A. **Risk Factors:**

Standard Risk Factors:

- Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Schemes invest fluctuates, the value of your investment in the Scheme may go up or down.
- The NAVs of the Scheme may be affected by changes in the general market conditions, factors and forces affecting capital market, in particular, level of interest rates, various markets related factors and trading volumes, settlement periods and transfer procedures.
- Past performance of the Sponsors/AMC/Mutual Fund and their associates does not guarantee the future performance of the Schemes.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or their future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the contribution of an amount of Rs. 22.2 lacs collectively made by them towards setting up the Fund and such other accretions and additions to the corpus set up by the Sponsors.
- The Scheme is not a guaranteed or assured return Scheme.
- All Mutual Funds and securities investments are subject to market risks and there can be no assurance or guarantee that the objectives of the Scheme(s) will be achieved.
- As the liquidity of the Schemes' investments could at times, be restricted by trading volumes and settlement periods, the time taken by the Schemes for redemption of units may be significant or may also result in delays in redemption of the units, in the event of an inordinately large number of redemption requests or of a restructuring of the Schemes' portfolio. In view of this the Trustee has the right, at their sole discretion to limit redemptions (including suspending redemption) under certain circumstances, as described under the section titled "Right to limit Redemptions".
- The NAV of the Scheme can go up or down depending on the factors and forces affecting the securities markets.
- The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.
- Investors in the Scheme are not being offered any guaranteed/indicated returns.
- Mutual Funds being vehicles of securities investments are subject to market and other risk and there can be no guarantee against loss resulting from investing in the Scheme. The various factors which impact the value of the Scheme investments include but are not limited to fluctuations in the equity and bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of securities, tax laws, liquidity of the underlying instruments, settlements periods, trading volumes etc. and there is no assurance or guarantee that the objectives of the Scheme will be achieved.
- Different types of securities in which the Scheme would invest as given in the Scheme information document carry different levels and types of risk. Accordingly, the Schemes' risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities.
- Investors may note that AMC/Fund Manager's investment decisions may not be always profitable as the actual market movement may be at variance with the anticipated trend. The Schemes proposes to invest substantially in equity and equity related securities. The Schemes will, to a lesser extent, also invest in debt and money market instruments. The inability of the Schemes to make intended securities purchases due to

settlement problems could cause the Schemes to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the Schemes' portfolio due to the absence of a well developed and liquid secondary market for debt securities would result, at times, in potential losses to the Schemes, in case of a subsequent decline in the value of securities held in the Schemes' portfolio.

- The Scheme may invest in ADRs/GDRs, equity of overseas companies listed on recognized stock exchanges overseas and other securities in accordance with the provisions of SEBI Circular No. SEBI/IMD/CIR No. 7/104753/07 dated September 26, 2007 and SEBI/IMD/CIR No. 122577/08 dated April 8, 2008 and SEBI/HO/IMD/DF3/CIR/P/2020/225 dated November 5, 2020, and SEBI circular no. SEBI/HO/IMD/IMD-II/DOF3/P/CIR/2021/571 dated June 03, 2021 subject to a maximum of US\$ 1 billion per mutual fund. Aggregate ceiling for investment by Mutual Funds in overseas Exchange Traded Fund (ETF(s)) that invest in securities is US \$ 300 million per Mutual Fund. However, in case the overall industry limit of US\$ 7 billion or such other limit as prescribed by SEBI has been breached, the Scheme would temporarily not invest in the overseas securities. Further, for investment in overseas ETFs overall industry limit of US\$ 1 billion shall be considered. Liquidity risk - In case of abnormal circumstances it will be difficult to complete the square off transaction due to liquidity being poor in stock futures/spot market. However, the Schemes will aim at taking exposure into relatively liquid stocks where there may be minimal risk to square off the transaction.
- The AMC may, considering the overall level of risk of the portfolio, invest in lower rated/unrated securities offering higher yields. This may increase the risk of the portfolio.
- Two-Factor Authentication and Third – Party Payments will be carried out in line with SEBI Circulars dated October 4, 2021, March 15, 2022 and any further clarifications received by AMFI and SEBI in this regard. In case of unsuccessful Two-Factor Authentication the redemption request might get rejected.
- **Infectious Illness Risk:** An outbreak of an infectious respiratory illness, COVID 19, caused by a novel coronavirus has resulted in travel restrictions, disruption of healthcare systems, prolonged quarantines, cancellations, supply chain disruptions, lower consumer demand, layoffs, ratings downgrades, defaults and other significant economic impacts. Certain markets have experienced temporary closures, extreme volatility, severe losses, reduced liquidity and increased trading costs. Such events can have an impact on the underlying Schemes and could impact their ability to purchase or sell securities or cause elevated tracking error and increased premiums or discounts to the NAV. Other infectious illness outbreaks in the future may result in similar impacts.
- **Taxation Risks –** Investment in Foreign Securities poses additional challenges based on the tax laws of each respective country or Jurisdiction. The scheme may be subject to a higher level of taxes than originally anticipated and or dual taxation. The Scheme may be subject to withholding or other taxes on income and/or gains arising from its investment portfolio. Further, such investments are exposed to risks associated with the changing / evolving tax / regulatory regimes of all the countries where the Scheme invests. All these may entail a higher outgo to the Scheme by way of taxes, transaction costs, fees etc. thus adversely impacting its NAV; resulting in lower returns to an Investor.
- **Country Risks –** Country risk refers to the uncertainty associated with investing in a particular country which could lead to losses for investors and may arise due to the inability of a country, to meet its financial obligations. It is the risk encompassing economic, social and political conditions in a country, which might adversely affect foreign investors' financial interests. In addition, country risks would inter alia include

events such as, introduction of extraordinary exchange controls, sanctions by countries and /or organizations, economic deterioration, bi-lateral conflict leading to immobilisation of the overseas financial assets and the prevalent tax laws of the respective jurisdiction for execution of trades or otherwise.

