelines as per prescribed SEBI guidelines.
- Risk arises when part or all of the gold held by the Scheme could be lost, stolen or damaged and access to gold may be restricted due to natural calamities or human actions, loss or damage directly or indirectly occasioned by, happening through or in consequence of war, invasion, acts of foreign enemies, hostilities (whether war be declared or not), civil war, rebellion, revolution, insurrection, military or usurped power. Loss due to aridity, humidity, exposure to light or extremes of temperature. Hence, the Custodian maintains insurance in regard to the business on terms and conditions and the custodian is also responsible for all costs arising from the insurance policies. The custodian taking delivery on behalf of the AMC needs to ensure the weight, purity, and the source of gold as specified under the LBMA guidelines.
20. **Debt and Money Market securities investments under the scheme will also be subject to the following risks:**
- a. **Interest Rate Risk / Reinvestment Risk:** Scheme would manage the interest rate risk & reinvestment risk by adequately matching the duration of assets in line with the duration of the scheme.
 - b. **Credit Risk:** Scheme would predominantly invest in highly rated securities where there is an internal credit comfort which would reduce the probability of credit risk.
 - c. **Concentration Risk:** The scheme would have modest presence of issuers with reasonable limits which would mitigate the credit concentration risk.
 - d. **Portfolio Risk:** By monitoring the return deviation and adequately managing all the above risks namely interest rate risk, reinvestment risk & credit cum concentration risk the scheme would mitigate the overall portfolio risk.
21. **Risk factors associated with Creation of Segregated Portfolio –**
- a. Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.
 - b. Security comprises of segregated portfolio may not realise any value.
 - c. Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.
22. **Risk factors associated with investment in Tri-Party Repo on Government Securities or treasury bill**

The mutual fund is a member of securities segment and Triparty Repo on Government Securities or treasury bill trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo on Government Securities or treasury bill trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL).

As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo on Government Securities or treasury bill trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

- **REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME**

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. RISK MITIGATION STRATEGIES:

The AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Risk indicators & internal limits are defined and judiciously monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigation measures.

II. INFORMATION ABOUT THE SCHEME:

A. WHERE WILL THE SCHEME INVEST – Detailed description of the instruments mentioned in Section I

1. Investment in Money Market Instruments:

Investment in money market instruments including Triparty Repo on Government Securities or treasury bill, Commercial Papers, Certificate of Deposits, BRDS, Treasury Bills, Repo, etc. will be made to meet the liquidity needs of the scheme.

2. Debt and Money market in India

(i) Debt Instrument Characteristics:

A Debt Instrument is basically an obligation which the borrower has to service periodically and generally has the following features:

Face Value	: Stated value of the paper / Principal Amount
Coupon	: Zero; fixed or floating
Frequency	: Semi-annual; annual, sometimes quarterly
Maturity	: Bullet, staggered
Redemption	: FV; premium or discount
Options	: Call/Put
Issue Price	: Par (FV) or premium or discount

A debt instrument comprises of a unique series of cash flows for each paper, terms of which are decided at the time of issue. Discounting these cash flows to the present value at various applicable discount rates (market rates) provides the market price.

(ii) Debt Market Structure:

The Indian Debt market comprises of the Money Market and the Long Term Debt Market.

Money market instruments have a tenor of less than one year while debt market instruments typically have a tenor of more than one year.

Money market instruments are Commercial Papers (CPs), Certificates of Deposit (CDs), Treasury bills (T-bills), Repos, Inter-bank Call money deposit, Triparty Repos on Government Securities or treasury bill etc. They are mostly discounted instruments that are issued at a discount to face value.

Long Term Debt market in India comprises mainly of two segments viz., the Government securities market and the corporate securities market.

Government securities includes central, state and local issues. The main instruments in this market are Dated securities (Fixed or Floating) and Treasury bills (Discounted Papers) The Central Government securities are generally issued through auctions on the basis of 'Uniform price' method or 'Multiple price' method while State Govt. are through on-tap sales.

Corporate debt segment on the other hand includes bonds/debentures issued by private corporates, public sector units (PSUs) and development financial institutions (DFIs). The debentures are rated by a rating agency and based on the feedback from the market, the issue is priced accordingly. The bonds issued may be fixed or floating. The floating rate debt market has emerged as an active market in the rising interest rate scenario. Benchmarks range from Overnight rates or Treasury benchmarks.

(iii) Regulators: The RBI operates both as the monetary authority and the debt manager to the government. In its role as a monetary authority, the RBI participates in the market through open-market operations as well as through Liquidity Adjustment facility (LAF) to regulate the money supply. It also regulates the bank rate and repo rate, and uses these rates as indirect tools for its monetary policy. The RBI as the debt manager issues the securities at the cheapest possible rate. The SEBI regulates the debt instruments listed on the stock exchanges.

(iv) Market Participants:

Given the large size of the trades, the debt market has remained predominantly a wholesale market.

Primary Dealers

Primary dealers (PDs) act as underwriters in the primary market, and as market makers in the secondary market.

Brokers

Brokers bring together counterparties and negotiate terms of the trade.

Investors

Banks, Insurance Companies, Mutual Funds are important players in the debt market. Other players are Trusts, Provident and pension funds.