Scheme Specific Risk Factors:

➤ Risk associated with investments in Equities –

1. The value of the Schemes' investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Schemes may fluctuate and can go up or down.
2. Investors may note that AMC/Fund Manager's investment decisions may not be always profitable, as actual market movements may be at variance with anticipated trends. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of the financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Schemes to make intended securities purchases due to settlement problems could cause the Schemes to miss certain investment opportunities.
3. Investors may note that IDCW is due only when declared and there is no assurance that a company (even though it may have a track record of payment of IDCW in the past) may continue paying IDCW in future. As such, the schemes are vulnerable to instances where investments in securities may not earn IDCW or where lesser IDCW is declared by a company in subsequent years in which investments are made by schemes. As the profitability of companies are likely to vary and have a material bearing on their ability to declare and pay IDCW, the performance of the schemes may be adversely affected due to such factors.
4. Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk.
5. While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. The liquidity of the Schemes' investments is inherently restricted by trading volumes in the securities in which it invests.
6. Fund manager endeavours to generate returns based on certain past statistical trend. The performance of the schemes may get affected if there is a change in the said trend. There can be no assurance that such historical trends will continue.
7. In case of abnormal circumstances, it will be difficult to complete the square off transaction due to liquidity being poor in stock futures/spot market. However, fund will aim at taking exposure only into liquid stocks where there will be minimal risk to square off the transaction. The Schemes investing in foreign securities will be exposed to settlement risk, as different countries have different settlement periods.

8. Changes in Government policy in general and changes in tax benefits applicable to mutual funds may impact the returns to investors in the Schemes or business prospects of the Company in any particular sector.

➤ **Risk associated with Fixed Income Securities:**

- **Market Risk/Interest Rate Risk:** The Net Asset Value (NAV) of the Scheme(s), to the extent invested in Debt and Money Market securities, will be affected by changes in the general level of interest rates. The NAV of the Scheme(s) is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- **Liquidity Risk:** The liquidity of a security may change depending on market conditions leading to changes in the liquidity premium linked to the price of the security. At the time of selling the security, the security can become illiquid leading to loss in the value of the portfolio.
- **Credit Risk:** Investments in fixed income Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.
- **Price Risk:** Government securities where a fixed return is offered run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. The new level of interest rate is determined by the rates at which government raises new money and/or the price levels at which the market is already dealing in existing securities. The price-risk is not unique to Government Securities. It exists for all fixed income securities. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system.
- **Settlement risk:** The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the Schemes' portfolio due to the extraneous factors that may impact liquidity would result, at times, in potential losses to the Plan, in case of a subsequent decline in the value of securities held in the Schemes' portfolio
- **Regulatory Risk:** Changes in government policy in general and changes in tax benefits applicable to Mutual Funds may impact the returns to investors in the Scheme.
- **Reinvestment Risk:** This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- **Risks associated with investment in unlisted securities:** Except for any security of an associate or group company, the scheme can invest in securities which are not listed on a stock exchange ("unlisted Securities") which in general are subject to greater price

fluctuations, less liquidity and greater risk than those which are traded in the open market. Unlisted securities may lack a liquid secondary market and there can be no assurance that the Scheme will realise their investments in unlisted securities at a fair value.

- Different types of fixed income securities in which the Scheme(s) would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the Scheme(s) risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher level of risk than Government securities.
- The AMC may, considering the overall level of risk of the portfolio, invest in lower rated securities offering higher yields as well as zero coupon securities that offer attractive yields. This may increase the absolute level of risk of the portfolio.
- As zero coupon securities does not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio.
- The Scheme(s) at times may receive large number of redemption requests, leading to an asset-liability mismatch and therefore, requiring the investment manager to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments.

3

➤ **Risks associated with Investing in Foreign Securities - ADRs/GDRs/other overseas investments:**

It is AMC's belief that the investment in ADRs/GDRs/overseas securities offers new investment and portfolio diversification opportunities into multi-market and multi-currency products. However, such investments also entail additional risks. Such investment opportunities may be pursued by the AMC provided they are considered appropriate in terms of the overall investment objectives of the Schemes. To manage risks associated with foreign currency and interest rate exposure, the Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI/RBI from time to time.

To the extent that the assets of the Schemes will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by the changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital also may be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of the other restrictions on investment.

Offshore investments will be made subject to any/all approvals, conditions thereof as may be stipulated by SEBI/RBI and provided such investments do not result in expenses to the Fund in excess of the ceiling on expenses prescribed by and consistent with costs and expenses attendant to international investing. The Fund may, where necessary, appoint other intermediaries of repute as advisors, custodian/sub-custodians etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceilings of

expenses. The fees and expenses would illustratively include, besides the investment management fees, custody fees and costs, fees of appointed advisors and sub-managers, transaction costs, and overseas regulatory costs.

Investors are requested to note that Cost associated with overseas investment like advisory series (other than those expenses permissible under regulation 52 of SEBI regulations) would not be borne by the scheme.

➤ **Risks associated with Investing in Derivatives:**

The Scheme will not invest in derivatives.

➤ **Risks associated with investing in Securitised Debt**

The Scheme will not invest in Securitised Debt

➤ **Risks associated with Short Selling and Securities Lending & Borrowing (SLB)**

The Scheme will not invest in Short Selling and Securities Lending

➤ **Risks associated with investing in Tri Party Repo through CCIL (TREPS):**

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments.

CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the "Default Waterfall".

As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members.

Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

However, it may be noted that a member shall have the right to submit resignation from the membership of the Security segment if it has taken a loss through replenishment of its contribution to the default fund for the segments and a loss threshold as notified have been reached. The maximum contribution of a member towards replenishment of its contribution to the default fund in the 7 days (30 days in case of securities segment) period immediately after the afore-mentioned loss threshold having been reached shall not exceed 5 times of its contribution to the Default Fund based on the last re-computation of the Default Fund or specified amount, whichever is lower.

Further, it may be noted that, CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

Apart from the risk factors mentioned above, the scheme is exposed to certain specific risks, which are as mentioned below –

To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee (if Indian Rupee appreciates against these foreign currencies).

The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment. The Scheme may have to pay applicable taxes on gains from such investment. As regards foreign securities that are traded on exchanges that are not located in India, the NAV will be calculated based on the closing price of the foreign security and the prevailing exchange rate on that date. The Scheme's NAV may also be affected by a fluctuation in the general and specific level of interest rates internationally, or the change in the credit profiles of the issuers.

Risk factors for US Bluechip Equity Fund related to Taxation

1. Investment in listed equity

(i) Capital Gains

Under Section 865(a)(2) of the Internal Revenue Code (the Code) of the U.S., income from the sale of personal property by a non-U.S. resident is sourced outside of the U.S., and thus generally should not be subject to U.S. federal income tax.

In addition, under Section 864(b)(2)(A), trading in stock or securities is generally not considered a U.S. trade or business, except when the taxpayer is a dealer in stocks or securities and effects the trades through U.S. offices directly or through the U.S. office of its agent other than an independent agent (Trading Safe Harbor).

However if the Scheme invests in any entities that are treated as partnership for U.S. federal income tax purposes and if these partnerships are engaged in a U.S. trade or business, then the Scheme itself would be treated as engaged in such a U.S. trade or business, would likely be required to file a U.S. income tax return and potentially pay U.S. tax on its distributive share of partnership income, and may be subject to tax and to potential withholding with respect to sales of an interest in such partnership.

Moreover, Section 897(a) may treat gain derived by a non-U.S. resident from the disposition of a U.S. Real Property Interest (USRPI) as income that is effectively connected with the conduct of a U.S. trade or business and thus subject such gain to U.S. federal income tax (and to a requirement to file a U.S. income tax return) Shares of a U.S. Real Property Holding Corporation (USRPHC), i.e. a company that owns substantial U.S. real estate, would generally be treated as USRPI. Likewise an interest in a publicly traded partnership (PTP) that holds substantial U.S. real estate would generally be treated as a USRPI.

Nonetheless, the definition of USRPI excludes stock of a U.S. corporation that is regularly traded on an established securities market, but such exclusion only applies if the stock is held by a person who, during the 5 - year look-back period, did not actually or constructively own more than 5% of that class of stock. The USPRI exclusion for publicly traded stock for holders of 5% or less of such stock is increased to 10% solely in the case of a publicly traded real estate investment trust (REIT). Moreover, the exclusion would apply for a non-resident holding not more than a 5% interest in a PTP that is also a USPRI.

As the Scheme should not be considered as having a U.S. trade or business by reasons of its investment activities (provided that it does not invest in partnerships that are engaged in a U.S. trade or business), capital gains derived by the Scheme from the sale of listed U.S. equity should not be subject to tax in the U.S. provided the Scheme holds an interest of 5% or less of any class of stock or 10% in case of a publicly traded REIT and 5% or less of a PTP that is also USPRI.

In case where the Scheme held, at some time within the 5-year period ending on the date of disposition, more than 5% of the shares of a publicly-traded company that is also a USRPHC 10% or more of a publicly traded REIT, or more than 5% of a PTP that is also a USPRI, gain from disposition of such interest is subject to U.S. corporate net income tax at a rate of 21%.

The AMC shall endeavor that the Scheme's exposure in a publicly-traded company that is also a USRPHC shall not exceed 5% or in case of a publicly traded REIT, shall not exceed 10%, or in the case of a partnership interest in a PTP that would be considered a USPRI, shall not exceed 5%, so that the capital gains received by the Scheme are not subject to tax in U.S.

It should be noted that Section 864(c)(8) provides that where a partnership, including a PTP, is engaged in a U.S. trade or business, if a non-U.S. partner disposes of the partnership interest, a portion of gain or loss is treated as connected with the conduct of a U.S. trade or business, and is therefore subject to U.S. tax. Such income also generates a requirement to file a U.S. tax return. Unlike the rules for PTPs that are USPRI, this provision is not subject to a 5% exception. In addition, Section 1446(f) imposes a requirement that when a non-U.S. partner disposes of an interest in such a partnership, the purchaser withholds 10% of the purchase price (as a prepayment of the ultimate tax liability). The IRS has suspended the withholding requirement with respect to interests in PTPs until such time as it finalizes regulations. As proposed regulations were issued in May 2019, it can be expected that these regulations may be finalized and the withholding may take effect as early as the second half of 2019. Note that while the withholding requirement for PTP interests has been suspended, the requirement to file a return and pay tax has not.

(ii) Dividend income

Under Section 881(a)(1) of the Code, dividend income received by a foreign corporation from sources within the U.S. is subject to a 30% withholding tax. Thus U.S. source dividends received by the Scheme from investment in U.S. listed equities shall be subject to withholding tax of 30%.

2. Investment in U.S Treasury bills, notes or bonds

(i) Capital Gains

Under Section 865(a)(2) of the Code, income from the sale of personal property by a non-U.S. resident is sourced outside of the U.S. Thus, capital gains derived by the Scheme from the sale of U.S Treasury bills, notes or bonds shall not be subject to tax in the U.S.

(ii) Interest income

Under Section 881(a)(1)(A) of the Code, interest income received by a foreign corporation from sources within the U.S. is subject to a 30% withholding tax. Hence, interest income received by the Scheme shall generally be subject to withholding tax of 30%.

However, Section 881(c) provides that in the case of any portfolio interest received by a foreign corporation from sources within the U.S., no tax shall be imposed under Section 881(a)(1).

Portfolio interest generally means any interest which is paid on an obligation which is in registered form and with respect to which the person who would otherwise be the withholding agent receives a statement from the beneficial owner or a securities clearing organization, bank or other financial institution that holds customers' securities in the ordinary course of business that the beneficial owner of the obligation is not a U.S. person. Certain additional requirements may apply. Nonetheless, U.S. Treasury bills, notes and bonds are generally expected to qualify for the portfolio interest exemption.

Further, as the Scheme shall be primarily investing in securities of companies that are listed on the NYSE and / or NASDAQ, the Scheme shall not be classified as "Equity Oriented Fund" as per the provisions mentioned in the Income Tax Act, 1961. Hence the tax provisions as applicable to other than Equity Oriented Fund shall be applicable to the unitholders of the Scheme in India.

3. Investment in U.S. Based Mutual Fund

(i) Capital Gains

As already noted, under Code Section 865(a)(2), income from the sale of personal property by a non-U.S. resident is sourced outside of the U.S. Thus, generally capital gains derived by a non-U.S. investor from the sale of an investment in a U.S. based mutual fund should not be subject to tax in the U.S. However, if the mutual fund that is sold is a USRPHC, then the gain is considered to be effectively connected with a U.S. trade or business and thus subject to U.S. net taxation, unless the mutual fund whose shares are sold is (a) publicly traded and the investor held an interest of 5% or less in the mutual fund at all times during the year preceding the sale or (b) the mutual fund is a domestically controlled qualified investment entity.