(v) Types of Security Issuances and Eligible Investors

Issuer	Instruments	Indicative Yields % (as on 31.03.2025)	Maturity	Investors
Central Government	Dated Securities	6.39-6.95 (Semi)	1-30 years	Banks, Insurance Co, PFs, MFs, PDs, Individuals, FPI
Central Government	T-Bills	6.40-6.30	364/91 days	Banks, Insurance Co, PFs, MFs, PDs, Individuals, FPI

Banks	Infra Bonds	7.10-7.25	10 years	Banks, Companies, MFs, PDs, Individuals

(vi) Trading Mechanism

Government Securities and Money Market Instruments

Currently, G-Sec trades are predominantly routed through NDS-OM which is a screen based anonymous order matching systems for secondary market trading in Government Securities owned by RBI. Corporate Debt is basically a phone driven market where deals are concluded verbally over recorded lines. The reporting of trade is done on the NSE Wholesale Debt Market segment.

B. WHAT ARE THE INVESTMENT RESTRICTIONS?

Subject to SEBI (MFs) Regulations, guidelines on investment from time to time:

(a) Investment in Listed Debt instruments the provision no.12.1 under Chapter 12 of SEBI Master Circular for Mutual Funds

- Mutual fund scheme shall not invest in unlisted debt instruments including commercial papers (CPs), other than (a) government securities, (b) other money market instruments and (c) derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc. which are used by mutual funds for hedging.
- For the purpose of the provisions of paragraph (c), listed debt instruments shall include listed and to be listed debt instruments.

Details under Foreign Account Tax Compliance provisions (commonly known as FATCA) / Foreign Tax Laws and Common Reporting Standard (CRS)	FATCA is United States (US) Federal Law, aimed at prevention of tax evasion by US citizens and residents ("US persons" as defined in the applicable extant laws of the United States of America) through use of offshore accounts. FATCA provisions are part of Hiring Incentives to Restore Employment (HIRE) Act, enacted by US Legislature. Under FATCA, withholding tax may be levied on certain US source income/receipt of the Schemes of the Mutual Fund, unless they are FATCA compliant. FATCA obligates foreign financial institutions (FFIs), including Indian financial institutions to provide the US Internal Revenue Service (IRS) with information and to report on the accounts held by specified US Persons as well as passive NFFEs in which controlling interest is held by specified US person. The term FFI is defined widely to cover a large number of non-US based financial service providers, such as mutual funds, depository participants, brokers, custodians, as well as banks. FATCA requires enhanced due diligence processes by the FFI so as to identify US reportable accounts.

	The identification of US person will be based on one or more of following “US indicia”- • Identification of the Account Holder as a US citizen or resident; • Unambiguous indication of a US place of birth; • Current US mailing or residence address (including a US post office box); • Current US telephone number; • Standing instructions to transfer funds to an account maintained in USA; • Current effective power of attorney or signing authority granted to a person with a US address; or • An “in-care of” or “hold mail” address that is the sole address that the Indian Financial Institution has on the file for the Account Holder. FATCA due diligence will be applicable to each unit holder (including joint holders) irrespective of the country of residence/citizenship, and on being identified as reportable person/specified US person, all folios/accounts will be reported. Such information may include (not limited to) their identity, direct or indirect beneficiaries, beneficial owners and controlling persons. Unit holders will therefore be required to comply with the request of the AMC / Fund to furnish such information as and when deemed necessary by the AMC / Fund in accordance with the Applicable Laws. FATCA provisions are relevant not only at on-boarding stage of unit holders but also throughout the life cycle of investment with the Mutual Fund. Unit holders therefore should immediately intimate to the Fund/the AMC, any change in their status with respect to FATCA related declaration provided by them previously. In case unit holder / investor fails to furnish the relevant information and/or documentation in accordance with the Applicable Laws, the AMC / Fund reserves the right to reject the application or redeem the units held directly or beneficially and may also require reporting of such accounts/levy of withholding tax on payments made to investors. Prospective investors / Unit holders should consult their own advisors to understand the implications of FATCA provisions/requirements. The AMC reserves the right to change/modify the provisions mentioned at a later date. Common Reporting Standard (CRS) – The New Global Standard for Automatic Exchange of Information On similar lines as FATCA, the Organisation of Economic Development (OECD), along with the G20 countries, of which India is a member, has released a “Standard for Automatic Exchange of Financial Account Information in Tax Matters”, in order to combat the problem of offshore tax evasion and avoidance and stashing of unaccounted money abroad, requiring cooperation amongst tax authorities. The G20 and OECD countries have together developed a Common Reporting Standard (CRS) on Automatic Exchange of Information (AEOI). All Applicants whose country of tax residence is not India shall fill in the prescribed FATCA & CRS Form. AMC reserves right to reject the application in case the applicant / investor fails to submit information /documentation for any of the above. Please refer to Instructions given in the FATCA/CRS Form before filling in the particulars and for further details relating to FATCA/CRS, refer to SEBI Circular Nos. CIR/MIRSD/2/2015 dated 26th August 2015 & CIR/MIRSD/3 /2015 dated 10th September 2015 and guidelines /circulars issued by SEBI from time to time.