(ii) Income distributions from U.S. mutual funds

Generally, under Code Section 881(a)(1)(A), dividend income received by a foreign corporation from sources within the U.S. is subject to 30% withholding tax. A mutual fund that is not subject to the USRPHC - related rules described above may distribute ordinary dividends which should be subject to 30% withholding tax. Dividends designated by a RIC (e.g. a mutual fund) as capital gain dividends are treated as long term capital gains in the hands of the shareholders. Except as described above for mutual funds that otherwise qualify as USRPHCs, because long-term capital gains are sourced to the domicile of the recipient, such capital gain dividends should not be U.S. source if the recipient is a non-U.S. person, and thus would not be subject to U.S. taxation.

Until recently, Code Section 881(e)(1) excluded interest-related dividends received from a RIC (Regulated Investment Company) from the tax imposed by Code Section 881(a)(1). Under Code Section 881(e)(2), short-term capital gain dividends received from a RIC were

also excluded from the tax imposed by Section 881(a)(1). However, unless they are retroactively extended, the provisions of Code Section 881(e)(1) and (2) are no longer effective for dividends paid as of January 1, 2015. A RIC will designate by written notice mailed to its shareholders whether a dividend (or part thereof) is a capital gain dividend, or, with respect to prior years, an interest related dividend or a short term capital gain dividend.

Notwithstanding the foregoing, under Code Section 897(h)(1), any distribution to a foreign person or other qualified investment entity by a qualified investment entity to the extent attributable to gain from sales or exchanges by the qualified investment entity of USRPIs, is treated as gain from the sale or exchange of a USRPI by the foreign person unless such distribution is with respect to stock that is publicly traded on a U.S exchange and the foreign person did not own more than 5% (or in the case of a REIT, no more than 10%) of such class of stock at any time during the 1 year period ending on the date of distribution. Where the distribution is treated as gain from the sale or exchange of a USRPI, the distribution is treated as income effectively connected to a U.S trade or business, subject to tax at U.S corporate tax rates and withheld on at a rate of 21% of the distribution. The total amount in tax paid should not exceed the liability as determined by applying the U.S corporate rate.

In addition, where distributions from the mutual fund are characterized as gain from the sale of a USRPI due to Code Section 897(h) discussed above, the income is considered effectively connected with the conduct of a U.S trade or business such that the branch profits tax provisions must be considered. Under Code Section 884(a), dividend equivalent amounts are subject to tax at a rate of 30%. The dividend equivalent amount is equal to a foreign corporation's effectively connected earnings and profits as determined under Code Section 884(b). Code Section 884(d)(2)(C) excludes gain on the disposition of an interest in a USRPHC from the definition of effectively connected earnings and profits. Thus where Code Section 897(h) applies to treat a dividend distribution as the sale of a USRPI and subject it to withholding, there is branch profits tax as well unless the distribution/gain is related to the sale of USRPHC shares by the qualified investment entity.

For detailed tax benefits, investors are requested to refer para on "Tax benefits of investing in Mutual Fund" as mentioned in the Statement of Additional Information.

RISK MANAGEMENT STRATEGIES

The Scheme by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in equity and debt markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Scheme has identified following risks of investing in equity and debt securities and designed risk management strategies, which are embedded in the investment process to manage such risks.

<u>Risks associated with Equity investments</u>	
<u>Concentration Risk and Market Risk</u>	
Concentration risk represents the probability of loss arising from heavily lopsided exposure to a particular group of sectors or securities. The scheme is	The Scheme will try and mitigate this risk by investing across large number of companies/sectors and endeavor to keep stock-specific concentration risk relatively low.

vulnerable to movements in the prices of securities invested by the scheme, which could have a material bearing on the overall returns from the scheme.	
<u>Liquidity risk</u> The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.	As such the liquidity of stocks that the fund invests into could be relatively low. The fund may try to maintain a proper asset-liability match to ensure redemption / Maturity payments are made on time and not affected by illiquidity of the underlying stocks.
<u>Currency Risk</u> The Scheme will invest in foreign securities as permitted by the concerned regulatory authorities in India. Since the assets will be invested in securities denominated in foreign currency, the INR equivalent of the net assets, distributions and income may be adversely affected by changes / fluctuations in the value of the foreign currencies relative to the INR.	The scheme subject to applicable regulations shall have the option to enter into forward contracts for the purposes of hedging against the foreign exchange fluctuations. The Schemes may employ various measures (as permitted by SEBI/RBI) including but not restricted to currency hedging (such as currency options and forward currency exchange contracts, currency futures, written call options and purchased put options on currencies and currency swaps), to manage foreign exchange movements arising out of investment in foreign securities. All currency derivatives trade, if any will be done only through the stock exchange platform.

<u>Risks associated with Debt investment</u>	
<u>Market Risk/ Interest Rate Risk</u> As with all debt securities, changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.	In a rising interest rates scenario the scheme may increase its investment in money market securities whereas if the interest rates are expected to fall the allocation to debt securities with longer maturity may be increased thereby mitigating risk to that extent.
<u>Liquidity or Marketability Risk</u> This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM).	The Scheme may invest in government securities, corporate bonds and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be

	high in case of medium to long maturity corporate bonds. The Schemes will however, endeavor to minimize liquidity risk by investing in securities having a relatively liquid market.
<u>Credit Risk</u> Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security).	Management analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken.
<u>Reinvestment Risk</u> This risk refers to the interest rate levels at which cash flows received from the securities in the Schemes are reinvested. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.	Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.
<u>Currency Risk</u> The Scheme will invest in foreign securities as permitted by the concerned regulatory authorities in India. Since the assets will be invested in securities denominated in foreign currency, the INR equivalent of the net assets, distributions and income may be adversely affected by changes / fluctuations in the value of the foreign currencies relative to the INR.	The scheme subject to applicable regulations, shall have the option to enter into forward contracts for the purposes of hedging against the foreign exchange fluctuations. The Scheme may employ various measures (as permitted by SEBI/RBI) including but not restricted to currency hedging (such as currency options and forward currency exchange contracts, currency futures, written call options and purchased put options on currencies and currency swaps), to manage foreign exchange movements arising out of investment in foreign securities. All currency derivatives trade, if any will be done only through the stock exchange platform.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Schemes. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(C) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the

rule shall be given 15 days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable NAV on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

Therefore, the schemes falling under the same level of risk in the Riskometer may not be similar in nature. Investors are advised before investing to evaluate a Scheme not only on the basis of the Product labeling (including the Riskometer) but also on other quantitative and qualitative factors such as performance, portfolio, fund managers, strategy, asset allocation, investment objective etc. and shall seek appropriate advice, if they are unsure about the suitability of the Scheme before investing. As per SEBI Guidelines, Riskometers shall be reviewed on a monthly basis based on evaluation of risk level of Scheme's month end portfolios. POSITION OF EQUITY MARKET IN INDIA

The Indian stock market is one of the world's largest stock markets on the basis of investor base and has a collective pool of about 27 million investor accounts.

There are two leading stock exchanges in India, i.e. BSE Limited (BSE) and National Stock Exchange of India Limited (NSE). BSE was established in 1875 and is the oldest stock exchange in Asia. NSE, a more recent establishment which came into existence in 1992, is the largest and most advanced stock market in India and is also one of the biggest stock exchanges in Asia in terms of transactions. NSE's flagship index, NIFTY 50, is used extensively by investors in India and around the world to take exposure to the Indian equities market.

BSE has a large number of scrips which are listed. The Indian stock market scene really picked up after the opening up of the economy in the early nineties. NSE changed the way the Indian markets function, in the early nineties, by replacing floor based trading with nationwide screen based electronic trading, which took trading to the doorstep of the investor. NSE was mainly set up to bring in transparency in the markets. Instead of trading membership being confined to a group of brokers, NSE ensured that anyone who was qualified, experienced and met minimum financial requirements was allowed to trade. The price information which could earlier be accessed only by a handful of people could now be seen by a client in a remote location with the same ease. The paper based settlement was replaced by electronic depository based accounts and settlement of trades was always done on time. One of the most critical changes was that a robust risk management system was set in place, so that settlement guarantees could protect investors against broker defaults. The corporate governance rules were gradually put in place which initiated the process of bringing the listed companies at a uniform level.

POSITION OF DEBT MARKET IN INDIA

Indian debt markets, in the early nineties, were characterised by controls on pricing of assets, segmentation of markets and barriers to entry, low levels of liquidity, limited number

of players, near lack of transparency, and high transactions cost. Financial reforms have significantly changed the Indian debt markets for the better. Most debt instruments are now priced freely on the markets; trading mechanisms have been altered to provide for higher levels of transparency, higher liquidity, and lower transactions costs; new participants have entered the markets, broad basing the types of players in the markets; methods of security issuance, and innovation in the structure of instruments have taken place; and there has been a significant improvement in the dissemination of market information. There are three main segments in the debt markets in India, viz., Government Securities, Public Sector Units (PSU) bonds, and corporate securities. A bulk of the debt market consists of Government Securities. Other instruments available currently include Corporate Debentures, Bonds issued by Financial Institutions, Commercial Paper, Certificates of Deposits and Securitized Debt. Securities in the Debt market typically vary based on their tenure and rating. Government Securities have tenures from one year to thirty years whereas the maturity period of the Corporate Debt now goes upto sixty years and more (perpetual). Perpetual bonds are now issued by banks as well. Securities may be both listed and unlisted and there is increasing trend of securities of maturities of over one year being listed by issuers.

The yields and liquidity on various securities as on March 31, 2023 are as under:

Issuer	Instrument	Maturity	Yields (%)	Liquidity
GOI	Treasury Bill	91 Days	6.83%	High
GOI	Treasury Bill	364 Days	7.18%	High
GOI	Short Dated	1-3 Years	7.14% - 7.16%	High
GOI	Medium Dated	3-5 Years	7.16% - 7.19%	High
GOI	Long Dated	5-10 Years	7.19% - 7.31%	High

Portfolio Turnover

Portfolio turnover is defined as the lower of purchases and sales after reducing all subscriptions and redemptions and derivative transactions there from and calculated as a percentage of the average assets under management of the Scheme during a specified period of time.

The AMC's portfolio management style is conducive to a low portfolio turnover rate. However, the AMC will take advantage of the opportunities that present themselves from time to time because of the inefficiencies in the securities markets. The AMC will endeavour to balance the increased cost on account of higher portfolio turnover with the benefits derived there from.

SECTION III: UNITS AND OFFER

This section provides details you need to know for investing in the Scheme.

A. NEW FUND OFFER DETAILS – Not Applicable

This section does not apply to the schemes covered in this SID, as the ongoing offer of the Schemes has commenced after the NFO period, and the units are available for continuous subscription and redemption.

B. ONGOING OFFER DETAILS

Ongoing Offer Period This is the date from which the Scheme will reopen for subscriptions/redemptions after the closure of the NFO period.	The Scheme is an open ended scheme and hence is available for subscription and redemption on an ongoing basis on every business day at NAV based prices. The Units of the Scheme will not be listed on any exchange, for the present.
Ongoing price for subscription (purchase)/switch-in (from other Schemes/plans of the mutual fund) by investors This is the price you need to pay for purchase/switch-in.	The purchase price of the Units will be based on the Applicable NAV. Purchase Price = Applicable NAV (for respective plan and option of the Scheme) Example: An investor invests Rs 20,000/- and the current NAV is Rs. 20/- then the purchase price will be Rs. 20/- and the investor receives $20000/20 = 1000$ units. The Scheme will comply with SEBI circular No. SEBI/IMD/CIR No. 4/ 168230/09 dated June 30, 2009 regarding applicability of entry load.
Ongoing price for redemption (sale) /switch outs (to other Schemes/plans of the Mutual Fund) by investors. This is the price you will receive for redemptions/switch outs.	The Redemption Price of the Units will be based on the Applicable NAV subject to the prevalent exit load provisions. The Redemption Price of the Units will be computed as follows: Redemption Price = Applicable NAV (for respective plan and option of the Scheme) * (1-Exit Load as applicable to the investor). Applicable exit load shall be subject to the tenure of investment of the investor in the scheme vis-à-vis the exit load structure applicable when investor had invested in the scheme. Example: An investor invests on April 1, 2019 when the applicable exit load for the scheme was 2% if redeemed within 1 year, else nil. Scenario 1) In case investor redeems before April 1, 2020, then applicable exit load would be 2%. Now suppose the

	same investor decides to redeem his 1000 units. The prevailing NAV is Rs 25/-. Hence, the sale or redemption price per unit becomes Rs. 24.50/- i.e. $25 \times (1 - 2\%)$. The investor therefore gets $1000 \times 24.50 = \text{Rs. } 24,500/-$. Scenario 2) In case investor redeems on or after April 1, 2020, then applicable exit load would be nil. Now suppose the same investor decides to redeem his 1000 units. The prevailing NAV is Rs 30/-. Hence, the sale or redemption price per unit will be Rs. 30/- i.e. $30 \times (1 - 0)$. The investor therefore gets $1000 \times 30 = \text{Rs. } 30,000/-$.
Cut off timing for subscriptions/ redemptions/ switches This is the time before which your application (complete in all respects) should reach the official points of acceptance.	The below cut-off timings and applicability of NAV shall be applicable in respect of valid applications received at the Official Point(s) of Acceptance on a Business Day: For Purchase of any amount: • In respect of valid applications received upto 3.00 p.m. and where the funds for the entire amount are available for utilization before the cut-off time i.e. 3.00 p.m. - the closing NAV of the day shall be applicable. • In respect of valid applications received after 3.00 p.m. and where the funds for the entire amount are available for utilization on the same day or before the cut-off time of the next business day - the closing NAV of the next Business Day shall be applicable. • Irrespective of the time of receipt of application, where the funds for the entire amount are available for utilization before the cut-off time on any subsequent Business Day - the closing NAV of such subsequent Business Day shall be applicable. For Switch-ins of any amount: In case of switch from one scheme to another scheme received before cut-off i.e. upto 3 p.m. having business day for both the schemes, closing NAV of the Business Day shall be applicable for switch-out scheme and for Switch-in scheme, the closing NAV of the Business Day shall be applicable, on which funds are available for utilization in the switch-in scheme (allocation shall be in line with the redemption payout). To clarify, for investments through systematic investment routes such as Systematic Investment Plans (SIP), Systematic Transfer Plans (STP), Flex STP, Capital Appreciation STP, IDCW Transfer, Trigger etc. the units will be allotted as per the closing NAV of the day on which the funds are available for utilization by the Target Scheme irrespective of the installment date of the SIP, STP or record date of IDCW etc.

	- “Switch Out” shall be treated as redemption application and accordingly, closing NAV of the day will be applicable based on the cut-off time for redemption followed for various type of schemes. - “Switch In” shall be treated as purchase application and accordingly for unit allotment, closing NAV of the day will be applicable on which the funds are available for utilization. Redemptions including switch-outs: In respect of valid applications received upto 3.00 pm on a business day by the Mutual Fund, same day’s closing NAV shall be applicable. In respect of valid applications received after the cut off time by the Mutual Fund: the closing NAV of the next business day. e.g.: If an investor submits redemption request at 2.00 pm on Monday, the same shall be processed at the closing NAV of Monday. If an investor submits redemption request at 3.30 pm on Monday, the same shall be processed at the closing NAV of Tuesday.

The price at which the Units will be switched out of the Scheme will be based on the Applicable NAV of the relevant Scheme(s) and considering applicable exit loads. Exit load applicable to redemption of units is also applicable to switch. For switches on an ongoing basis, the applicable NAV for effecting the switch out of the existing open-ended funds will be the NAV of the Business Day on which the switch request, complete in all respects, is received by the AMC, subject to the cut-off time and other terms specified in the SID of the respective existing open-ended Schemes.

IDCW Policy	(i) Growth Option The Scheme will not declare any IDCW under this option. The income earned by the Scheme will remain reinvested in the Scheme and will be reflected in the Net Asset Value. This option is suitable for investors who are not looking for regular income but who have invested with the intention of capital appreciation. (ii) IDCW Option This option is suitable for investors seeking income through IDCW declared by the Scheme. The Trustee may approve the distribution of IDCW by AMC out of the net surplus under this Option. The remaining net surplus after considering the IDCW and tax, if any, payable thereon will be ploughed back in the Scheme and be reflected in the NAV. It should be noted that pursuant to payment of IDCW, the NAV of the IDCW option of the scheme would fall to the extent of IDCW payout and statutory, levy, if any. (iii) IDCW Payout: As per the SEBI (MF) Regulations, the Mutual Fund shall despatch to the Unit Holders, IDCW warrants within 7 working days from the record date. IDCW will be payable to those Unit Holders whose names appear in the Register of Unit Holders on the date (Record Date). IDCW will be paid by cheque, net of taxes as may be applicable. Unit Holders will also have the option of direct payment of IDCW to the bank account. The cheques will be drawn in the name of the sole/first holder and will be posted to the Registered address of the sole/first holder as indicated in the original application form. To safeguard the interest of Unit Holders from loss or theft of IDCW cheques, investors should provide the name of their bank, branch and account number in the application form. IDCW cheques will be sent to the Unit Holder after incorporating such information. The minimum amount for IDCW payout shall be Rs.100, else IDCW would be mandatorily reinvested. (iv) IDCW Reinvestment: The investors opting for IDCW Option may choose to reinvest the IDCW to be received by them in additional Units of the Scheme. Under this provision, the IDCW due and payable to the Unit holders will be compulsorily and without any further act by the Unit holders reinvested in the Scheme (under the IDCW Option, at the first ex-IDCW NAV). The IDCW so reinvested shall be constructive

payment of IDCW to the Unitholders and constructive receipt of the same amount from each Unitholder for reinvestment in Units. On reinvestment of IDCW, the number of Units to the credit of Unitholder will increase to the extent of the IDCW reinvested IDCW by the NAV applicable on the day of reinvestment, as explained above.

The Trustee reserves the right to declare IDCW under the IDCW option of the Scheme depending on the net distributable surplus available under the Scheme. It should, however, be noted that actual distribution of IDCW and the frequency of distribution will depend, inter-alia, on the availability of distributable surplus and will be entirely at the discretion of the Trustee.

The IDCW will be distributed in accordance with applicable SEBI Regulations and SEBI Circular no. SEBI/ IMD/ Cir No. 1/ 64057/06 dated April 4, 2006 on the procedure for IDCW Distribution.

The redemption request can be made for a minimum amount as mentioned in para “Highlights of the scheme”. In case, a unit holder specifies the redemption amount as well as number of Units for redemption, (subject to the minimum redemption amount as mentioned above) the number of Units specified will be considered for deciding the redemption amount. If only the redemption amount is specified by the Unit holder, the Fund will divide the redemption amount so specified by the Applicable NAV based price to arrive at the number of Units. Where Units under a Scheme are held under both the Plans, the investor must clearly state the Plan in which the redemption/switch request has to be processed, failing which the request will be processed under the ICICI Prudential US Bluechip Equity Fund. However, where Units under the requested Option are held only under one Plan, the request would be processed under such Plan. In case an investor has purchased Units on more than one Business Day, the Units purchased prior in time (i.e. those

17(b)

Units which have been held for the longest period of time) will be deemed to have been redeemed first i.e. on a First-in-First-Out basis.

The redemption will be at Applicable NAV based prices, subject to applicable exit load.

The Fund reserves the right to modify exit loads, at any time in future, on perspective basis. In such an event, the maximum load (exit) under the Scheme will not exceed the limits as prescribed under the Regulations.

1. Investment in U.S. listed equity securities

(i) Capital Gains

Under Section 865(a)(2) of the Internal Revenue Code (the Code) of the U.S., income from the sale of personal property by a non-U.S resident is sourced outside of the U.S., and thus generally should not be subject to U.S. federal income tax.

In addition, under Section 864(b)(2)(A), trading in stock or securities is generally not considered a U.S. trade or business, except when the taxpayer is a dealer in stocks or securities and effects the trades through U.S. offices directly or through the U.S. office of its agent other than an independent agent (Trading Safe Harbor).

However if the Scheme invests in any entities that are treated as partnership for U.S. federal income tax purposes and if these partnerships are engaged in a U.S. trade or business, then the Scheme itself would be treated as engaged in such a U.S. trade or business, would likely be required to file a U.S. income tax return and potentially pay U.S. tax on its distributive share of partnership income, and may be subject to tax and to potential withholding with respect to sales of an interest in such partnership.

Moreover, Section 897(a) may treat gain derived by a non-U.S. resident from the disposition of a U.S. Real Property Interest (USRPI) as income that is effectively connected with the conduct of a U.S. trade or business and thus subject such gain to U.S. federal income tax (and to a requirement to file a U.S. income tax return). Shares of a U.S. Real Property Holding Corporation (USRPHC), i.e. a company that owns substantial U.S. real estate, would generally be treated as USRPI. Likewise an interest in a publicly traded partnership (PTP) that holds substantial U.S. real estate would generally be treated as a USRPI. Nonetheless, the definition of USRPI excludes stock of a U.S. corporation that is regularly traded on an established securities market, but such exclusion only applies if the stock is held by a person who, during the 5 - year look-back period, did not actually or constructively own more than 5% of that class of stock. The USRPI exclusion for publicly traded stock for holders of 5% or less of such stock is increased to 10% solely in the case of a publicly traded real estate investment trust (REIT). Moreover, the exclusion would apply for a non-resident holding not more than a 5% interest in a PTP that is also a USRPI.

As the Scheme should not be considered as having a U.S. trade or business by reason of its investment activities (provided that it does not invest in partnerships that are engaged in a U.S. trade or business), capital gains derived by the Scheme from the sale of listed U.S. equity should not be subject to tax in the U.S. provided the Scheme holds an interest of 5% or less of any class of stock or 10% in case of a publicly traded REIT and 5% or less of a PTP that is also a USRPI.

In case where the Scheme held, at some time within the 5-year period ending on the date of disposition, more than 5% of the shares of a publicly-traded company that is also a USRPHC 10% or more of a publicly traded REIT, or more than 5% of a PTP that is also a USRPI, gain from disposition of such interest is subject to U.S. corporate net income tax at a rate of 21%.

The AMC shall endeavor that the Scheme's exposure in a publicly-traded company that is also a USRPHC shall not exceed 5% or in case of a publicly traded REIT, shall not exceed 10%, or in the case of a partnership interest in a PTP that would be considered a USRPI, shall not exceed 5%, so that the capital gains received by the Scheme are not subject to tax in U.S.

It should be noted that Section 864(c)(8), provides that where a partnership, including a PTP, is engaged in a U.S. trade or business, if a non-U.S. partner disposes of the partnership interest, a portion of gain or loss is treated as connected with the conduct of a U.S. trade or business, and is therefore subject to U.S. tax. Such income also generates a requirement to file a U.S. tax return. Unlike the rules for PTPs that are USRPI, this provision is not subject to a 5% exception.

by a foreign corporation from sources within the U.S is subject to a 30% withholding tax. Thus U.S. source dividends received by the Scheme from investment in U.S. listed equities shall be subject to withholding tax of 30%.

(ii) Dividend income

Under Section 881(a)(1) of the Code, dividend income received by a foreign corporation from sources within the U.S is subject to a 30% withholding tax. Thus U.S. source dividends received by the Scheme from investment in U.S. listed equities shall be subject to withholding tax of 30%.

2. Investment in U.S Treasury bills, notes or bonds

(i) Capital Gains

Under Section 865(a)(2) of the Code, income from the sale of personal property by a non-U.S resident is sourced outside of the U.S. Thus, capital gains derived by the Scheme from the sale of U.S Treasury bills, notes or bonds shall not be subject to tax in the U.S.

(ii) Interest income

Under Section 881(a)(1)(A) of the Code, interest income received by a foreign corporation from sources within the U.S. is subject to a 30% withholding tax. Hence, interest income received by the Scheme shall generally be subject to withholding tax of 30%.

However, Section 881(c) provides that in the case of any portfolio interest received by a foreign corporation from sources within the U.S., no tax shall be imposed under Section 881(a)(1).

Portfolio interest generally means any interest which is paid on an obligation which is in registered form and with respect to which the person who would otherwise be the withholding agent receives a statement from the beneficial owner or a securities clearing organization, bank or other financial institution that holds customers' securities in the ordinary course of business that the beneficial owner of the obligation is not a U.S person Certain additional requirements may apply. Nonetheless, U.S. Treasury bills, notes and bonds are generally expected to qualify for the portfolio interest exemption.

Further, as the Scheme shall be primarily investing in securities of companies that are listed on the NYSE and / or NASDAQ, the Scheme shall not be classified as "Equity Oriented Fund" as per the provisions mentioned in the Income Tax Act, 1961. Hence the tax provisions as applicable to other than Equity Oriented Fund shall be applicable to the unitholders of the Scheme in India.

3. Investment in U.S. Based Mutual Fund

i) Capital Gains

As already noted, under Code Section 865(a)(2), income from the sale of personal property by a non-U.S. resident is sourced outside of the U.S. Thus, generally capital gains derived by a non-U.S. investor from the sale of an investment in a U.S. based mutual fund should not be subject tax in the U.S. However, if the mutual fund that is sold is a USRPHC, then the gain is considered to be effectively connected with a U.S. trade or business and thus subject to U.S. net taxation, unless the mutual fund whose shares are sold is (a) publicly traded and the investor held an interest of 5% or less in the mutual fund at all times during the year preceding the sale or (b) the mutual fund is a domestically controlled qualified investment entity.

(ii) Income distributions from U.S mutual funds

Generally, under Code Section 881(a)(1)(A), dividend income received by a foreign corporation from sources within the U.S is subject to 30% withholding tax. A mutual fund that is not subject to the USRPHC - related rules described above may distribute ordinary dividends which should be subject to 30% withholding tax. Dividends designated by a RIC (e.g. a mutual fund) as capital gain dividends are treated as long term capital gains in the hands of the shareholders. Except as described above for mutual funds that otherwise qualify as USRPHCs, because long-term capital gains are sourced to the domicile of the recipient, such capital gain dividends should not be U.S source if the recipient is a non-U.S person, and thus would not be subject to U.S taxation.

Until recently, Code Section 881(e)(1) excluded interest-related dividends received from a RIC (Regulated Investment Company) from the tax imposed by Code Section 881(a)(1). Under Code Section 881(e)(2), short-term capital gain dividends received from a RIC were also excluded from the tax imposed by Section 881(a)(1). However, unless they are retroactively extended, the provisions of Code Section 881(e)(1) and (2) are no longer effective for dividends paid as of January 1, 2015. A RIC will designate by written notice mailed to its shareholders whether a dividend (or part thereof) is a capital gain dividend, or, with respect to prior years, an interest related dividend or a short term capital gain dividend.

Notwithstanding the foregoing, under Code Section 897(h)(1), any distribution to a foreign person or other qualified investment entity by a qualified investment entity to the extent attributable to gain from sales or exchanges by the qualified investment entity of USRPIs, is treated as gain from the sale or exchange of a USRPI by the foreign person unless such distribution is with respect to stock that is publicly traded on a U.S exchange and the foreign person did not own more than 5% (or in the case of a REIT, no more than 10%) of such class of stock at any time during the 1 year period ending on the date of distribution

	Where the distribution is treated as gain from the sale or exchange of a USRPI, the distribution is treated as income effectively connected to a U.S trade or business, subject to tax at U.S corporate tax rates and withheld on at a rate of 21% of the distribution. The total amount in tax paid should not exceed the liability as determined by applying the U.S corporate rate. In addition, where distributions from the mutual fund are characterized as gain from the sale of a USRPI due to Code Section 897(h) discussed above, the income is considered effectively connected with the conduct of a U.S trade or business such that the branch profits tax provisions must be considered. Under Code Section 884(a), IDCW equivalent amounts are subject to tax at a rate of 30%. The IDCW equivalent amount is equal to a foreign corporation's effectively connected earnings and profits as determined under Code Section 884(b). Code Section 884(d)(2)(C) excludes gain on the disposition of an interest in a USRPHC from the definition of effectively connected earnings and profits. Thus where Code Section 897(h) applies to treat a IDCW distribution as the sale of a USRPI and subject it to withholding, there is branch profits tax as well unless the distribution/gain is related to the sale of USRPHC shares by the qualified investment entity. For detailed tax benefits, investors are requested to refer para on "Tax benefits of investing in Mutual Fund" as mentioned in the Statement of Additional Information.

D. COMPUTATION OF NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date. The Fund shall value its investments according to the valuation norms, as specified in Schedule VIII of the Regulations, or such norms as may be prescribed by SEBI from time to time and as stipulated in the valuation policy and procedures of the Fund, provided in Statement of Additional Information (SAI).

The NAV of the Scheme shall be rounded off upto two decimals

NAV of units under the Schemes shall be calculated as shown below:

$$\text{NAV (Rs.)} = \frac{\text{Market or Fair Value of Scheme's investments + Current Assets} - \text{Current Liabilities and Provision}}{\text{No. of Units outstanding under Schemes}}$$

The NAV will be calculated as of the close of every Business Day of the respective Schemes. The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

Illustration on computation of NAV:

If the net assets of the Scheme are Rs.10,45,34,345.34 and units outstanding are 10,00,0000, then the NAV per unit will be computed as follows:

$$10,45,34,345.34 / 10,00,0000 = \text{Rs. } 10.45 \text{ p.u. (rounded off to two decimals)}$$

For ICICI Prudential US Bluechip Equity Fund:

Policy for computation of NAV of foreign securities:

Considering that the Scheme shall be investing in US markets, there would be timing zone differences between transactions by investors and investments in/sale of securities. As a result, the AMC shall update the NAV by 11.00 a.m. on the website of Association of Mutual Funds in India on the next business day.

The NAV of the Scheme will be calculated and declared by 11.00 a.m. on the next Business Day. The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

Valuation of Listed Foreign Securities (including ADR / GDR, units of overseas mutual funds and Index Fund, Exchange Traded Funds (ETFs) listed on overseas stock exchange etc.)

- These shall be valued based on the last quoted closing prices at the Overseas Stock

Exchange on which the respective securities are listed. However, the AMC shall select the appropriate stock exchange in case a security is listed on more than one stock exchange and the reasons for the selection will be recorded in writing. Any subsequent change in the reference stock exchange used for valuation will be necessarily backed by reasons for such change being recorded in writing by the AMC. However, in case of extreme volatility in other markets post the closure of the relevant markets, the AMC shall value the security at suitable fair value.

- When on a particular valuation day, a security has not been traded on the selected stock exchange; the value at which it is traded on another stock exchange* or last quoted closing price on selected stock exchange or any other stock exchange, as the case may be, shall be used provided such date is not more than thirty days prior to the valuation date. *(only the stock exchange(s) of the country where the securities were purchased will be considered while considering any other stock exchange.
- Due to difference in time zones of different markets, in case the closing prices of securities are not available within a given time frame to enable the AMC to upload the NAV for a Valuation Day, the AMC may use the last available traded price/ previous day's price for the purpose of valuation. The use of the closing price/last available traded price for the purpose of valuation will also be based on the practice followed in a particular market. - On valuation date, all assets and liabilities in foreign currency shall be valued in Indian Rupees at the RBI reference rate as at the close of banking hours on the relevant business day in India. If required the AMC may change the source for determining the exchange rate.

(ii) Unlisted/ Non Traded Foreign securities

- Unlisted/Non traded foreign securities shall be valued by AMC at fair value after considering relevant factors on case to case basis.
- Unlisted/Non-traded ADR /GDRs shall be valued after considering prices/ issue terms of underlying security. Valuation committee shall decide the appropriate discount for illiquidity.
